RE: Project #: HEN-X-2-094(172)251 (PCN-22884)

We are in receipt of your letter and complaint from WBI Energy. As per the first complaint in regards to ticket #22016636: Ticket #22016636 was updated on 7/14/22 and became ticket #22073654. The ticket was updated after the dirtwork was completed through this portion of the project which took place the week of July 11th. On 7/20/22 this area was also seeded and hydraulic mulch was installed. We marked out and pounded sleeves through this segment of work on 7/25/22. We installed posts in the sleeves and laid out clips on 7/26/22. There was no gas located at the time we marked out or installed our sleeves and I did not receive a call asking for an extension of the locate ticket for their locates. The locates should have been completed to start work on 7/19/22. It is impossible to stay away from utilities if they are not located. Due to the rain we've gotten and the fact this was on fresh dirt I can't provide you with any pictures of the paint in this area as of today. However, if you look at the picture provided with the complaint you can see that WBI's paint mark is on top of the hydraulic mulch and our orange paint mark has been washed away from rain already. Per this complaint WBI Energy did not locate their line per Century Code and came in after the work was completed.

As per complaint #2 I've attached a map showing when the work was completed in this segment due to the locate being updated on numerous occasions. I've also attached photos of this area. The work that crosses WBI Energy's line was completed in June under ticket #'s 22029524 and 22046604. Our sleeves were pounded 570' past their line at this time. We couldn't go any further due to some pipework and dirtwork that needed to be completed west of where we stopped. It was updated again in August to continue with the work in this portion of the project. I did list on this ticket that no locates were required where The High Tension Cable had already been installed. WBI relocated their line at this location. Our standard practice is to stay 2'-6" away from utilities with our sleeves. I can't tell you where WBI's markings were in June but even with the relocate we are 2'-2" away from their line which is per Century Code. Attached are pictures of our sleeves, pictures of their relocate in August, and pictures of where we stopped and started in comparison to their line, the locate tickets and the ND Century Code.

If you have any questions, please feel free to contact me.

