6 I am a Senior Consultant with the Economic and Management Consultant Firm of Α. 7 PCMG and Associates, LLC. (PCMG). In my capacity as a Senior Consultant, I 8 am responsible for evaluating and examining rate and rate-related proceedings 9 before various governmental entities, preparing expert testimony and reviewing 10 and making recommendations concerning revenue requirement proposals, as well 11 as offering opinions on economic policy and policy issues and methodologies used 12 to set a value on a utility's rate base and cost of service components of revenue 13 requirements.

#### 14 Q. PLEASE SUMMARIZE YOUR PROFESSIONAL EXPERIENCE?

Α. PCMG is an association of experts in the area of utility regulation and policy, economics, accounting, and finance. PCMG's members have over 75 years of collective experience providing assistance to counsel and expert testimony regarding the regulation of electric, gas, water and wastewater utilities that operate under local, state, and federal jurisdictions. PCMG focuses on areas regarding revenue requirement, cost of service, rate design, cost of capital and rate of return. We provide overall analyses on various ratemaking concepts as well as a review of public utility accounting methods used by various public utilities and State commissions. We also evaluate the reasonableness of costs and investments that are used to set rates and measure the value of rate base, whether these costs are prudent, used and useful, and known and measurable in utility operations. Prior to my association with PCMG, I was employed as a Senior Consultant with the consulting firm of Snavely-King Majoros and Associates (SKM) from 2013 to 2015 in the same capacity as PCMG. Prior to SKM, I was employed by the New Jersey Board of Public Utilities (NJBPU or BPU or Board) from 1983 to my retirement in

2011. During my tenure at the NJBPU, I held various Accounting, Auditing, Rate Analyst, Supervisory and Management positions. My last position was Bureau Chief of Rates in the Agency's Water Division. I held this position for nearly 10 years. My CV is attached as Appendix A.

# 5 Q. WHAT EXPERIENCE DO YOU HAVE IN THE AREA OF UTILITY RATE 6 SETTING PROCEEDINGS AND OTHER REGULATORY AND UTILITY 7 MATTERS?

Α.

In my capacity as Bureau Chief of Rates, I was responsible for managing, assigning, directing, and overseeing the rate process regarding the administrative, financial, and managerial functions of the Rates Bureau. My primary duties were to ensure that the utilities had sufficient revenues to cover their operating expenses, while ensuring that those expenses were reasonable, prudent, known and measurable in providing service and benefits to customers, and were in accordance with Board policies, regulatory standards, and prior rate orders. I also was responsible for ensuring that the utilities had the opportunity to earn a reasonable return on their plant investments, including the ability to provide safe, adequate, and proper service at reasonable rates. During my time at the NJBPU, I was involved in hundreds of rate and rate-related proceedings that were resolved either through settlement or through fully-litigated proceedings. In my capacity as a Senior Consultant, I was involved or am currently involved in rate and rateproceedings before Commissions in the Commonwealths related Massachusetts and Pennsylvania, and the States of Arkansas, Georgia, Hawaii, Maine, Maryland, New Jersey, New York, North Dakota, Wyoming and Ohio. I was involved in the Generic Proceedings to Establish Parameters for the Next Generation Performance Based Rate Plans before the Alberta Utilities Commission. I have been or am currently involved in matters before the Federal Energy Regulatory Commission ("FERC") regarding transmission formula rate plans.

#### Q. WHAT IS YOUR EDUCATIONAL BACKGROUND?

- 1 A. I hold a Master of Business Administration ("MBA") degree with a concentration in 2 Strategic Management from Pace University – Lubin School of Business in New 3 York City, New York. I hold a Master of Public Administration ("MPA") degree from 4 Kean University in Union, New Jersey. I hold a Bachelor of Science ("BS") degree 5 in Accounting from Saint Peter's University in Jersey City, New Jersey.
- 6 Q. ON WHOSE BEHALF ARE YOUR TESTIFYING?
- 7 **A.** I am testifying on behalf of the Advocacy Staff of the North Dakota Public Service Commission (NDPSC).
- 9 II. PURPOSE OF TESTIMONY
- 10 Q. WHAT IS THE PURPOSE OF YOUR TESTIMONY?
- The purpose of my testimony is to evaluate and make a revenue requirement 11 Α. recommendation regarding Northern States Power Company's (NSP or Company) 12 electric base rate case proceeding filed with the North Dakota Public Service 13 Commission (NDPSC or Commission), on December 2, 2024, in Case No. PU-24-14 My overall revenue requirement recommendations are based upon the 15 Company's proposed test year period ending December 31, 2025. The Company 16 has proposed an overall annual revenue requirement increase of \$44,556,000 or 17 19.34% over current retail rate revenues of \$230,375,000. Incorporated into my 18 19 testimony. I have presented findings with respect to the Company's test year rate base, revenues, operating expenses and net income at present rate revenues. I 20 have incorporated and am relying on the recommendations of Ms. Maureen Reno 21 for cost of capital and return on equity, and Dr. Karl Pavlovic for cost of service 22 and rate design and depreciation expenses that may affect my revenue 23 24 requirement.
- 25 Q. HAVE YOU REVIEWED AND EXAMINED THE COMPANY'S TESTIMONY AND ACCOMPANYING EXHIBITS IN THIS PROCEEDING?
- Yes. I have reviewed NSP's testimony, statements and exhibits, and have also reviewed and relied on the responses to data requests propounded by Advocacy Staff and PCMG.

#### 1 Q. HAVE YOU PREPARED SCHEDULES TO ACCOMPANY YOUR TESTIMONY?

2 A. Yes. I have prepared Schedules DM-1 through DM-24.

#### 3 Q. PLEASE SUMMARIZE THE RATE RELIEF PROPOSED BY NSP.

4 A. As previously indicated above, the Company filed an application for an increase in electric service on December 2, 2024, requesting an increase in base distribution 5 rates in the amount of \$44,556,000 or 19.34% above current rates.1 The revenue 6 requirement is predicated upon a future test year ending December 31, 2025, 7 8 (Exhibit BCH-1 Schedule 7) which include an overall rate of return of 7.56% and a 9 common equity component of 10.30%. The Company has computed an average rate base balance of \$816,976,000 based upon average balances of plant 10 11 investments. The Company's last base rate case was approved in November 2020 12 by the Commission in Case No. PU-20-441.

## 13 Q. HOW DID THE COMPANY COMPUTE ITS PROPOSED REVENUE 14 REQUIREMENT INCREASE OF \$44,556,000?

The Company has computed its proposed revenue requirement increase by including all revenues and costs at the proposed capital structure, as well as any federal and state credits earned on a total company basis, and then allocating those components to North Dakota based upon the allocation methods as discussion in Company witness Mr. Halama's testimony (BCH-1 at 3). This produced an all-in revenue requirement for the jurisdiction. Rider projects were removed from the base rate request to ensure that there were no double recovery of costs. (BCH-1 at 3). The Company multiplied its proposed average rate base balance of \$816,976,000 by the proposed rate of return of 7.56% to arrive at a proposed Operating Income requirement of \$61,763,000. The Company then subtracted its Operating Income at present rates of \$28,081,000 to arrive at an income deficiency of \$33,682,000.<sup>2</sup> The Company then multiplied this amount by

25

26

Α.

<sup>&</sup>lt;sup>1</sup> On January 8, 2025, the Commission approved an interim rate increase for the Company's electric service of \$27,371,168 or 11.88% over current rates.

<sup>&</sup>lt;sup>2</sup> Company Exhibit BCH-1 Schedule 7 page 1.

| 1      |    | its revenue conversion factor of 1.32284 to arrive at its revenue requirement                                      |
|--------|----|--|
| 2      |    | increase proposal of \$44,556,000.   |
| 3      |    |  |
| 4<br>5 | Q. | HAVE YOU ACCEPTED THE COMPANY'S PROPOSED TEST YEAR ENDING DECEMBER 31, 2025?                                       |
| 6      | A. | Yes.   |
| 7<br>8 | Q. | HAS THE COMPANY UPDATED ITS PROPOSED REVENUE REQUIREMENT INCREASE SUBSEQUENT TO THE DECEMBER 2, 2024, FILING DATE? |
| 9      | A. | Yes. On May 9, 2025, the Company provided supplemental testimony related to  |
| 10     |    | the Earnings Sharing Mechanism Issues (BCH-2) and Resource Prudence Issues   |
| 11     |    | (CJS-2). With respect to the Earnings Sharing Mechanism the Company  |
| 12     |    | addressed the refund due to customers to the earnings share mechanism agreed                                       |
| 13     |    | to in settling the prior rate case. (Halama testimony BCH-2 page 1). With respect                                  |
| 14     |    | to Resource Prudence Issues the Company addressed the prudence of actual   |
| 15     |    | expenses associated with constructing and acquiring the resources in the   |
| 16     |    | Company's Wind Repowering Portfolio, Docket No. PU-20-425 and the Dakota   |
| 17     |    | Range Docket No. PU-17-372. In both of the prior cases the Company entered   |
| 18     |    | into a settlement with PUC Staff that deemed the resource additions prudent up to                                  |
| 19     |    | an established threshold and reserved for further Commission review the prudence                                   |
| 20     |    | of any costs that exceeded that threshold. (Shaw testimony (CJS-2 page 1).   |
| 21     | Q. | HAS THE COMPANY'S SUPPLEMENTAL TESTIMONY HAVE ANY EFFECT   |

- 22 ON THE REVENUE REQUIREMENT INCREASE PROPOSED?
- 23 Α. No. The Company did not provide any updated revenue requirement schedules.
- PLEASE SUMMARIZE YOUR FINDING AND RECOMMENDATIONS. 24 Q.
- Based upon the use of the Company's test year period ending December 31, 2025, 25 Α. I have the following recommendations: 26
- 27 1. My recommended rate base balance is \$794,953,356, which is \$22,022,644 28 lower than the Company's proposed rate base balance of \$816,976,000.

| YOUR RATE BASE ADJUSTMENTS AND FOR THE OPERATING EXPIRATION ADJUSMENTS?  A. My major Revenue Requirement impacts to the Rate Base and Operating In adjustments are as follows and includes the flow through of Federal and Income Taxes:  Rate Base Adjustments:  Disallowance of certain Electric Plant of \$22,022,644 – Revenue In reduction of \$2,202,412.  Return on Equity adjustment (from Company's proposed of 10.3 Advocacy recommended 9.41% - Revenue reduction impacts,057,810.  Total Rate Base Revenue reduction Impact - \$7,260,222.  Operating Income Adjustments:  Normalization of certain Operating Expenses with variances > 1. disallowance of (\$1,945,201).  Disallowance of Inflation Related adjustments embedded in | 1<br>2<br>3<br>4<br>5<br>6<br>7<br>8 |    | <ol> <li>My rate of return is based upon the recommendation of Ms. Reno, which recommends an overall return of 6.97%, which includes a common equity component of 9.41%.</li> <li>My recommended operating revenues at present rates is \$230,375,000, which is equal to the Company's operating retail revenues at present rates of \$230,375,000.<sup>3</sup></li> <li>My overall revenue requirement increase, based upon an overall rate of return of 6.97%, is \$29,586,245 or 12.84%; this is \$14,970,162 lower than the Company's overall revenue requirement increase of \$44,556,000 or 19.34%.</li> </ol> |

