**In re: Wilton Wind Energy I, LLC
2024 Ten Year Plan
Our Matter No. 035218-000023**

Dear Mr. Kahl:

On behalf of Wilton Wind Energy I, LLC, enclosed for filing is a copy of the entity's 2024 Ten Year Plan. The Burleigh County Auditor has been served with a copy of the Ten Year Plan and notice of the filing has been given to each agency and officer designated in North Dakota Administrative Code § 69-06-01-05. A copy of the corresponding Certificates of Service are also enclosed for filing.

Please feel free to contact me with any questions.

Sincerely,

CROWLEY FLECK PLLP

/s/ Casey A. Furey

Subject: NDCC 49-22-04, Ten Year Plan

In accordance with NDCC 49-22-04, Wilton Wind Energy I, LLC (“Wilton Wind”) hereby submits its 2024 Ten Year Plan.

Contact: Ebere Onyeka
Phone: (561) 307-9043
Email: bmcompliance@nee.com

Submittal

Subsection A: A description of the general location, size, and type of all facilities to be owned or operated by the utility during the ensuing ten years, as well as those facilities to be removed from service during the ten-year period.

1. The Wilton Wind Energy Center (“Wilton Wind”) is located near Wilton, North Dakota in Burleigh County. Wilton Wind contributes approximately 49.5 megawatts (MW) of renewable energy to the power grid. Wilton Wind consists of 33 GE 1.5-91 wind turbines and has been in production since January 2006. The project is not expected to retire in the next ten years—a Power Purchase Agreement (PPA) is in place with Basin Electric Power Cooperative through the end of 2030. Wilton Wind includes an electrical collection system that transports energy from the 33 turbine feeders to the wind project collector substation owned by Wilton Wind. Wilton Wind interconnects with the 230 kV transmission line owned by the Central Power Electric Cooperative, Inc., at the Baldwin collector substation.
2. Commenced Commercial Operations: January 2006 (with project improvements completed March 2020)
3. No additional energy conversion facilities are expected to be owned or operated by the utility during the next ten-year period.
4. Projected Retirement Date: The facility is not projected to retire within the next ten-year period.

Subsection B: An identification of the location of the tentative preferred site for all electric energy conversion facilities and the tentative location of all electric transmission facilities on which construction is intended to be commenced within the ensuing five years and such other information as may be required by the commission.

1. Wilton Wind does not intend to commence construction of any new electric energy conversion facilities within the ensuing five years.

Subsection C: A description of the efforts by the utility to coordinate the plan with other utilities so as to provide a coordinated regional plan for meeting the utility needs of the region.

1. Wilton Wind has a nameplate capacity of 49.5 MW and sells the output to Basin Electric Power Cooperative under a long-term PPA to meet the needs of its customers and member cooperatives.

Subsection D: A description of the efforts to involve environmental protection and land-use planning agencies in the planning process, as well as other efforts to identify and minimize environmental problems at the earliest possible stage in the planning process.

1. Wilton Wind conducted multiple environmental studies prior to construction of the facility and met all environmental requirements of the NEPA Environmental Assessment (EA) process. Wilton Wind is also committed to environmental compliance during project operation.
2. A comprehensive Wildlife Response and Reporting Manual is in place to record any avian fatalities and/or injuries that are found within the wind plant boundaries.
3. Wilton Wind completed one year of post-construction monitoring for birds and bats.
4. An Adaptive Management Plan was developed for both construction activities and post-construction operations. Appropriate responses for various types of avian sightings are detailed within.
5. Spill Prevention Control and Countermeasure Plan specifies processes for dealing with all chemical, hazardous, and oil spills that may occur on the property.

Subsection E: A statement of the projected demand for the service rendered by the utility for the ensuing ten years and the underlying assumptions for the projection, with that information being as geographically specific as possible, and a description of the manner and extent to which the utility will meet the projected demands.

1. As described above, Wilton Wind sells the output of its facility to Basin Electric Power Cooperative under a long-term PPA, which run through 2030. Wilton Wind meets Basin Electric Power Cooperative's demand for service pursuant to these agreements.
2. Wilton Wind has not performed any other analysis of projected demand for the ensuing ten years.

Subsection F: Any other relevant information as may be requested by the commission.
