Subject: Farmland

To: Clyde Eisenbeis <cte677@gmail.com>

Morning Clyde,

We are about a month out from harvesting the soybeans on your land.

This year I noticed the water in the creek is completely gone. Since we started farming your land there has always been standing water there. I thought it was interesting.

I was wondering if there are any updates on the approach on the north east part of the field? That was many years ago already that we had met down there with everyone and all approved of it. Would be much easier on our equipment if we had an approach instead of that concrete block crossing with such aggressive slopes on it.

We will also have to remove a few of the trees that are growing in the drainage for our equipment to cross through.

Have a good day and I am sure we will catch up soon.

Jayme J. Boeshans