(Pavlovic Testimony).  Dr. Pavlovic has recommended that the Company apply this 1CP demand allocator  |  |  |
| 15<br>16<br>17<br>18<br>19<br>20<br>21<br>22<br>23<br>24 | A.<br>Q. | JURISDICTIONAL ALLOCATION OF TRANSMISSION?  As more fully discussed in Dr. Pavlovic's testimony, the Company uses a 12 Coincident Peak (12CP) demand to allocate its transmission plant and operating expenses to its North Dakota, South Dakota and Minnesota jurisdictions. (Pavlovic Testimony).  WHAT HAS DR. PAVLOVIC RECOMMENDED?  Dr. Pavlovic has recommended the use of 1 Coincident Peak (ICP) demand allocator for jurisdictional allocation of transmission costs. (Pavlovic Testimony).  Dr. Pavlovic has recommended that the Company apply this 1CP demand allocator it its rebuttal testimony and provide the excel file workpapers. (Pavlovic |  |  |

| 1<br>2<br>3 | A. | No. As stated in Dr. Pavlovic's testimony, the Company should prepare the revenue requirement impact when filing its rebuttal testimony and provide the excel file workpapers supporting the use of a 1CP demand allocator (Pavlovic |
|-------------|----|--|
| 4           |    | Testimony).  |
| 5           | Q. | HOW IS THE REMAINDER OF YOUR TESTIMONY ORGANIZED?  |
| 6           | A. | The remainder of my testimony is organized by documenting and explaining   |
| 7           |    | adjustments to various rate base components and net operating income   |
| 8           |    | components to arrive at my recommended revenue requirement decrease.   |
| 9<br>10     | Q. | ARE YOU ACCEPTING ANY OF THE COMPANY'S PROPOSED RATE BASE BALANCE AND OPERATING INCOME ADJUSMENTS?   |
| 11          | A. | Yes. I am accepting certain of the Company's Rate Base balances and certain of   |
| 12          |    | the Company's Operating Income adjustments. These adjustments are not  |
| 13          |    | identified in my testimony but are identified in my revenue requirement schedules.   |
| 14          |    | My testimony reflects the areas of disagreement from that of the Company and the   |
| 15          |    | affect these adjustments have on rates.  |
| 16          |    |  |
| 17          |    | III. Cost of Capital   |
| 18<br>19    | Q. | WHAT HAS THE COMPANY PROPOSED WITH RESPECT TO ITS COST OF CAPITAL?   |
| 20          | Α. | The Company has proposed an overall Cost of Capital of 7.56%. The breakdown  |
| 21          |    | of this return is based upon a long-term debt rate of 4.5092%, a short-term debt   |
| 22          |    | rate of 5.310% and a common equity component of 10.30%. (WP Volume 3 VI  |
| 23          |    | C1. Cost of Capital page 2 of 2).  |
| 24          | Q. | WHAT IS YOUR RECOMMENDED COST OF CAPITAL?  |
| 25          | A. | As per Advocacy Staff witness Ms. Reno's recommendation, I am incorporating  |
| 26          |    | an overall cost of capital of 6.97% which includes a common equity component of  |
| 27          |    | 9.41%. This is shown on Schedule DM-2, and on Ms. Reno's Summary Table   |
| 28          |    | WACC.  |

29

costs are included in the Company's plant balances related to the roll-in of

transmission projects for the Company's major line rebuild and refurbishment programs and the Bayfield Loop and Huntley Wilmarth projects. (BCH-1 page 7-8). Mr. Halama included capital costs related to distribution capital projects related to expansion of the Company's distribution asset health programs for pole and underground cable replacements. (BCH-1 page 8). Mr. Halama stated that the 2025 test year period includes cost related to the Advanced Grid Intelligence and Security (AGIS) capital and deferred costs for new meters and communication infrastructure. (BCH-1 page 8). Finally, Mr. Halama stated that the 2025 test year includes general and intangible costs for service centers, fleet and increasing technology and cyber security initiatives. (BCH-1 page 9).

# 11 Q. HOW DOES THE COMPANY ALLOCATE ITS ELECTRIC PLANT IN SERVICE 12 BALANCE FROM THAT OF THE PARENT COMPANY – XCEL ENERGY AND 13 NORTHERN STATES POWER COMPANY?

The Company allocates its Electric Plant in Service (EPIS) balance using jurisdictional allocations and assigning or allocating to the Service Company pursuant to the Utility Services agreement between the Service Company and the Company. (BCH-1 page 38). Mr. Halama stated that the cost allocation and assignment principles have not changed since the Company's last electric rate case and are consistent with the Company's recent Minnesota electric rate case filed on November 1, 2024, with the Minnesota Public Utilities Commission (Docket No. E002/GR-24-320) (BCH-1 page 39). Additional information regarding the allocation process is reflected in BCH-1 Schedule 14 (Cost Assignment and Allocation Manual – CAAM). (BCH-1 page 39). The allocation factors used to allocate capital related items to the North Dakota jurisdictional electric operations income statement and rate base are included in Company filing Volume 3, Section VII. Budget Allocations workpaper B3. The 2025 allocation factors are as follows:

Demand 6.0519% Energy 6.4219% Customers 6.0795%

Α.

- 1 Q. DO YOU HAVE ANY CHANGES OR ADJUSTMENTS TO THE COMPANY'S ALLOCATIONS FACTORS USED IN THE DEVELOPMENT OF THE COMPANY'S REVENUE REQUIREMENT?
- 4 A. No. I am accepting the Company's proposed allocation factors that were used in the development of the Company's revenue requirement proposal.
- 6 Q. DO YOU HAVE ANY ADJUSMENTS WITH RESPECT TO THE COMPANY'S
  7 EPIS BALANCE OF \$1,778,568,000? PLEASE SUMMARIZE YOUR
  8 ADJUSTMENTS.
- 9 A. Yes. I have several adjustments to the Company's EPIS balance for the 2025 test10 year period.
- 11 Q. WHAT HAS THE COMPANY PROPOSED WITH RESPECT TO ITS DISTRIBUTION CAPITAL ADDITIONS?
- 13 The Company has included capital additions of \$73.1 million related to Asset Α. Health, AGIS, Wildfire and New Business categories including purchases of 14 15 reserve transformers. (MPM-1 page 19). Mr. Moeller stated that the LINE Convert Larimore LAR 4kV project at a cost of \$8.1 million in 2024 included the equipment 16 and labor required for the conversion of 4kV electric distribution lines served from 17 18 the 69-4kV Larimore Station in Larimore, North Dakota to 12.5 kV electric distribution lines served from the new Turtle River Substation in Larimore, North 19 20 Dakota, which is an addition. (MPM-1 page 1). The LINE Convert North Broadway NBY 4 kV project is \$4.6 million that was undertaken from 2022 to 2025 and 21 22 included the equipment and labor required for the conversion of 4 kV electric distribution lines served from the 23.9-4kV North Broadway in Fargo, North Dakota 23 to 23.9 kV electric distribution lines served from the 115.23.9 kV Red River 24 25 Substation in Fargo, North Dakota. (MPM-1 page 19-20).
- 26 <u>Larimore Station</u> NDPSC Set- 8-14
- In response to Set 8-14 the Company provided information related to its Larimore Substation. The Company stated that the in-service date for this project at the time of the July 2024 budget was December 15, 2025. The current in-service projection is now August 30, 2026. Given this update, I recommend disallowing these costs

| 1 | because the in-service date of August 30, 2026, is beyond the Company's test    |
|---|---|
| 2 | year period of December 31, 2025. The total cost of this project is provided in |
| 3 | Company response to Set 8-14 Attachment B in the amount of \$13,134,431. My     |
| 4 | recommendation is shown on my Schedule DM-5.                                    |

5

6

AGIS – Private LTE Wireless Network Set 8-67

## 7 Q. WHAT HAS THE COMPANY PROVIDED RELATED TO ITS PRIVATE LTE 8 WIRELESS NETWORK?

9 The Company proposed developing a private LTE wireless network, which will be Α. developed in stages over the next 10-12 years. (Company Set 8-67). The private 10 11 wireless network will be deployed in 27 counties across the Company's four 12 operating companies. The Company anticipates that the initiative will be in-service 13 in North Dakota in the 2028 timeframe. The initial phase of these costs included 14 in the rate case is \$2,578,170. These costs are related to cellular software, hardware and cellular spectrum. The Company stated that the reason for 15 implementing the private wireless network is to ensure secure, safe and reliable 16 service to customers. The O&M benefits of this initiative are outside this rate case 17 18 and will be adjusted in a future rate case.

#### 19 Q. WHAT ADJUSTMENTS DO YOU HAVE?

- 20 **A.** Given that these costs will not be implemented for full service and operability, I am recommending disallowance of these costs in the amount of \$2,578,170. The Company's test year period is year-end December 21, 2025. The Company's implementation of this initiative is in 2028, well beyond the test year period. Additionally, there are no offsetting O&M expense benefits or savings attached to this initiative. It is premature to include these costs in rates until full operability. My recommendation is shown on my Schedule DM-5.
- 27 Q. WHAT HAS THE COMPANY INCLUDED WITH RESPECT TO MITIGATION OF WILDFIRES?

Mr. Moeller stated that the Company (Xcel Energy) is working to mitigate wildfires 1 Α. 2 risks across all the states in which its operating utilities provide service including 3 North Dakota. The Company's wildfire policy initiatives are a fundamental part of providing safe, reliable and affordable electric utility service and the Company has 4 forecasted \$5.1 million in this proceeding to address wildfire risk in North Dakota. 5 (MPM-1 page 20). In response to Company Set 8-57, the Company included 6 7 approximately \$5.790 million of costs related to the Company's initiatives to 8 address wildfire risk in North Dakota. (WFRM Pole Replacement of \$396,465; WFRM Equipment Upgrade of \$201,379 and WFRM Wildfire Safety Set of 9 10 \$5,191,814).

#### 11 Q. WHAT ADJUSTMENTS DO YOU HAVE?

12 **A.** I reviewed the Company's Wildfire Mitigation Plan (Set 8-057 Attachment A). Given the nature and extent of wildfire that has continue to evolve throughout the United States, I am recommending that the Company recover these costs in rates that will benefit ratepayers by reducing wildfire risk threats.

