SULPHUR, La. (KPLC) - A shelter-in-place has been lifted for residents near Bankens Road north of Sulphur after a leak was stopped in a high-pressure carbon dioxide line.

Calcasieu emergency preparedness officials said the Denbury pipeline was blocked off around 8:25 p.m. and the shelter-in-place order lifted shortly after.

The order was issued because wind was keeping the released gas close to the ground.

Residents near Bankens Road north of Sulphur are asked to shelter in place because of a leak in a high-pressure carbon dioxide line. The shelter-in-place is a quarter-mile radius from the 300 block of Bankens Road. (Calcasieu Parish Police Jury)
