Re: Oliver Wind IV Transmission Line

Planning & Zoning Committee:

Basin Electric Power Cooperative has been working with NextEra on a preferred route for their Oliver Wind IV transmission line across Basin's property near Stanton, ND, and interconnecting into the new LOS 345kV Substation. NextEra accommodated a reroute of their project on Basin land at our request, to address preferable crossings of Basin's existing transmission lines. Basin Electric intends to issue an option for an easement for the Oliver Wind IV Transmission Line to be executed once the appropriate permits are obtained.

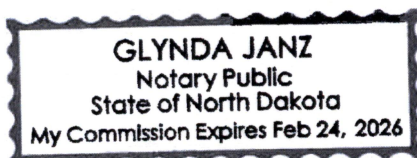

If you have any questions, please do not hesitate to contact me at mmurray@bepc.com or 701.557.5454. Thank you.

Sincerely,

Mike Murray, SR/WA, R/W-NAC