## 16 Q. WHAT HAS THE COMPANY INCLUDED WITH RESPECT TO ITS NUCLEAR CAPITAL IN 2024-2025?

18 Mr. Moeller stated that the Company forecasted \$29.2 million in 2024 and \$19.3 Α. million in 2025 for dry fuel loading at Prairie Island. For mandated compliance, 19 reliability, improvement and facilities projects across the nuclear fleet, the 20 21 Company is forecasting \$158.2 million in 2024 and \$121.2 million in 2025. (MPM-1 page 20). These costs include 2024 baffle former bolt and clevis bolt 22 replacements at Prairie Island and the permanent reservoir installation at 23 Monticello. (MPM-1 page 21). Regarding dry cask storage, the Company relies 24 on safe on-site storage of spent fuel as the Federal government's Yucca Mountain 25 storage is on hold for the foreseeable future and no apparent permanent storage 26 is available. The Company continues to invest in new casks and associated 27 infrastructure. (ADK-1 page 14). With respect to Baffle Former Bolt Replacement, 28 29 which are used to hold horizontal supports for the cores at both Prairie Island Units, these need to be replaced based upon the age of the bolts and to avoid the need 30

for additional inspections or replacements through the end of the current nuclear license period. (ADK-1 page 14). With respect to Groundwater projects the Company discovered a leak of tritiated water at the Monticello unit and needed to address the issue. The Company replaced the water pipe and two additional pipes in a similar position. Although the Company confirmed this did not cause any health issues, it was replaced and tritiated water is declining. (ADK-1 page 15).

#### 7 Q. WHAT ADJUSTMENTS DO YOU HAVE?

A. I am accepting the Company's costs related to the Dry Cask Storage, Baffle-Former Bolt Replacement and Groundwater Projects. These costs were placed in service beginning June of 2021 through December 2024 and identified in response to CONFIDENTIAL Attachment to Set 8-017.

## 12 Q. WHAT DID MR. MOELLER STATE REGARDING CAPITAL ADDITIONS FOR PEAKING PLANTS AND BATTERY STORAGE?

Mr. Moeller stated that the Company has budgeted \$103.4 million in 2025 for 14 Α. peaking plant Blue Lake units 9-11, replacing the entire Blue Lake Unit 3 capacity 15 with new reciprocating internal combustion engine generator (RICE) capacity. 16 17 (MPM-1 page 17). Regarding battery storage, the Sherco Long Duration Battery pilot project is a 10 MW battery capable of discharging for 100 hours (1,000 MW 18 hours) and will demonstrate the capacity of new battery technology and potentially 19 lead to larger scale projects. (MPM-1 page 18). The Company has forecasted 20 21 (BEGIN CONFIDENTIAL) (END CONFIDENTIAL) for this project. This project will receive a Department of Energy grant and has a contingent 22 commitment from Breakthrough Energy Catalyst for a grant in 2026 after 23 completion, which could reduce the overall cost by more that 70 percent. (MPM-1 24 page 18). The Company has included a balance of (BEGIN CONFIDENTIAL) 25 (END CONFIDENTIAL) to its regulatory amortization as shown on 26 27 Company Exhibit BCH-1 Schedule 5.

#### Q. WHAT ADJUSTMENTS DO YOU HAVE?

28

- A. As more fully explained in my Regulatory Amortization section of my testimony, I am recommending disallowance of the costs related to the Sherco Long-Term Duration Battery project given that the Company withdrew this project due to delay in implementation (Set 20-1). This reduces the UPIS balance by (BEGIN CONFIDENTIAL) (END CONFIDENTIAL) and is shown on my Schedule DM-5.
- 7 Q. WHAT ARE YOUR TOTAL ADJUSTMENTS TO THE COMPANY'S EPIS 8 BALANCE?
- 9 **A.** My adjustments reflect a total disallowance of \$17,738,581 and is shown on my Schedule DM-5.

11

12

#### B. Accumulated Depreciation

## 13 Q. WHAT HAS THE COMPANY PROPOSED WITH RESPECT TO ACCUMULATED 14 DEPRECIATION?

- In the same manner as the Company developed its EPIS balance, the Company 15 Α. performed the same analysis with respect to its Accumulated Depreciation or 16 Depreciation Reserve amount by averaging the beginning and ending test-year 17 18 balances. The Company proposed an average depreciation reserve balance of \$810.710 million as shown on Company Exhibit BCH-1 Schedule 5. The Company 19 then adjusted the Production and General Assets (remaining lives), the Production 20 and Transmission Riders, Transmission, Distribution and General and Common 21 changes to the Depreciation Study, and Precedential adjustments totaling a 22 The Company's proposed updated Accumulated 23 decrease of \$475,000. Depreciation balance is calculated at \$810.234 million (Company Exhibit BCH-1 24 25 Schedule 5).
- 26 Q. DO YOU HAVE ANY ADJUSMENTS WITH THE WAY THE COMPANY DEVELOPED ITS ACCUMULATED DEPRECIATION BALANCE?
- 28 **A.** Yes. In response to Data Request Set 8-31, the Company objected to this request 29 as being overly broad and unduly burdensome as it would require the Company to

| 1<br>2<br>3<br>4   |          | review records dating back decades to determine historical depreciation rates. Given this objection, my adjustments reflect estimations and approximations related to my accumulated depreciation adjustments to the Company's EPIS balance.   |
|--|----------|--|
| 5<br>6<br>7  | Q.       | WHAT HAS THE COMPANY PROPOSED WITH RESPECT TO ITS DEPRECIATION EXPENSE, WHICH AFFECTS THE ACCUMULATED DEPRECIATION IN THE TEST YEAR PERIOD 2025?   |
| 8  | A.       | Mr. Moeller stated that he has proposed several changes affecting depreciation   |
| 9  |          | expense for production assets resulting from changing the remaining lives and  |
| 10   |          | updating the dismantling cost that is the basis of the negative salvage value. For   |
| 11   |          | transmission, distribution, general and intangible assets, he has proposed   |
| 12   |          | changes to the average remaining life depreciation rates based upon the  |
| 13   |          | underlying changes to the average service life retirement curves and net salvage   |
| 14   |          | value. (MPM-1 page 22-23).   |
|  |          |  |
| 15<br>16   | Q.       | WHAT ARE THE SPECIFIC ADJUSTMENTS MR. MOELLER HAS MADE WITH RESPECT TO THE CHANGE IN DEPRECIATION EXPENSE?   |
|  | Q.<br>A. |  |
| 16   | -        | RESPECT TO THE CHANGE IN DEPRECIATION EXPENSE?   |
| 16<br>17   | -        | RESPECT TO THE CHANGE IN DEPRECIATION EXPENSE?  Mr. Moeller made adjustments to the following assets:  |
| 16<br>17<br>18   | -        | RESPECT TO THE CHANGE IN DEPRECIATION EXPENSE?  Mr. Moeller made adjustments to the following assets:  Steam Production – Shortening the remaining lives of Allen S. King, Sherco Unit 1   |
| 16<br>17<br>18<br>19                                     | -        | RESPECT TO THE CHANGE IN DEPRECIATION EXPENSE?  Mr. Moeller made adjustments to the following assets:  Steam Production – Shortening the remaining lives of Allen S. King, Sherco Unit 1 and 3, retirement of Sherco Unit 2 and increasing the negative net salvage rates  |
| 16<br>17<br>18<br>19<br>20                               | -        | RESPECT TO THE CHANGE IN DEPRECIATION EXPENSE?  Mr. Moeller made adjustments to the following assets:  Steam Production – Shortening the remaining lives of Allen S. King, Sherco Unit 1 and 3, retirement of Sherco Unit 2 and increasing the negative net salvage rates for all Steam Production plants;   |
| 16<br>17<br>18<br>19<br>20<br>21                         | -        | RESPECT TO THE CHANGE IN DEPRECIATION EXPENSE?  Mr. Moeller made adjustments to the following assets:  Steam Production – Shortening the remaining lives of Allen S. King, Sherco Unit 1 and 3, retirement of Sherco Unit 2 and increasing the negative net salvage rates for all Steam Production plants;  Nuclear Production – 10-year life extension of Monticello;   |
| 16<br>17<br>18<br>19<br>20<br>21                         | -        | RESPECT TO THE CHANGE IN DEPRECIATION EXPENSE?  Mr. Moeller made adjustments to the following assets:  Steam Production – Shortening the remaining lives of Allen S. King, Sherco Unit 1 and 3, retirement of Sherco Unit 2 and increasing the negative net salvage rates for all Steam Production plants;  Nuclear Production – 10-year life extension of Monticello;  Other Production – Extending the life of ten wind farms from 25 to 35 years;   |
| 16<br>117<br>118<br>119<br>220<br>221<br>222<br>23       | -        | RESPECT TO THE CHANGE IN DEPRECIATION EXPENSE?  Mr. Moeller made adjustments to the following assets:  Steam Production – Shortening the remaining lives of Allen S. King, Sherco Unit 1 and 3, retirement of Sherco Unit 2 and increasing the negative net salvage rates for all Steam Production plants;  Nuclear Production – 10-year life extension of Monticello;  Other Production – Extending the life of ten wind farms from 25 to 35 years;  Transmission, Distribution, General and Intangible (TD&G) – Updating new   |
| 16<br>117<br>118<br>119<br>220<br>221<br>222<br>23<br>24 | -        | RESPECT TO THE CHANGE IN DEPRECIATION EXPENSE?  Mr. Moeller made adjustments to the following assets:  Steam Production – Shortening the remaining lives of Allen S. King, Sherco Unit 1 and 3, retirement of Sherco Unit 2 and increasing the negative net salvage rates for all Steam Production plants;  Nuclear Production – 10-year life extension of Monticello;  Other Production – Extending the life of ten wind farms from 25 to 35 years;  Transmission, Distribution, General and Intangible (TD&G) – Updating new average service lives, retirement curves, net salvage rates, and depreciation rates |

| 1           |    | Table 2 (page 25) and Table 3 on page 32 of Mr. Moeller's testimony reflects the   |
|-------------|----|--|
| 2           |    | summary breakdown of the depreciation expense and remaining lives,   |
| 3           |    | respectively.  |
| 4           |    |  |
| 5<br>6<br>7 | Q. | WHAT ADJUSTMENTS TO THE COMPANY'S ACCUMULATED DEPRECIATION BALANCE DO YOU HAVE REGARDING YOUR ADJUSTMENTS TO THE COMPANY'S EPIS BALANCE? |
| 8           | A. | As stated in response to Set 20-1, the Company has removed the UPIS  |
| 9           |    | Investment related to its Sherco Battery Investment. The associated Accumulated  |
| 10          |    | Depreciation Expense is (BEGIN CONFIDENTIAL) (END  |
| 11          |    | <b>CONFIDENTIAL).</b> I reflect this adjustment which is shown on my Schedule DM-6.  |
| 12          |    | Given that I adjusted the Company's Larimore Station, the Sherco Battery Pilot   |
| 13          |    | Program and the LTE wireless Private Network, I am making the associated   |
| 14          |    | adjustments related to the accumulated depreciation balance. My adjustment is  |
| 15          |    | \$698,051 (BEGIN CONFIDENTIAL)   |
| 16          |    |  |
| 17          |    | (END CONFIDENTIAL). With respect to the  |
| 18          |    | Company's adjustments to its various remaining lives of its production assets and  |
| 19          |    | the updates to its TD&G assets, and as fully discussed in Dr. Pavlovic's testimony   |
| 20          |    | it is unclear from the data and evidence in the record how the Company made the  |
| 21          |    | adjustments to its various Depreciation Expense changes. The Company should  |
| 22          |    | provide the data and information in its rebuttal testimony. As of now, I am including  |
| 23          |    | the Company's various proposed Depreciation Expense adjustments. I reserve my  |
| 24          |    | right to update my testimony to amend my revenue requirement recommendation  |
| 25          |    | once the Company has provided the information. Dr. Pavlovic will provide his   |
| 26          |    | recommendation and overview with respect to the Company's proposed   |
| 27          |    | Depreciation adjustments. My adjustment is shown on my Schedule DM-6.  |
| 28          |    | C. Accumulated Deferred Income Taxes (ADIT)  |
| 20          | 0  | WHAT HAS THE COMPANY PROPOSED REGARDING ITS ACCUMULATED  |

