

APPENDIX A – POLICY STATEMENT

FLICKERTAIL

SOLAR PROJECT

Policy Statement

Flickertail Solar Project, LLC (Flickertail) and Savion, LLC (Savion) are committed to the safe and environmentally sound operation of its facilities and to the health and safety of the surrounding community. Flickertail is committed to the safe design, construction, and operation of its facilities.

Savion is committed to environmental stewardship, as evidenced by its partnerships with the Renewable Energy Wildlife Institute, the Energy Wildlife Action Coalition, the Solar Energy Industries Association, and the American Clean Power Association. In addition to these partnerships, Savion is actively supporting multiple research efforts to better understand the impact that solar has on natural resources and to identify additional ways for large-scale solar to provide environmental benefits (co-benefits) through best management and land use practices.

Flickertail has coordinated and will continue to work with the appropriate agencies such as the local Natural Resources Conservation Service (NRCS) United States Department of Agriculture (USDA) office and the Richland Soil Conservation District (SCD) to develop and implement a vegetation management plan for the Project, which includes Flickertail's commitment to implement a pollinator perimeter within the Project fence. The NRCS and the SCD will be involved with selecting and creating seed mixes appropriate for the site and reviewing and approving the proposed vegetation management plan for the Project.