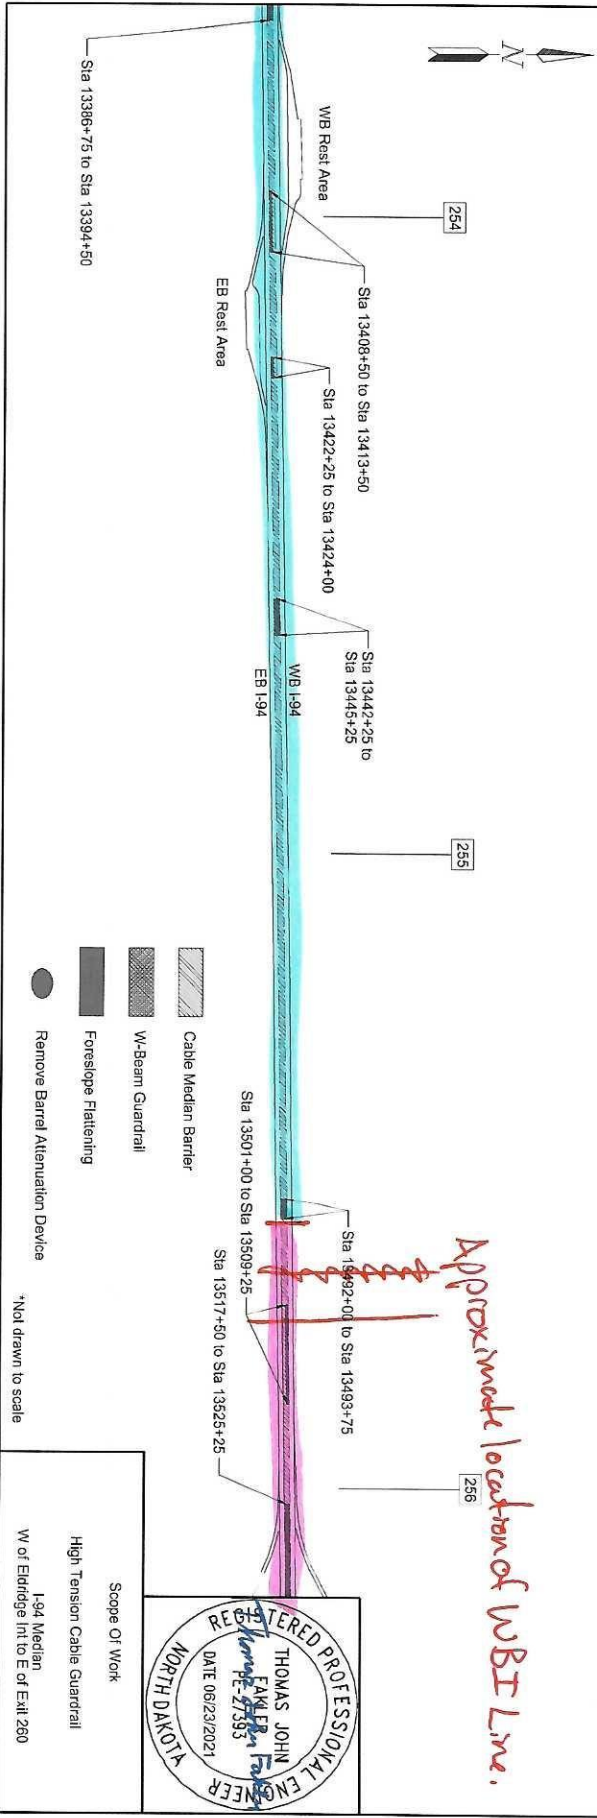

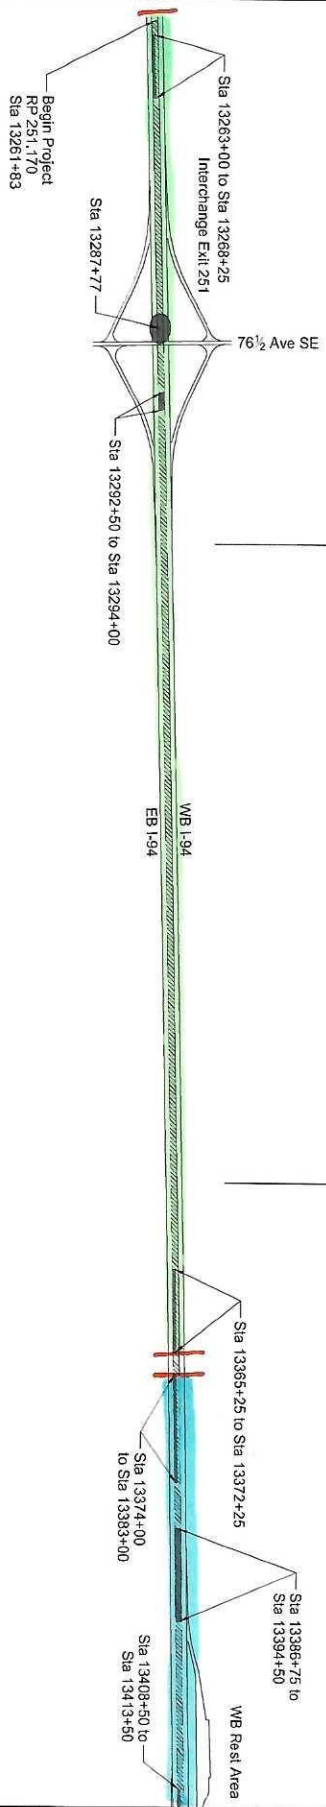

Sincerely,

CUSTOM CONTRACTING SOLUTIONS, LLC

Thomas J. Schultz
President

ND Dig Law

August 1st, 2017, 12 new law changes

ONE CALL LAW CHANGES

65th Legislative Session – 2017

1. Manual digging: Clarifies careful and prudent digging to mean an excavator must manually dig within two feet of the centerline indicated for any located facility; **ND Century Code 49-23-01, Definition 3.**
2. Locate times: Clarifies start time of the locate period as the later of:
 - a. 48 hours beginning at 12:01am the day after the request is submitted to the notification center, plus any 24 hour extension provided through the notification center, or
 - b. The period between the submission of the locate request to the notification center and the noted date and time of excavation;
ND Century Code 49-23-01, Definition 12. Also ND Century Code 49-23-04, Subsection 1 and Subsection 6, paragraph a.
3. Positive response: Mandatory for operators, allowing excavation to begin as soon as possible; **ND Century Code 49-23-01, Definition 16. Also ND Century Code 49-23-04, Subsection 4, Subsection 5, paragraph e, and Subsection 6, paragraph n.**
4. Change in wording on who shall participate in the costs of a statewide notification center. **ND Century Code 49-23-03 Subsection 2.**
5. Board seat: Adds a seat on the ND One Call Board of Directors for gathering and transmission oil and gas pipelines; **ND Century Code 49-23-03, Subsection 4, paragraph a.**
6. Site identification: Requires an excavator to identify the area to be excavated by physical or electronic means, or other means as agreed upon by the parties to the ticket (narrows the scope of the excavation area for location purposes); **ND Century Code 49-23-04, Subsection 2.**
7. Ticket size: Defines urban ticket areas as three contiguous city blocks in urban areas, four contiguous quarter sections, or five linear miles in rural areas.; **ND Century Code 49-23-04, Subsection 3.**
8. Costs for non-locatable facilities: If an excavator cannot expose the facility within two feet as marked by the operator, requests assistance from operator and operator fails to assist within a reasonable amount of time, the operator is responsible for the excavator's reasonable costs to expose the facility; **ND Century Code 49-23-04, Subsection 6, paragraph b.**
9. Proof of excavation: Burden of proof lies with excavator (ticket requestor) to show excavation has occurred when disputing a bill for a third locate request on the same ticket (current law allows for billing reasonable locate costs for third and any subsequent locate requests on the same ticket when no excavation has occurred); **ND Century Code 49-23-04, Subsection 6, paragraph h.**
10. Repeat locate requests: If PSC determines additional locate requests were caused by an excavator's failure to maintain and remove markings, the excavator would be responsible for reasonable locate costs; **ND Century Code 49-23-04, Subsection 6, paragraph j.**
11. Survey ticket: Creates a survey ticket option for non-excavation locate requests, which allows for electronic data exchange, reduces flag management issues, and has a longer locate window (5 days); **ND Century Code 49-23-04.1 Survey.**
12. Culpability: Changes the level of proof from 'knowingly' to 'willfully', which includes 'knowingly', 'recklessly', and 'intentionally'; **ND Century Code 49-23-06, Subsection 1, paragraph c.**