**DEFERRED INCOME TAXES?** 

30

1 Α. The Company has proposed an ADIT balance of \$150,287,000 as shown on 2 Exhibit BCH-1 Revised Schedule 10. Mr. Halama stated that inter-period differences exist between book and taxable income treatment of certain accounting 3 transactions, and these differences typically originate in one period and reverse in 4 5 one or more subsequent periods. (BCH-1 page 24). The largest difference 6 typically is the extent to which accelerated income tax depreciation exceeds book 7 depreciation during the early years of an asset's service life. The ADIT represents 8 the cumulative net deferred tax amounts that have been allowed and recovered in 9 previous periods. (BCH-1 page 24).

#### 10 Q. HOW DID THE COMPANY ARRIVE AT THE TEST YEAR BALANCE 2025?

- As shown on Company Exhibit BCH-1 Schedule 5 and in response to NDPSC-8-11 Α. 38, the Company began with an unadjusted test year balance of \$196,604,116 and 12 made adjustments to the deferred tax asset (DTA) - Net Operating Loss average 13 balance of (\$31,603), DTA State Tax Credit of (\$40,042) and DTA Federal Tax 14 15 Credit (\$46,245,091) to arrive at a Test Year balance of \$150,287,380.4 Mr. 16 Halama stated that this amount represents the simple average of the projected beginning and ending test year ADIT balance and complies with Internal Revenue 17 Service (IRS) tax regulations. Mr. Halama stated that Sec. 1.167(I) of the tax code 18 19 defines a pro-rated schedule for the extent average accumulated deferred income 20 taxes can reduce rate base to comply with the tax normalization requirements of 21 the Code when forecast information is used in setting rates. (BCH-1 page 24-25).
- 22 Q. HAS THE COMPANY PROVIDED THE DEVELOPMENT OF THE 23 ADJUSTMENTS WITH RESPECT TO EACH COMPONENT OF ITS ADIT 24 BALANCES?
- A. No. According to the Company, it utilizes the Utilities International Regulatory Information System to develop the cost of service models and testimony schedules; therefore, some live excel model versions of schedules are not

<sup>&</sup>lt;sup>4</sup> See also workpaper Volume 3 III P1-1 Summary Test year 2025.

| 1 | available. (Data Response 8-38 and 12-1). The information is system generated |
|---|---|
| 2 | in a black box without workpapers or underlying formulae.                     |

#### 3 Q. WHAT IS YOUR RESPONSE?

29

- The Company is responsible for supporting its revenue requirement increase with 4 Α. sufficient information and evidence so that the parties to the proceeding can 5 properly evaluate the adjustments, analyze the data and provide a full and 6 7 complete review of the filing and the related quantitative information. This is not a valid reason for the Company to assert. The Company has paid for this service 8 and thus has access to the products and services that were used to develop the 9 10 revenue requirement increase. Without the backup workpapers in excel format it 11 would be nearly impossible to determine how the calculations were made and 12 generated in the development of the revenue requirement.
- 13 Q. DO YOU HAVE ANY ADJUSTMENTS REGARDING THE COMPANY'S
  14 METHODOLOGY ON THE DEVELOPMENT OF ITS ADIT?
- As stated above, I am unable to evaluate the methodology used by the Company with respect to its ADIT balance and the related adjustments. My adjustments are my best estimations and approximations with the information provided by the Company.
- 19 Q. WHAT SPECIFIC ADJUSTMENTS DO YOU HAVE REGARDING YOUR 20 ADJUSTMENTS TO THE COMPANY'S EPIS BALANCE?
- A. Given that I adjusted certain EPIS balances, I am making the associated (estimations and approximations) adjustments related to the Company's ADIT balance. These adjustments reflect the flow through of my adjustments related to my changes to the Company's EPIS balance and Accumulated Depreciation. My adjustments reflect (BEGIN CONFIDENTIAL)

26 27

28 (END CONFIDENTIAL) as stated in response to Set 20-1.

My total adjustment is (\$1,237,958). I utilized the Company's Composite Tax Rate

of 24.40% for purposes of my adjustments.<sup>5</sup> My adjustments are shown on Schedule DM-7.

#### D. Construction Work in Progress (CWIP)

#### 4 Q. WHAT HAS THE COMPANY PROPOSED WITH RESPECT TO CWIP?

As shown on Company Exhibit BCH-1 Schedule 3, the Company has proposed a CWIP balance of \$4,772,000. According to Mr. Halama CWIP balances included in rate base are short-duration projects (any capital project that is deemed routine and finishes work within a month) that do not accrue Allowance for Funds Used During Construction (AFUDC). (BCH-1 page 23). The rate base balance of CWIP reflects a simple average of projected short-term CWIP beginning and ending test year balances. The simple average was calculated using the June 30, 2024, actual CWIP balance. Mr. Halama stated that construction expenditures and transfers to plant-in-service during the remaining months of 2024 were netted against the June 30, 2024, balance to derive a beginning test year balance. The beginning test year CWIP was adjusted to reflect projected construction expenditures and transfers to plant in service during the 2025 test year to obtain the ending test year CWIP balance. (BCH-1 page 23). In response to Set 4-12, the Company stated that in order for short-term CWIP to be included in rate base, the Company identifies discrete projects which are less than 30 days in duration and therefore not eligible for AFUDC. The Company takes the discrete projects as a percentage of all CWIP projects by functional class and applies that percentage to the CWIP balance to determine the overall short-term CWIP.

#### Q. WHAT IS YOUR RECOMMENDATION?

24 **A.** The Company should update its CWIP balance given that these expenditures are short-term in nature (within a month). I am disallowing the balance of the CWIP of \$4,772,000 for now, but request that the Company update its projections related

<sup>&</sup>lt;sup>5</sup> Workpaper Volume 3 V 08. State and Federal Income Tax

to CWIP as well as the breakdown of these CWIP balances associated with certain short-term plant projects. My adjustment is shown on my Schedule DM-3.

3

1

4

5

#### E. Cash Working Capital (CWC)

## 6 Q. WHAT HAS THE COMPANY PROPOSED WITH RESPECT TO CASH 7 WORKING CAPITAL (CWC)?

The Company has proposed a CWC balance of (\$5,329,000) as shown on Exhibit 8 Α. 9 BCH-1 Schedule 8. CWC requirements have been determined by applying the results of a comprehensive lead/lag study to the projected test year revenues and 10 expenses. (BCH-1 page 27). This approach has been consistent with methods 11 used in the most recent North Dakota electric rate case. (BCH-1 page 27). Mr. 12 Halama stated that the Company's lead/lag study has been updated since the 13 Company's last North Dakota electric rate case to include the twelve months 14 ending December 31, 2023. (BCH-1 page 28). Mr. Halama stated that the 15 negative balance indicates that the overall revenue collections occur sooner than 16 the date when the associated costs of service are paid. On average, more cash 17 requirements are being provided by customers and vendors. The negative CWC 18 reduces rate base to compensate customers for funds provided to meet CWC 19 20 requirements. (BCH-1 page 28).

## Q. DO YOU HAVE ANY ADJUSTMENTS IN THE WAY THE COMPANY HAS COMPUTED ITS CWC BALANCE?

- 23 **A.** No. I accept the Company's methodology but have adjustments related to my recommended adjustment to the Company's proposed revenues and expenses.
- 25 Q. WHAT ARE YOUR ADJUSTMENTS?
- A. Based upon my adjustments to the Company's Rate Base components, the Operating Income and the Operating Expenses, I have calculated a CWC balance of (\$4,905,639) This is shown on Schedule DM-8. (NDPSC-8-39)

| 1                        |    |   |
|--------------------------|----|---|
| 2                        |    |   |
| 3                        |    |   |
| 4                        |    |   |
| 5                        |    | F. Non-Plant Assets and Liabilities   |
|                          | _  |   |
| 6<br>7                   | Q. | WHAT HAS THE COMPANY PROPOSED WITH RESPECT TO NON-PLANT ASSETS AND LIABILITIES?   |
| 8<br>9<br>10<br>11<br>12 | Α. | The Company has proposed a Non-Plant Assets and Liabilities balance of \$7,655,000 as shown on Exhibit BCH-1 Schedule 10. This balance represents book/tax timing differences associated with non-plant assets and liabilities and is reflected in the determination of current and deferred income tax provisions and ADIT balances. The balance of \$7,655,000 is primarily comprised of assets that have increased the test year rate base by \$7,655,000. (BCH-1 page 26-27). |
| 14<br>15                 | Q. | DO YOU HAVE ANY ADJUSTMENTS RELATED TO THE COMPANY'S PROPOSED NON-PLANT ASSETS AND LIABILITIES?   |
| 16<br>17                 | A. | I am accepting the Company balance for its Non-Plant Assets and Liabilities of \$7,655,000. This is shown on my Schedule DM-9.  |
| 18 -                     |    | G. <u>Regulatory Amortizations</u>  |
| 19<br>20                 | Q. | WHAT HAS THE COMPANY PROPOSED WITH RESPECT TO ITS REGULATORY AMORTIZATIONS?   |
| 21                       | A. | The Company proposed a balance of \$33,174,000 of Regulatory Amortization as  |
| 22                       |    | shown on Company Exhibit BCH-1 Schedule 15. A breakdown of these  |
| 23                       |    | Regulatory Amortizations are shown on WP Volume 3 III P1-1. Summary Test Year   |
| 24                       |    | page 4. This balance is comprised of the following accounts: (See response to 4-  |
| 25                       |    | 14)   |
| 26<br>27<br>28<br>29     |    | (BEGIN CONFIDENTIAL)  |

23

Α.

