Re: Case No. PU-24-361
Basin Electric Power Cooperative
Leland Olds Station to Tande 345-kV Transmission Line Project

Dear Mr. Kahl:

In accordance with item 38 of the Certification Relating to Order Provisions, please accept this Structure Relocation request for Basin Electric Power Cooperative's (Basin Electric) Leland Olds Station to Tande 345-kV Transmission Line Project (PU-24-361). Fifteen structures are being relocated due to engineering and design reasons, while one structure is being added. All structure relocations and addition are within the established corridor, as reflected in the Certificate of Corridor Compatibility Number 237.

Additionally, due to the structure addition at Crane Creek, current structure numbers will be changed. Starting at 378-101, each structure number will be shifted up one. 378-101 is now 378-102, 378-102 is now 378-103, etc. This is for all structures from Crane Creek to the Tande terminal.

Please see the attached table and figures showing the adjusted structure locations and notarized Certification that Basin Electric Power Cooperative will comply with the Commissioner's order, law and rules designating the corridor and route.

If you have any questions or require additional information for this submittal, please contact me at edukart@bepec.com or 701-557-5557.

Sincerely,

Erin Fox Dukart
Director, Environmental Services
