Re: Cost of Gas Adjustment (COG)
Rate 88 and Rate 99
Case No. PU-23-007

In accordance with North Dakota Century Code Section 49-05-05, Montana-Dakota Utilities Co. (Montana-Dakota) electronically submits a Cost of Gas (COG) – Natural Gas change pursuant to the terms of Rates 88. Montana-Dakota will not seek a COG – Propane adjustment for the month of March 2023 for Rate 99.

The COG Adjustment tariff (Rate 99), Section 2(b) provides that “Montana-Dakota shall file to reflect changes in its average cost of gas supply only when the amount of such COG is at least 25 (twenty-five) cents per dk.” For Rate 99 – Propane, the COG adjustment for the month of March 2023 results in a change of less than 25 cents per dk, and therefore, in accordance with the authorized tariff, Montana-Dakota will not seek a COG adjustment change for the month of March 2023.

The Rate Summary Sheet (18th Revised Sheet No. 3) showing the proposed natural gas rates reflecting the COG effective March 1, 2023 along with currently effective distribution rates and expected implementation of WBI rates is provided in Exhibit 1. The net effect of this filing, calculated pursuant to the terms of Rate 88, is a decrease of \$0.473 per dk for residential customers and firm general customers, a decrease of \$0.997 per dk for small and large interruptible customers, and a decrease of \$0.993 per dk for Air Force interruptible customers.

Montana-Dakota purchases gas supplies under a number of contracts and secures transportation service over a number of pipelines for delivery of the natural gas purchased to Montana-Dakota’s distribution system to meet the demands of its customers. The commodity cost of natural gas has decreased \$1.148 per dk since the February 1, 2023 rates due to a decrease in the overall commodity price of gas. The overall cost of gas was partially offset by the pipeline interim rates expected to be implemented March 1, 2023. In addition, there was an update to the Company’s firm dk requirements, a decrease to allocation of demand and changes to pipeline and other costs resulting in an increase of \$0.675 per dk.

The following Exhibits are provided in support of the COG rates to be effective March 1, 2023:

- Exhibit 2 summarizes the cost of gas adjustment, the surcharge adjustment, and the grain drying margin sharing adjustment calculated pursuant to the terms of Rate 88 that will apply during the month of March 2023.
- Exhibit 3, shows the calculation of the current gas cost adjustment that will be applicable to Montana-Dakota's customers for the month of March 2023 along with an explanation of the reasons for the decrease in the market price of gas. The average cost of gas for firm customers, adjusted for losses, is \$5.664 per dk.
- Exhibit 3a is marked as "Confidential" and contains confidential information regarding gas commodity pricing and is designated as Trade Secret in accordance with the Commission's March 30, 2022 Order in Case No. PU-22-008. Montana-Dakota filed for similar treatment on October 31, 2022 in Case No. PU-23-007 and is pending. Exhibit 3a - Public Copy is included in this filing.
- Exhibit 4 provides a summary of the change in pipeline rates occurring since the last COG filing and a copy of applicable effective pipeline rates along with supporting workpapers.
- Exhibit 5 shows the calculation of the return on storage inventory balances and prepaid demand and commodity balances using the calculation procedure set forth in Rate 88. The overall rate of return of 6.851% applied to the balances was authorized by the Commission in Case No. PU-20-379.
- Exhibit 6 shows the computation of the (over)/under recovered gas cost account balances.

The COG changes, calculated in accordance with Rate 88, will amount to a decrease of approximately \$1,142,100 for natural gas customers during the month of March 2023. All of Montana-Dakota's retail natural gas customers in North Dakota may be affected by this proposal. There were 112,835 natural gas customers in North Dakota as of January 31, 2023.

Market Conditions for Regional Natural Gas
March 2023**

The established monthly price for Rocky Mountain CIG Index for this month expected to decrease by \$2.14/MMBTU to \$3.17/MMBTU in March 2023 from \$5.31/MMBTU in January 2023. The CIG Rocky Mountain Index is based on a price discovery survey by several natural gas periodicals, including “Inside FERC Gas Market” report and “Gas Daily” by McGraw-Hill Companies, of prices paid by willing sellers and buyers of quantities of gas in that region. That price is reflective of natural gas prices in the Rocky Mountain region and indicative of the supplies Montana-Dakota purchases for its requirements.

The EIA reported nationwide storage levels as of January 27, 2023 at 6.7 above the five-year average and 9.4 above last year’s balance.

The Department of Energy’s (DOE) Energy Information Administration (EIA) provides various publications on energy issues. The information is available on the DOE website: <http://www.eia.doe.gov>.