#### PLEASE EXPLAIN THE AGIS DEFERRED REGULATORY AMORTIZATION? Q.

According to Mr. Krug the AGIS or Advanced Grid Intelligence and Security initiative is a group of related investments in the technology that is used to operate the distribution system. (ADK-1 page 12). These components include advanced metering infrastructure (AMI) smart meters, the field area network (FAN) that is used to communicate with those meters and the advanced distribution management system (ADMS) used to operate the electrical distribution system. (ADK-1 page 12). One of the outcomes agreed to in the Commission approved settlement that resolved the prior rate case was that the AGIS capital and operations and maintenance (O&M) expenses were placed in deferral. Company was allowed to propose a reasonable amortization period for recovery of the deferral in a future rate case assuming that the foundational AGIS investments are either in service or are forecasted to be during the rate case test year. (ADK-1 page 12).

24 25

26

27

28

29

30

31

Α.

#### WHAT IS THE STATUS OF AGIS IN NORTH DAKOTA? Q.

According to Mr. Nickell (CSN-1 page 18), the Company has nearly completed the rollout of the AGIS initiative in North Dakota. The ADMS is fully deployed and operational and all of the FAN devices are installed. The deployment of new AMI software and integrations is complete, and the Company will complete the AMI meter installations in North Dakota by the end of the 2025 test year. (CSN-1 page 18). The foundational AGIS components are in place and full deployment will be completed within the test year. (CSN-1 page 18).

32 33

## Q. WHAT HAS THE COMPANY PROPOSED TO RECOVER IN THIS RATE PROCEEDING?

A. According to Mr. Nickell the Company previously agreed to defer all capital-related and O&M expenses for its AGIS initiative in the Commission approved settlement that resolved the prior electric rate case (PU-20-441). (CSN-1 page 19). Mr. Nickell indicated that the settlement agreement generally provided that capital expenditures and O&M expenses associated with the AGIS initiative should be deferred until such time as all foundational elements of AGIS were in service. (CSN-1 page 19). The agreed deferral of the AGIS initiative costs was designed to treat the Company's capital and O&M expenses as if they were capital expenditures included in CWIP, whereby an allowance for funds used during the deferral were treated similar to AFUDC. (CSN-1 page 19). The Company has included \$5,481,000 of regulatory amortization and an annual amortization recovery of \$997,000 as shown on Company Exhibit BCH-1 Schedule 5 and 6, respectively. The Company is proposing to recover these costs over a six-year amortization period. (DR 8-70).

## Q. WHAT IS YOUR RECOMMENDATION WITH RESPECT TO THE COMPANY'S AGIS INITIATIVE?

A. I am recommending acceptance of the Company's balance related to its AGIS project of \$5,481,000. I am also recommending that these AGIS assets be amortized over a 10-year period based upon other IT capex. My adjustment is shown on my Schedule DM-9. (a ten-year amortization period would be a recovery of \$598,000 per year instead of \$997,000 per year. In response to Set 12-15 which refers to Exhibit MPM-1 Schedules 5 and 8, the Company's identifies various computer software having an average life from 3 years to 15 years, and network equipment having an average life of 5 years. Extending the amortization period to 10-years would align with other IT and Networking assets. The Company has not specifically provided a reason use a the six-year amortization period.

#### (2) The PI EPU Deferral

| 1 |   |
|---|---|
| , | , |
| 2 | _ |

#### Q. PLEASE EXPLAIN THE PI EPU DEFERRAL

3 Α. According to the response to Data Request 8-43, the adjustment related to the 4 Prairie Island Extended Power Uprate (PI EPU) collects the revenue requirement of abandoned project costs over the remaining life of the plant. As the plant 5 6 continues to depreciate, the associated revenue requirement continues to 7 In the Company's prior rate case proceeding (PU-20-441), the decrease. 8 settlement document allowed the Company to recover the revenue requirement of 9 the abandoned plant over the remaining life of Prairie Island.

#### 10 Q. WHAT AMOUNT IS THE COMPANY PROPOSING TO RECOVERY IN RATES?

11 **A.** As shown on Company's Exhibit BCH-1 Schedule 5, the Company booked \$2,722,000 as the balance remaining in the PI EPU Deferral to be recovered over the remaining life of the plant.

#### 14 Q. WHAT IS YOUR RECOMMENDATION?

I recommend the disallowance of these costs and in response to 8-43 the Company identified that these project costs were previously abandoned after deciding not to pursue them. Although the Company stated that in the prior rate case the Company inferred that the Settlement document did not specifically address the recovery of the PI EPU costs, the Company determined that these costs should be recovered over the remaining life of the Prairie Island costs. I believe that costs that do not provide service to customers should not be included in rates for recovery. These costs were abandoned by the Company and decided not to invest in this project to its completion. The Company is continually requesting recovery of a project that is not used and useful in the provision of utility service. My adjustment is shown on my Schedule DM-9.

## (3) NOL Tax Reform ADIT ARAM (Average Rate Base Assumption Method)

29 30

28

#### Q. PLEASE EXPLAIN THE NOL TAX REFORM ADIT ARAM

| 1 | A. | The NOL Tax Reform ADIT ARAM is related to the Commission Order in Case No     |  |  |  |  |
|---|----|--|--|--|--|--|
| 2 |    | PU-18-155, which approved the Company's proposed amortization level included   |  |  |  |  |
| 3 |    | in the Tax Cut and Jobs Act (TCJA) refund calculation. This ADIT ARAM is being |  |  |  |  |
| 4 |    | amortized over 23 years. (BCH-1 page 53). The Company has included a           |  |  |  |  |
| 5 |    | Regulatory Amortization balance of \$2,835,000 as shown on Company Exhibit     |  |  |  |  |
| 6 |    | BCH-1 Schedule 5. The associated amortization expense results in a 2025 cost   |  |  |  |  |
| 7 |    | recovery of \$308,000. (See Workpaper Volume 3 VIII A27. NOL Tax Reform ADIT   |  |  |  |  |
| 8 |    | ARAM).   |  |  |  |  |

9

13

#### 10 Q. WHAT IS YOUR RECOMMENDATION?

11 **A.** I am accepting the Company's balance of \$2,835,000. My adjustment is shown on my Schedule DM-9.

#### (4) The RER PTC Amortization

#### 14 Q. PLEASE EXPLAIN THE RER PTC AMORTIZATION

- As stated in response to Set 12-14, the RER PTC Amortization balance of 15 Α. 16 (\$43,315,000) is the average balance of the regulatory liability for North Dakota's share of Production Tax Credits. In response to Set 2-7, the Company utilized the 17 18 Levelized Credit Method (LCM) to normalize production tax credits (PTC). This 19 approach stemmed from the Commission and Staff's request to evenly distribute 20 PTCs prospectively in the Company's Renewable Energy Rider (RER) (Case No. PU 19-329). The Commission approved the Company's RER rate on February 19, 21 22 2020.
- 23 Q. WHAT HAS THE COMPANY PROPOSED AND INCLUDED RELATED TO THE 24 RER PTC AMORTIZATION?
- As shown on Company Exhibit BCH-1 Schedule 5 the Company proposed a balance of (\$43,315,000) related to the RER PTC Amortization. (See Workpaper Volume 3 III PI-1 Summary Test Year 2025 page 4 of 7 and Workpaper A9). This represents the average of the December 2024 balance (\$38,094,783) and the

| 1<br>2                          |          | December 2025 balance (\$48,534,458). (Workpaper Volume 3 VIII A9 PTC Amortization page 7 and 8).  |  |  |  |  |
|---------------------------------|----------|--|--|--|--|--|
| 3<br>4<br>5                     | Q.<br>A. | WHAT IS YOUR RECOMMENDATION? I accept the Company's balance of (\$43,315,000). My recommendation is shown on my Schedule DM-9.   |  |  |  |  |
| 6                               |          | (E) Chausa Ctauaus   |  |  |  |  |
| 7                               |          | (5) <u>Sherco Storage</u>  |  |  |  |  |
| 8                               | Q.       | PLEASE EXPLAIN THE COMPANY'S SHERCO STORAGE?   |  |  |  |  |
| 9<br>0<br>1<br>2<br>3<br>4<br>5 | Α.       | The Sherco Long Duration Battery pilot project is a 10 MW battery capable of discharging for 100 hours. The pilot project aims to demonstrate the potential of new battery technology, potentially leading to larger scale projects. (Moeller testimony page 18). The Sherco Long Duration Battery pilot project will receive a Department of Energy grant and has a contingent commitment from Breakthrough Energy Catalyst for a grant in 2026 after completion of the project. The grant funding could reduce the overall cost of the project by more than 70 percent. (Moeller testimony page 18). |  |  |  |  |
| 7                               | Q.       | WHAT HAS THE COMPANY PROPOSED?   |  |  |  |  |
| 8<br>9<br>20<br>21              | Α.       | As shown on Company Exhibit BCH-1 Schedule 5, the Company has proposed a balance of ( <b>BEGIN CONFIDENTIAL</b> ) (See also Workpaper Volume 3 III P1-1 Summary Test Year 2025 and Volume 3 III P4-3 Sherco Battery page 1).   |  |  |  |  |
| 22<br>23                        | Q.       | HAS THE COMPANY PROVIDED ANY UPDATED INFORMATION ON THIS PILOT PROJECT?  |  |  |  |  |
| 24<br>25<br>26<br>27            | A.       | Yes. In response to Set 20-1, The Company's partner for this project, Form Energy, has successfully brought its flagship factory online, but has experienced manufacturing adjustments related to scaling operations. The result of these adjustments has delayed the expected project completion date. The estimated in-  |  |  |  |  |

Mugrace Direct PU-24-376 - p. 29

| 1        |    | 2027. The shift in timing moves this investment beyond the test year being             |
|----------|----|--|
| 2        |    | analyzed in this proceeding. For the 2025 test year, this reduces the revenue          |
| 3        |    | requirement by approximately (BEGIN CONFIDENTIAL) (END                                 |
| 4        |    | CONFIDENTIAL) as reflected in Attachment A. The Company will make this                 |
| 5        |    | adjustment to the deficiency in its Rebuttal Testimony.                                |
| 6        |    |  |
| 7        | Q. | WHAT IS YOUR RECOMMENDATION?   |
| 8        | A. | Given this new information, I am recommending that this investment be removed          |
| 9        |    | from the Company's revenue requirement. These adjustments flow through my              |
| 10       |    | revenue requirement schedules.   |
| 11       |    | V. Operating Income Issues   |
| 12       |    | A. Operating Revenues  |
| 13<br>14 | Q. | WHAT HAS THE COMPANY PROPOSED WITH RESPECT TO ITS OPERATING REVENUES AT PRESENT RATES? |
| 15       | A. | The Company has proposed Operating Retail Revenues at Present Rates of                 |
| 16       |    | \$230,374,819 as shown on Exhibit BCH-1 Schedule 3. (See Workpaper Volume 3            |
| 17       |    | IV R1. Revenue Summary). The Company has proposed Other Operating                      |
| 18       |    | Revenues of \$62,537,550 as shown on Exhibit BCH-1 Schedule 3. (See                    |
| 19       |    | Workpaper Volume 3 IV R1. Revenue Summary). The Electric Retail Revenues               |
| 20       |    | are comprised of Residential, Commercial & Industrial, Public & Highway, Other         |
| 21       |    | Sales to Public Authorities, Fuel Revenues and RER / TCR Rider Revenues. The           |
| 22       |    | Other Operating Revenues include such items as Interchange Revenues, Other             |
| 23       |    | Electric Revenues, Other Operating Revenues, Transmission Revenues, Fuel               |
| 24       |    | Revenues, Asset and Non-Asset Based Revenues and various Precedential                  |
| 25       |    | Adjustments.   |
| 26<br>27 | Q. | HOW DID THE COMPANY DEVELOP ITS REVENUES FOR THE TEST YEAR PERIOD ENDING 2025?         |

Mugrace Direct PU-24-376 - p. 30

28

29

Α.

