Commissioners and Mr. Dawson

I am a Burleigh County resident, I live NE of Bismarck. The proposed route is 6 miles north of my house. I am very concerned for my families safety, its not if this pipeline will break but when. You cannot allow this to go through the north part of Bismarck Mandan area. There is approximately 125000 people that could be affected by a break. The area is at a higher elevation, and why hasnt Summit provided a plume study? We all know why because it will follow the low lying area which is the Missouri River into our cities. You as our elected employees and stand in cannot put the safety of Bismarck Mandan citizens in harms way because of \$\$\$\$. This green new deal hoax is not necessary to our oil and gas production. Its all about the 45 tax credits for the establishment good old boys club here in ND. We hear over and over it will be good for our economy (yes a select few) money doesnt buy happiness, quality of life is what is important not having to worry about a critical co2 pipeline exploding. This pipeline is unlike anything we have seen in ND 24 inch 2200 psi, this shouldnt be considered a common carrier it doesnt benefit the people. Our legislators (the new ones) that will be coming in havent had an opportunity to address this issue, there should be no hurry to issue any kind of permit. Randy you said during the special session that our legislators didnt address this. Thats true except Sen. Magrum who is a true patriot! The rest of the rino republicans (the good old boy club) are bought and paid for. I and hundreds of patriots saw this first hand at the Fago Republican Convention, there is an establishment, they have forgot why they have been elected, to serve the people of ND not the powerful wealthy establishment, change is coming not if but when. I will leave you with this, if GOD wanted co2 stored in the ground do you think HE would have done that when HE created the earth? The love of money is the root of ALL evil. Money isnt evil but the LOVE of it is, the power the greed the control and corruption is whats wrong in our world, and thats what we see with this co2 pipeline.

Thankyou for your time. Doug P
