Hi, Mary... Not sure what Mr. Bittner is referring to, but Summit's dispersant analysis was evaluated by independent subject matter experts as part of the South Dakota's PUC staff analysis, and more recently as part of the preparation of an environmental impact statement for a proposed Summit line segment in Minnesota. As a reminder, Summit's dispersant analysis is held confidential in Iowa, South Dakota, and North Dakota. The analysis performed by a consultant for the Minnesota PUC is public as part of the draft EIS.

Subject: Third Party Authentication

Commissioner Bitner heard there was third party authentication for the plume modeling.
Could you please clarify who or what that means?