(BCH-1 page 29).

Mr. Halama stated that test year retail sales levels assumed normal weather.

## 1 Q. WHAT WEATHER NORMALIZATION PERIOD HAS THE COMPANY USED TO DEVELOP ITS SALES REVENUES?

The Company has utilized a 20-year averaged heating degree days (HDD) and Temperature – humidity index (THI) (BSL-1 page 18-19). The use of a 20-year weather normalization period takes into consideration economic and demographic indicators, weather, and historical number of customers from June 2009 through May 2024. The model was simulated over the forecast period expressed in 20-year average degree days). (BSL-1 page 18-19).

## 9 Q. DO YOU HAVE ANY ADJUSTMENTS TO THE COMPANY'S OPERATING 10 REVENUES AT PRESENT RATES?

Yes. As I removed the Sherco Battery Investment from the revenue requirement calculation, the response to Confidential Set 20-1 reflects an adjustment to Operating Revenues of (BEGIN CONFIDENTIAL) (END CONFIDENTIAL). In Company WP – Volume 3 IV R4 Other Revenue, the Company reflected a balance of (BEGIN CONFIDENTIAL) (END CONFIDENTIAL). I am utilizing this balance to make my adjustment to the Company's Operating Revenue-Other Non-Retail. This is shown on my Schedule DM-10.

#### B. Operating and Maintenance Expenses

## Q. WHAT HAS THE COMPANY PROPOSED WITH RESPECT TO ITS OPERATING AND MAINTENANCE EXPENSE?

As shown on Exhibit BCH-1 Schedule 3 and on Schedule 11, the Company 22 Α. proposed a total Operating and Maintenance Expense (O&M) balance for the 2025 23 test year of \$182,009,000.6 This balance is composed of various accounts related 24 25 Fuel and Purchased Energy, Power Production/Regional Markets. 26 Transmission. Distribution, Customer Accounting/Customer Service. 27 Sale/Economic Development and Administrative and General. This balance includes the Company specific adjustments in each of the accounts listed above, 28

.

11

12 13

14

15 16

17

18

19

20

21

<sup>&</sup>lt;sup>6</sup> Any differences between Company Operating Expenses and Mr. Mugrace's Operating Expenses are due to rounding issues.

Α.

Α.

and as shown on Exhibit BCH-1 Revised Schedule 6. Company witness Mr. Halama stated that the corporate forecast from July 2024 was used to prepare the O&M forecast in this case. The July budget included 6 months of actuals for 2024 and 6 months of forecast for 2024 and is the most recently available 2025 forecast that could be used to prepare this case. The July 2024 forecast was developed consistent with corporate budgeting protocols. (BCH-1 page 31).

## 7 Q. WHAT WERE THE COMPANY'S REASONS TO FORECAST INCREASED COSTS IN ITS OPERATING EXPENSES?

According to Mr. Krug, business areas may use projections of future costs based upon historic costs incurred or trending of historic costs as their budgeting methodology. (Data Response Set 8-8). Spending guidelines are communicated to business areas as well as increases in base wages and salary rates and specific unit costs that can be used to estimate costs for various business services. Information is also provided to the business areas about general escalation-based indices for employment costs and producer prices. Information is not readily available about the extent to which a particular business area utilized the indices in its budgeting process. Mr. Krug has provided indices related to Labor and Non-Labor escalation factors:

| 19 | Year      | Labor | Non-Labor |
|----|-----------|-------|-----------|
| 20 | 2023      | 4.41% | 1.54%     |
| 21 | 2024      | 4.09% | 2.18%     |
| 22 | 2025-2023 | 3.42% | 1.81%     |
| 23 | 2024-2033 | 3.48% | 1.85%     |

## Q. WHAT ADJUSTMENTS DO YOU HAVE WITH RESPECT TO THE COMPANY'S OVERALL OPERATING AND MAINTENANCE EXPENSES?

I have adjustments to certain of the Company's overall O&M Expense balance that do not include specific adjustments the Company has made and proposed as shown on Exhibit BCH-1 Revised Schedule 4 and Schedule 6. My overall adjustments to the Company's certain O&M Expense incorporate the use of a

three-year normalization adjustment and the disallowance of certain Inflationrelated adjustments as reflected in Company Data Response 8-8.

## 3 Q. WHY ARE YOU USING A NORMALIZATION ADJUSTMENT TO CERTAIN OF THE COMPANY'S OVERALL O&M EXPENSES?

Α.

A review of the Company's O&M Expenses (Data Response Set 8-52 and Set 12-5 Set 12-8 and Set 14-1) shows that certain of the Company's balances for the periods 2022-2024 fluctuate and vary from year to year. In other accounts, the balances during the same period appear to be abnormal and irregular from what the Company is proposing to utilize and set in the test year 2025 period. In other areas there are negative balances or no prior costs accounted for. I reviewed the Company's response to Data Response Set 8-52, Set 12-5, Set 12-8, and Set 14-1 which the Company provided a breakdown of costs for each of its operating expense categories. The use of a three-year normalization period smooths out fluctuations in setting rates going forward. Prior costs can also show and provide a trend of expenses that were incurred by the Company to determine the reasonableness of the adjustments in costs going forward.

The response to Data Request Set 12-8 and Set 14-1 indicates that some of the expenses are variable in nature and can change from period to period. It is appropriate to normalize these types of costs to set rates in this proceeding. Finally, certain costs are usually out of the Company's control in that they relate to outside vendors or third-party providers. I set a baseline variance of 15% or greater in determining my adjustments for each of the Company's operating expense categories. I based my variation percentage upon the basic accounting principle that a material variance of at least 12% is considered a major variance and requires explanations as to the reasoning for the variance. Variances are useful in determining whether expected or forecasted costs are in line with actual costs that have been incurred.

## Q. DID YOU ASK THE COMPANY FOR AN EXPLANATION WHY CERTAIN COSTS HAVE FLUCTUATED FROM YEAR TO YEAR?

Α. Yes. In response to Data Request Set 12-7, which referred to Company witness 1 2 Mr. Halama testimony page 10, provided the principal changes in O&M costs for 3 the 2021 test year, and 2023 actual test year, by category for the 2025 test year 4 period. Total O&M expenses increased by \$9.3 million from the 2021 test year to the 2025 test year, and by \$8.7 million from the 2023 test year to the 2025 test 5 year. Mr. Halama stated that wind O&M expense associated with placing new 6 wind farms into service have been added to the Company's generation portfolio, 7 8 including internal and external labor with the addition of nuclear related fees also 9 driving additional increases. (Halama testimony page 11). Mr. Halama stated that the increase in transmission interchange operating expenses increased by \$2.1 10 11 million and \$2.8 million as compared to the 2021 test year and the 2023 actual test year, respectively. This was due to an increase in network transmission expenses 12 driven by increased loads and rates. (Halama testimony page 12). With respect 13 14 to A&G costs, the 2025 test year revenue requirement included \$4.7 million and 15 \$1.2 million increase as compared to the 2021 test year and the 2023 actual test 16 year, respectively due to increases in Company labor costs and insurance costs. (Halama testimony page 13). O&M expenses increased because of the tight labor 17 18 market and a hardening insurance market, particularly in the areas of conventional 19 property and excess liability insurance coverage. (Halama testimony page 13).

## 20 Q. UTILIZING YOUR THREE-YEAR NORMALIZATION APPROACH WHAT IS YOUR OVERALL ADJUSTMENT TO THE COMPANY'S O&M EXPENSE?

- As more fully reflected on Schedule DM-11a, my three-year normalization adjustments to certain operating expenses is an overall decrease of \$1,945,201.

  This three-year average includes non-labor expense only and does not include the inflation adjustments that I have identified further down in my testimony.
- 26 Q. HOW DOES THE COMPANY CALCULATE AND ALLOCATE ITS LABOR COSTS?
- As explained in response to Data Request Set 4-30, the Company is directly charged or allocated labor costs by expense categories using the 2024 July Forecast (six-months of actual and six-months of forecast) and the 2025 test year.

- Labor costs include base salary, overtime, and benefits of internal employees. The Company's budgeted process is completed at a total expense level and not appropriate to analyze labor costs.
- 4 Q. WHAT DID THE COMPANY OBJECT TO WHEN ASKED TO BREAK DOWN LABOR COSTS BY THE VARIOUS CATEGORIES ADDRESS ABOVE?
- A. The Company objected to providing the detailed breakdown as it stated it was overly broad and unduly burdensome and is not relevant to and beyond the scope of this proceeding and not reasonably calculated to lead to the discovery of admissible evidence.
- 10 Q. WHY ISN'T THE COMPANY ABLE TO PROVIDE THE INFORMATION AS 11 REQUESTS IN SET 4-30?
- A. According to the response to Set 4-30, the Company serves more than 1.5 million customers across North Dakota, South Dakota, Minnesota and uses a variety of different allocations that apply to labor costs. The costs of certain employees employed or allocated to the Company are not allocated to North Dakota. The Company stated that the request seeks large volumes of detailed information in a format not readily kept by the Company which would require a special study to produce and some of the information requested is not relevant to this rate case.
- 19 Q. WHAT IS YOUR RESPONSE?
- 20 Α. The Company is responsible and obligated to support its costs by providing sufficient reliable evidence supported by valid documentation for its adjustments 21 22 to its cost expense categories, including labor and labor-related expenses. The fact that the request may provide a burden to the Company should not be a factor 23 24 nor a valid reason in not responding to a request seeking information to valid the 25 Company's costs through discovery. With respect to relevance, it should be up to the Commission Staff and its consultants to determine whether the information is 26 27 meaningful, purposeful and applicable in the setting of rates for utility service.
- Q. WHAT INFORMATION WAS PROVIDED WHEN THE COMPANY WAS ASKED
  ABOUT THE ACTUAL NUMBER OF EMPLOYEES ALLOCATED FROM XCEL
  ENERGY TO THE NORTH DAKOTA JURISDICTION?

