**RE: 41 Wind, LLC's Ten Year Plan for 2024-2034 Case No.  
PU-24-\_\_\_\_\_**

Dear Mr. Kahl:

Attached for filing are copies of the following documents:

1. 41 Wind, LLC's Ten Year Plan: 2024-2034;
2. Notice of Filing Ten Year Plan: 2024-2034; and
3. Certificates of Service.

If you have any questions, please let me know.

Sincerely,

A handwritten signature in blue ink, appearing to read "Angeli Modjeski", is written over a horizontal line.

2024 Ten Year Plan  
41 Wind, LLC  
Angeli Modjeski, Admin. Asst.

## **TEN YEAR PLAN: 2024-2034**

### **41 Wind, LLC**

**June 2024**

In accordance with N.D.C.C. § 49-22-04 and N.D.A.C. Ch. 69-06-02, 41 Wind, LLC (“41 Wind”), submits the following Ten Year Plan for years 2024 through 2034.

- (1) *A description of the general location, size, and type of all facilities to be owned or operated by the utility during the ensuing ten years, as well as those facilities to be removed from service during the ten-year period.*

41 Wind Project (“41 Wind”) is a proposed wind project located in Burleigh and McLean Counties, North Dakota. As proposed, the Project will have a nameplate capacity of up to 400 megawatts (“MW”) and potentially an associated transmission line to connect the Wind Project to the grid (“Transmission Line”). Additional facilities associated with the Project include access roads, permanent meteorological evaluation towers (“MET”), an Aircraft Detection Lighting System (“ADLS”), a Supervisory Control and Data Acquisitions (“SCADA”) system, transformers, an operations and maintenance (“O&M”) building, a proposed project substation, a construction laydown area, and a batch plant.

The Wind Project will be located northeast of the city of Wilton in McLean County and west of the town of Wing, in Burleigh County, North Dakota. At this time, the point of interconnection has not been finalized as several scenarios are being evaluated. 41 Wind plans to commence construction of the Wind Project (and Transmission Line if necessary) as early as Third Quarter 2027 and achieve commercial operation as early as the end of 2028.

Other than the Wind Project (and Transmission Line, if necessary) 41 Wind does not have any transmission or generation facilities located in North Dakota, and the projects will have an estimated life of greater than 10 years. As such, 41 Wind does not have any plans to decommission any transmission or generation facilities within the timeframe of this plan.

- (2) *An identification of the location of the tentative preferred site for all energy conversion facilities and the tentative location of all transmission facilities on which construction is intended to be commenced within the ensuing five years and such other information as may be required by the commission. The site and corridor identification shall be made in compliance with the criteria published by the commission pursuant to section 49-22-05.1.*

41 Wind is located in Burleigh and McLean Counties, North Dakota. 41 Wind proposes to have the Project in-service as early as the end of 2028. 41 Wind does not have any energy conversion facilities or transmission lines to be removed from service.

- (3) *A description of the efforts by the utility to coordinate the plan with other utilities so as to provide a coordinated regional plan for meeting the utility needs of the region.*

41 Wind is in the process of identifying an offtaker for the Wind Project’s output. Energy produced by the Wind Project may help local utilities continue to meet applicable renewable

energy standards. 41 Wind is in mid-phase of completing interconnection options for the Wind Project. Once the interconnection studies are finalized, 41 Wind will coordinate with the appropriate regional transmission organizations/independent system operator to enter into a generator interconnection agreement for the Wind Project.

- (4) *A description of the efforts to involve environmental protection and land-use planning agencies in the planning process, as well as other efforts to identify and minimize environmental problems at the earliest possible stage in the planning process.*

41 Wind has engaged the services of a qualified environmental consulting firm to conduct a study of and identify avoidance and exclusion areas within the proposed Wind Project site in accordance with N.D.C.C. Ch. 49-22 and N.D.A.C. Ch. 69-06-08. In addition, the consultant is to identify any areas of concern that would need special attention during siting and/or facility construction. 41 Wind will continue to avoid, minimize, and/or mitigate any impacts to the environment or siting concerns that would preclude development within the study areas.

41 Wind has been in contact with the United States Fish and Wildlife Service ("USFWS"), North Dakota Game and Fish Department ("NDG&F") and officials in Burleigh and McLean Counties, among others, regarding the proposed Project. During the process and at completion of 41 Wind's environmental studies, 41 Wind will coordinate with the USFWS, NDG&F, Burleigh and McLean Counties as well as other federal, state and local agencies and governmental units, to discuss and seek input regarding the proposed Project.

- (5) *A statement of the projected demand for the service rendered by the utility for the ensuing ten years and the underlying assumptions for the projection, with that information being as geographically specific as possible, and a description of the manner and extent to which the utility will meet the projected demands.*

As discussed above, 41 Wind is in the process of identifying an offtaker for the Wind Project and may sell the power in the form of power purchase agreements ("PPAs"), or the Project could be owned directly by a utility.

As an independent power producer, 41 Wind is not limited to the needs of one region and is able to bid into multiple wholesale markets across the region. Utilities and other customers seeking to diversify and build their energy generation portfolios are attracted to wind energy projects because of long-term, fixed, competitive pricing, environmental benefits and existing and potential renewable energy policies.
