A SUBSIDIARY OF THE NORTH AMERICAN COAL CORPORATION

April 5, 2023

Ms. Zanna Brinkman
Director Reclamation Division
Public Service Commission
600 East Boulevard Avenue
Department 408
Bismarck, ND 58505-0480

Dear Ms. Brinkman:

Enclosed is the 2023 Soils Handling Plan for Coyote Creek Mine.

Coyote Creek Mine has a mixing agreement with all surface owners within the main body of the permit area. There is no mixing agreement with the surface owners within the Revision 1 haulroad addition, so calculations for this area are shown separately. Soils from Section 30 were handled separately from the main body of the permit area so calculations from this area are shown separately.

Consistent with what is shown in Permit NACC-1302, salvaging deep lift and other suitable strata is necessary to meet required respread thicknesses. With the addition of deep lift subsoil and other suitable strata, it is projected that there will be an excess of subsoil of 0.3%. Due to timing constraints and minimizing disturbance prior to mining operations, Coyote Creek requests to continue to waive the NDPSC approval of subsoil removal operations.

Thank you for your consideration. Should you have any questions, feel free to contact me.

Sincerely,

COYOTE CREEK MINING COMPANY, L.L.C.

Jason Sailer P.E.
Mining Engineer

Respread Thickness Calculations (01/01/23)

Topsoil

	Pile No.	CY Salvaged	Crop (ac)	Native (ac)	Respread Thickness	
					Crop (in)	Native (in)
CCMC	1, Veneer	51,507	11.2	19.9	12.9	12.0
Voigt	3	1,529	0.0	1.3	NA	8.7
Subtotals		53,036	11.2	21.2		

Thickness calculations are based on pile volumes available to each landowner, since TS was piled separately by owner.

Subsoil

	CY Salvaged	Crop (ac)	Native (ac)	Respread Thickness	
				Crop (in)	Native (in)
CCMC	28,628	4.53	19.42	8.5	8.5
Voigt	334	0.00	1.09	NA	2.3
Subtotals	28,962	4.53	20.51		

Voigt subsoil thickness of 2.3" determined by soil survey; CCMC thickness determined by uniform respread of the remaining subsoil on SS-2 and SS-4 after Voigt lands at the shop-office facility are respread.

Summary

	Crop Respread Thickness			Native Respread Thickness		
	TS	SS	Total	TS	SS	Total
CCMC	12.9	8.5	21.4	12.0	8.5	20.5
Voigt	NA	NA	NA	8.7	2.3	11.0

Voigt subsoil inventory will be supplemented by future soil salvage in other parts of the mine. CCMC subsoil inventory will be supplemented by future soil salvage in other parts of the mine if other landowner needs are met. Alternatively, lands will be sampled during reclamation to assess overburden quality for use as other suitable strata as required by NDAC 69-05.2-08-11.

Notes

1. Voigt requested that Sec 30 CCMC topsoil not be mixed with his because of concerns about Canada thistle in the seedbank. Although not required, CCMC attempted to follow this request. Therefore, TS-1 was salvaged from and will only be respread on CCMC lands.
2. A temporary 3" veneer of topsoil was respread on 2.1 acres in Section 30, to stabilize long term slopes at the substation and near the shop-office. The veneer will be salvaged and respread during final reclamation. Topsoil in the veneer came from CCMC lands.
3. A small area (0.48 acres TS and 0.69 acres SS) in the E2SE4 Section 30, located north of the substation, was stripped in 2015 and hauled to piles on the west side of Coyote Creek because of poor access to the existing piles north of the office. Because soil from that area wasn't handled separately and stockpiled locally, it wasn't included in the calculations for the shop-office soil balance area.

3) Determine SPGM Respread Thickness Required by Disturbance Type (Assoc. vs Mining) and Surface Owner (As of 01/01/23)

Topsoil	Voigt				State				P Winkler Native	Winkler Native	Total
	Crop	Native	R/W	Subtotal	Crop	Native	R/W	Subtotal			
Assoc Dist Acres	16.90	266.83	1.02	284.75		57.32		57.32			
Mining Dist Acres	260.18	405.22		665.40	0.00	520.79	-	520.79	1.99	1.26	
Total Acres	277.08	672.05	1.02	950.15	0.00	578.11	-	578.11	1.99	1.26	1531.51
CY	669,111	1,080,792	823	1,750,726	0	1,024,865	0	1,024,865	1,659	1,203	2,778,452
Inches	17.96	11.96	6.0	NA	0.00	13.19	-	NA	6.2	7.1	13.5

*Based on both Sections 2.5.4.2 and 2.5.4.1, Voigt topsoil is 4% thicker than State owned lands but Voigts also asked for additional cropland so need to prorated accordingly by finding State's thickness first.
 Assume State Thickness is "Z" in following fomula. (Total State acres × Z × 43560) + (Total Voigt acres less R/W × 1.04Z × 43560) = (Topsoil Stockpile Volume - RW Volume - P Winkler Volume - Winkler Volume) × 27
 So: (578.11 × Z × 43560) + (949.13 × 1.04Z × 43560) = 2774767 × 27 Solving for Z = 1.0988 feet or 13.19 inches which equates to 1,024,865 CY of topsoil for State and Voigts get remaining 1,749,902 CY
 Assume Voigts Native Thickness is "Z" in following formula: (Voigt Native Acres × Z × 43560) + (Voigt Crop Acres × (Z+0.5) × 43560) = Voigt Topsoil Volume × 27
 So: (672.05 × Z × 43560) + (277.08 × (Z + 0.5) × 43560) = 1,749,902 × 27 Solving for Z = 0.9968 feet or 11.96 inches for Native and 17.96 inches for cropland.
 **Topsoil will not be respread at different thicknesses based on disturbance type. Associated disturbance calculations will be used to determine total respread depth only.
 ***Cropland topsoil is calculated to be respread at approximately 6" thicker than native topsoil.
 **** Winkler's and P Winkler's topsoil thickness determined by taking the weighted average of all the topsoil depth inside the mining disturbance boundary
 *****Potential cropland topsoil will be respread at same thickness as native topsoil.

Subsoil	Voigt								State				P Winkler Mining Dist	Winkler Mining Dist	Total

Total SS Volume Required (cy)	5,453,637
Total Available SS (cy)	5,322,094
SS Excess/Deficit (cy)	(131,543)

Notes
 1. Calculations below were used to compare Voigt and State topsoil thickness in both the mining disturbance area and permit area and come from Section 2.5 in the NACC-1302. It appears that Voigt owned surface consistently has an average of 4% thicker topsoil. Therefore, this was used in the calculations in (3) above, when determining topsoil respread by owner.

	Acres	CY	In		Acres	CY	In
Voigt	1,621	3,166,212	14.5		3,250	6,610,146	15.1
State	1,307	2,460,036	14.0		1,807	3,490,464	14.4
Difference between Voigt and State			4%				5%

4) Determine 2023 Subsoil Salvage Volume Required (01/01/23 - 01/01/24)

4A) Projected Associated Disturbance (01/01/23 - 01/01/24):

The amount of redistributed SPGM in associated disturbance areas must be based on the amount removed (NDAC 69-05.2-15-04). Calculations in Section 2A determine total respread thickness on areas of associated disturbance. A unique topsoil thickness will not be calculated for associated versus mining disturbance areas. Associated disturbance areas will be respread with the calculated topsoil respreath thickness based on inventoried yards. Subsoil will be respread at a thickness necessary to achieve the associated disturbance premine weighted average soil thickness, by landowner.