A. In response to Data Request 8-51, I asked the Company to provide a list of employees that have been allocated to the North Dakota jurisdiction for the periods 2020-2024 by expense category. The response was that the Company does not allocate a number of employees to its jurisdictions and each employee's time is accounted for consistent with the Cost Assignment and Allocation Manual filed with Company witness Halama's direct testimony (BCH-1 Schedule 14).

In response to Set 12-6 Attachment A the Company provided a schedule of total NSPM employee headcount for the years 2022 -2024. The Company provided a schedule showing the allocation of employees to the North Dakota jurisdiction. The Company provided a schedule of employees by job titles, and functions by the North Dakota jurisdiction. Approximately 83 employees are bargaining employees and approximately 28 employees are non-bargaining employees for a total count of 111 employees. Although Attachment A does not reflect the time period of this breakdown, I assume this is for the test year 2025.

#### Q. WHAT IS YOUR RECOMMENDATION?

8

9

10

11

12

13

14

15

26

27

28

29

- 16 Α. I am unable to evaluate or analyze the labor costs with the information provided by 17 the Company as it does not include salary levels as requested in Set 12-6 a) nor 18 whether which employees are directly or indirectly allocated to the North Dakota 19 jurisdiction. Given that the Company is unable or unwilling to provide the required 20 documentation to fully review the Company's labor cost and the way the Company 21 assigns employees to the North Dakota jurisdiction, I am recommending that the 22 Commission direct the Company to provide a detailed analysis with supporting 23 documentation as to the average number of employees assigned (directly and 24 indirectly) from NSP-M to the North Dakota jurisdiction in each of the Company's labor categories. I am also recommending that this analysis include the following: 25
  - Complete job titles with job descriptions of each employee by function and operations (direct and indirectly) allocated to the North Dakota jurisdiction.
  - When any employee has more than one job description and title and provide the headcount in the grouping related to the North Dakota jurisdiction.

- Provide the average fully burdened cost (salary, incentive compensation, benefits, etc.,) of a headcount by function and operation in the North Dakota jurisdiction
  - Provide these costs for each labor expense category.

## 7 Q. PLEASE ADDRESS YOUR INFLATION OR ESCALATION RELATED 8 ADJUSMENTS UNDER EACH EXPENSE CATEGORY.

My Inflation-related adjustments are reflect in Schedules DM-13 through DM-18. With respect to the disallowance of Inflation adjustments, I do not find these types of adjustments to be known and measurable in setting rates for service. These types of cost adjustments do not provide a good method to adjust costs as they adjust them to reflect an overall broad, blanket-type economic adjustment. Therefore, the costs would be adjusted for the inflation of goods and services that may or may not be directly related or attributable to costs and services incurred by the Company. Inflation adjustments do not address any particular or individual expense category but are simply broad-based forecasts and predictions of cost estimates. As costs for goods and services fluctuate over time, applying inflation adjustments to costs is not a proper methodology for setting rates for utility service.

My adjustments related to the disallowance of Inflation adjustments (Non-Labor related) are as follows: (Set 8-8)

| 22<br>23 |    |                         | Company<br>Balance | Inflation | Adjustment    | PSC Staff<br>Recommended |
|----------|----|-------------------------|--------------------|-----------|---------------|--------------------------|
| 20       |    |                         | Daiarioo           | mmanon    | 7 (4) (4) (4) |                          |
| 24       | 1. | Power Production        | \$44,556,000       | 1.81%     | (\$806,464)   | \$43,749,536             |
| 25       | 2. | Transmission            | \$18,332,727       | 1.81%     | (\$331,822)   | \$18,000,905             |
| 26       | 3. | Distribution            | \$ 4,647,431       | 1.81%     | (\$ 84,119)   | \$ 4,563,312             |
| 27       | 4. | Customer Acct.          | \$ 4,342,392       | 1.81%     | (\$ 78,597)   | \$ 4,263,794             |
| 28       | 5. | <b>Customer Service</b> | \$ 302,364         | 1.81%     | (\$ 5,473)    | \$ 296,891               |
| 29       | 6. | Sales, Econ & Other     | \$ 373,945         | 1.81%     | (\$ 6,768)    | \$ 367,177               |
| 30       | 7. | Admin. & General        | \$ 8,304,533       | 1.81%     | (\$150,312)   | \$ 8,154,221             |
| 31       |    | Total Adjustments       |                    |           | (\$1,463,555) |                          |

| 1   |    | These adjustments are reflected on my Schedule DM-11, and Schedules DM-13  |
|---|----|--|
| 2   |    | through DM-19.   |
| 3   |    | My adjustments related to normalization of expenses are as follows and are   |
| 4   |    | detailed on my Schedule DM-11a: (Set 14-1)   |
| 5   |    | Normalized   |
| 6<br>7<br>8<br>9<br>10<br>11<br>12<br>13              |    | <ol> <li>Power Production \$314,530</li> <li>Transmission (\$994,832)</li> <li>Distribution (\$49,691)</li> <li>Customer Accounting (\$851,007)</li> <li>Customer Service \$11,261</li> <li>Sales (\$170,104)</li> <li>Administrative &amp; General (\$205,358)</li> <li>These adjustments are reflected on my Schedule DM-11, and Schedules DM-13 through DM-19.</li> </ol> |
| 15<br>16  | Q. | PLEASE ADDRESS YOUR SPECFIC ADJUSTMENTS TO THE COMPANY'S CERTAIN EXPENSE ADJUSTMENTS.  |
| 17<br>18<br>19  | Α. | Below are my specific adjustments and recommendations with respect to the Company's Precedential and Ratemaking Adjustments along with adjustments identified in discovery:  |
| 20  |    | C. Fuel and Purchased Energy Expenses  |
| 21<br>22  | Q. | WHAT HAS THE COMPANY PROPOSED WITH RESPECT TO ITS FUEL AND PURCHASED ENERGY EXPENSES?  |
| <ul><li>23</li><li>24</li><li>25</li><li>26</li></ul> | A. | As shown on Company Exhibit BCH-1 Schedule 6, the Company proposed are Unadjusted balance of \$84,046,000 related to Fuel and Purchased Energy. The Company did not make any adjustments (Precedential and Ratemaking) to the Company's Test Year 2025 period.   |
| 27  | Q. | WHAT IS YOUR RECOMMENDATION?   |
| 28<br>29  | A. | I am accepting the Company's balance of \$84,046,000 for its Fuel and Purchased<br>Energy Costs. This is shown on my Schedule DM-12.   |

24

25

26

27

28

29

### D. Power Production Expenses

# 3 Q. WHAT HAS THE COMPANY PROPOSED WITH RESPECT TO ITS POWER 4 PRODUCTION EXPENSES?

The Company has proposed an Unadjusted balance of \$44,556,000 (Company 5 Α. 6 Exhibit BCH-1 Schedule 6). The Company made several Precedential 7 adjustments of approximately (\$478,000) as shown on Company Exhibit BCH-1 8 Schedule 4 and 6. These adjustments reflect the removal of the Wind Farms for 9 Community North, (WP-A5- (\$36,950)); Jeffers Wind Farm removal (WP-A6-(\$60,437)); and the Northern Wind projects removal (WP-A7 – (\$167,127)). These 10 11 three adjustments total \$264,514. The Company has removed \$213,130 related 12 to the Company's LT Incentive Removal (WP-A4). The Company also proposed 13 an adjustment of (\$44,000) related to the removal of the Rider TCR. (Exhibit BCH-14 1 Schedule 6). The Adjusted balance is calculated at \$44,034,356.

## 15 Q. WHAT ADJUSTMENTS DO YOU HAVE WITH RESPECT TO THE COMPANY'S 16 POWER PRODUCTION EXPENSES?

17 A. I do not have any adjustments but for my normalization and removal of inflation-18 related costs as described above. I am accepting the Company's Precedential 19 adjustments totaling approximately \$478,000 and the Company's adjustment of 20 \$44,000 related to the Rider – Renewable Energy removal (RER). My 21 recommendation is shown on my Schedule DM-13.

### E. Transmission Expenses

# Q. WHAT HAS THE COMPANY PROPOSED REGARDING ITS TRANSMISSION EXPENSES?

A. The Company has proposed an Unadjusted balance of \$26,294,000 as reflected on Company Exhibit BCH-1 Schedule 6. The Company decreased this balance by \$6.783 million to reflect the removal of the Transmission Cost Recovery (TCR) Rider. Mr. Halama stated that the Company removed the costs and revenues associated with the TCR Rider from the test year jurisdictional cost of service for

| the ongoing projects and MISO RECB that will continue cost recovery in the Rider                                |
|---|
| 2 after the implementation of final rates in this case. (Halama testimony page 58)                              |
| The adjustment prevents double recovery of the costs, and therefore no cost                                     |
| 4 impact is associated with the 2025 test year revenue requirement. The Company                                 |
| will continue recovering these proposed costs in the TCR rider.   |
| 6 Q. WHAT ARE YOUR ADJUSTMENTS?   |
| 7 A. I am accepting the Company's adjustment to its TCR Rider of (\$6.783 million). As                          |
| 8 discussed above, I am making adjustments related to my normalization adjustmen                                |
| 9 and my removal of inflation related adjustments. This is shown on my Schedule                                 |
| 10 DM-14.   |
| 11 <u>F. Distribution Expenses</u>  |
| 12 Q. WHAT HAS THE COMPANY PROPOSED WITH RESPECT TO ITS   |
| 13 DISTRIBUTION EXPENSE?  |
| 14 A. The Company has proposed an Unadjusted and an Adjusted balance to its                                     |
| Distribution Expenses of \$7.391 million, shown on Exhibit BCH-1 Schedule 6.                                    |
| 16 Q. WHAT ARE YOUR ADJUSTMENTS?  |
| 17 A. But for my adjustments related to the normalization of certain expenses and the                           |
| disallowance of inflation-related adjustments, I am accepting the Company's                                     |
| remaining expense balance. This is shown on my Schedule DM-15.  |
| 20 G. Customer Accounting Expenses  |
| <ul> <li>Q. WHAT HAS THE COMPANY PROPOSED WITH RESPECT TO ITS CUSTOMER</li> <li>ACCOUNTING EXPENSES?</li> </ul> |
| 23 A. The Company proposed an Unadjusted balance of \$5,146,000. The Company                                    |
| increased this balance by \$221,000 to account for bad debt expense (labeled as                                 |
| 25 EDBadDebt), The Adjusted balance of \$5,367,000 is shown on Exhibit BCH-                                     |
| 26 Schedule 6 and WP-A11.   |
| Q. WHAT HAS BEEN THE COMPANY'S EXPERIENCE RELATED TO BAD DEBTS?   |

1 Α. The Company stated that the original calculation for 2025 bad debt expense was 2 generated during the budget process and is a function of projected revenues 3 multiplied by the bad debt ratio for NSPM. (BCH-1 page 46). Mr. Halama stated 4 that an analysis was performed to update the bad debt expense based upon the 5 revenue deficiency in the 2025 test year. An adjustment is needed to incorporate 6 the updated bad debt amount into the revenue requirement which best reflects test 7 year costs. (BCH-1 page 46). The Company has included \$221,000 of bad debt 8 expense calculating this balance by the proposed revenue requirement of 9 \$44,556,037 times the uncollectible ratio of 0.50%.

## 10 Q. WHAT IS YOUR ADJUSTMENT TO THE COMPANY'S PROPOSED BAD DEBT 11 EXPENSE?

12 **A.** I adjusted the bad debt expense in relation to my revenue requirement 13 recommendation, using a bad debt expense ratio of 0.50% as shown on Company 14 WP Volume 3 VIII A11 Bad Debt Expense. My adjustment is shown on my 15 Schedule DM-16 and reflects a balance of \$123,958.

### H. Customer Service & Information Expenses

# 17 Q. WHAT HAS THE COMPANY PROPOSED WITH RESPECT TO ITS CUSTOMER 18 SERVICE & INFORMATION EXPENSES?

The Company proposed an Unadjusted and an Adjusted balance of \$351,000 to its Customer Service & Information Expenses, which is shown on Exhibit BCH-1 Schedule 6. Included in that balance are costs related to the Company's Electric Vehicle Program/adoption (Data Set 8-77).

#### 23 Q. WHAT ARE YOUR ADJUSTMENTS?

16

24 **A.** I am recommending the disallowance of the Electric Vehicle initiative costs as reflected in Data Set 8-77 of \$131,000. The Company stated that there are no active Electric Vehicle Programs in North Dakota at this time. There are \$131,000 of costs included in the 2025 test year to support future developments including potential electric vehicle programs. I believe these costs are not known and measurable and provide no customer benefits given the fact that there are no active Electric Vehicle Programs in North Dakota. Customers should not be paying

for costs which provide no positive benefits to them. My adjustments are shown on my Schedule DM-17.

### I. Sales, Economic Development & Other Expenses

3

- 4 Q. WHAT HAS THE COMPANY PROPOSED WITH RESPECT TO SALES, 5 ECONOMIC DEVELOPMENT AND OTHER EXPENSES?
- A. As shown on Exhibit BCH-1 Schedule 4 and Schedule 6, the Company proposed an Unadjusted Balance related to Sales, Economic Development and Other Expenses of \$282,000. To that balance, the Company added \$113,000 related to Economic Donations to arrive at an adjusted balance of \$395,000.
- 10 Q. WHAT IS INCLUDED IN THE COMPANY'S \$113,000 ECONOMIC DEVELOPMENT DONATIONS?
- 12 Company Witness Mr. Halama (Exhibit BCH-1 page 48) stated that the Company Α. 13 makes contributions to several regional and local economic development organizations for the purposes of maintaining and improving the long-term 14 economic health of communities in its service territory or retaining employment 15 16 opportunities and expanding the state and local tax base. In response to Data 17 Response Set 4-28, the Company stated that there is no further breakdown or 18 description of these donations These costs are the estimate of financial 19 contributions expected during 2025. The Company can, through a donation, 20 provide communities or organizations involved in community and economic 21 development with either an operating grant or a one-time investment in a special 22 project that supports the community and economic development efforts of its 23 communities. (BCH-1 page 48). (Set 4-28) (Set 8 – 23)

### 24 Q. WHAT IS YOUR POSITION ON ECONOMIC DEVELOPMENT DONATIONS?

25 **A.** I do not believe that ratepayers should pay for these types of costs in rates. These expense items are akin to charitable contributions. The Company is a utility company servicing certain parts of North Dakota. The Company should not be expensing costs related to non-utility type services. Additionally, ratepayers do not have a say in what type of donations they are paying for and its unknown whether ratepayers receive any benefit for these contributions. These types of costs should

not be included in the revenue requirement proposed by the Company. The Company should pay for these costs, below the line, and receive the tax benefits through the corporate entity. This balance is shown on Schedule DM-18.

#### 4 Q. WHAT IS YOUR RECOMMENDATION?

8

22

29

5 **A.** I am recommending the removal of the entire \$113,000 of Economic Development
6 Donations from the Company's Sales, Economic Development and Other
7 Expenses balance. This is shown on Schedule DM-18.

### J. Administrative & General Expenses

# 9 Q. WHAT HAS THE COMPANY PROPOSED WITH RESPECT TO ITS 10 ADMINISTRATIVE AND GENERAL EXPENSES?

11 Α. As shown on Exhibit BCH-1 Schedule 4 and 6, the Company proposed an 12 Unadjusted Balance of \$21,269,000, and an Adjusted Balance of \$20,914,000. 13 These adjustments reflect Precedential Adjustments which the Company has not changed from the Commission's Order in the Company's previous completed 14 15 electric rate cases (Exhibit BCH-1 page 45). The Company has also reflected 16 Ratemaking Adjustments that relate to specific adjustments in this instant 17 proceeding. I will address each of these Precedential and Ratemaking 18 Adjustments below.

# 19 Q. WHAT SPECIFIC PRECEDENTIAL ADJUSTMENTS HAS THE COMPANY 20 PROPOSED IN THIS PROCEEDING?

21 A. The Company has proposed the following Precedential Adjustments:

### <u>Precedential Adjustments</u>

| 23 | Advertising -                | (\$242,000)                | WP A1 |
|----|------------------------------|----------------------------|-------|
| 24 | Association Dues -           | (\$ 36,000)                | WP A2 |
| 25 | Customer Deposits -          | \$ 3,000                   | WP A3 |
| 26 | Incentive Pay – LT           | (\$938,000)                | WP-A4 |
| 27 | Pension Non-Qualified SERP - | <u>(\$ 2,000)</u>          | WP A8 |
| 28 | Total                        | (\$1,215,000) <sup>7</sup> |       |

<sup>&</sup>lt;sup>7</sup> Differences due to rounding issues

| 1<br>2   | Q. | PLEASE EXPLAIN YOUR ADJUSTMENTS TO THE COMPANY'S PRECEDENTIAL ADJUSTMENTS?          |
|----------|----|---|
| 3        | A. | My adjustments to each of the Company's Precedential Adjustments are as             |
| 4        |    | follows:  |
| 5        |    |   |
| 6        |    | a. <u>Advertising –(\$242,000) WP-A1</u>  |
| 7<br>8   | Q. | WHAT HAS THE COMPANY PROPOSED WITH RESPECT TO ADVERTISING                           |
| 9        | Q. | EXPENSE?  |
| 10       | A. | The Company proposed to reduce its Advertising Expense by \$242,000 as shown        |
| 11       |    | on Company Exhibit BCH-1 Schedule 4 and Schedule 6. The Company began               |
| 12       |    | with an Advertising Expense balance of \$509,394 and reduced this amount by         |
| 13       |    | \$242,093 resulting in a recoverable amount of \$267,301 (WP-A1). In response to    |
| 14       |    | Data Request 4-26, the Company included all Advertising Expense related to          |
| 15       |    | Mandated Inserts and Safety Advertising for recovery in the 2025 test year. The     |
| 16       |    | Company removed Advertising related to general Advertising.                         |
| 17       |    |   |
| 18       | Q. | WHAT ADJUSTMENTS DO YOU HAVE WITH RESPECT TO ADVERTISING                            |
| 19       |    | EXPENSES?   |
| 20<br>21 | Α. | I am accepting the Company's adjustment reducing the Advertising Expense            |
| 22       | Α. | balance by \$242,000. These costs are related to customer communications,           |
|          |    | conservation, safety, customer programs and mandated regulatory notices. This       |
| 23       |    |   |
| 24<br>25 |    | is shown on my Schedule DM-19.  |
| 25       |    | h   |
| 26<br>27 |    | b. <u>Association Dues – (\$36,000) WP-A2</u>                                       |
| 28       | Q. | WHAT HAS THE COMPANY PROPOSED WITH RESPECT TO ASSOCIATION                           |
| 29       |    | DUES?   |
| 30       | A. | The Company proposed reducing its Association Dues by \$36,000. The Company         |
| 31       |    | doesn't budget association dues at the organization level but rather uses past year |
| 32       |    | actuals to forecast the costs for dues. (Data Request 4-26). The Company            |

| 1              |    | developed the amount of the reduction by using the 2023 actual association dues  |
|----------------|----|--|
| 2              |    | spent rather than a forecast of the spending in the 2025 test year.  |
| 3              |    |  |
| 4              | Q. | WHAT ADJUSTMENTS DO YOU HAVE WITH RESPECT TO ASSOCIATION   |
| 5<br>6         |    | DUES?  |
| 7              | Α. | I am recommending a reduction of \$46,844, or an additional reduction of \$10,844  |
| 8              |    | as shown on WP-A2. It appears that the Company does not provide a breakdown  |
| 9              |    | of these costs at the organizational level. Until such time as the Company can   |
| 10             |    | provide and identify these costs more precisely, I recommend utilizing the   |
| 11             |    | reduction of \$46,844. This is shown on page 42 of 42 under Column ND Electric   |
| 12             |    | Excluded.  |
| 13             |    |  |
| 14             |    | c. <u>Customer Deposits - \$3,000 – WP-A3</u>  |
| 15<br>16<br>17 | Q. | WHAT HAS THE COMPANY PROPOSED WITH RESPECT TO CUSTOMER DEPOSITS?   |
| 18<br>19       | Α. | The Company proposed an adjustment of \$3,000 related to Customer Deposits.  |
| 20             |    | This is shown on Exhibit BCH-1 Schedule 4 and on WP A3 page 2 of 5. The  |
| 21             |    | Company stated that it treats customer deposits as customer – supplied capital   |
| 22             |    | and has included interest expense on customer deposits to pay a return on that   |
| 23             |    | investment. (WP-A3). The average balance of customer deposits are deducted   |
| 24             |    | from rate base and at the same time operating expenses are increased to permit   |
| 25             |    | recovery of interest paid on these deposits.   |
| 26             | Q. | WHAT ADJUSTMENTS DO YOU HAVE?  |
| 27             | Α. | I am accepting the Company's Customer Deposit adjustment of \$3,000.   |
|                |    | the state of the s |
| 28             |    |  |
| 29             |    |  |
| 30             |    |  |

d.

Incentive Compensation Pay Removal LTI-(\$938,000) WP-A4

| 2              |    | (WP-A16 WP-A17  |
|----------------|----|---|
| 3<br>4         | Q. | WHAT HAS THE COMPANY PROPOSED WITH RESPECT TO ITS INCENTIVE COMPENSATION?         |
| 5              | A. | The Company has proposed reducing Incentive compensation related to the           |
| 6              |    | Company's LTI of \$938,000. (Company Exhibit BCH-1 Schedule 4 and Schedule        |
| 7              |    | 6 and WP-A4). The Company removed costs related to Performance Share Plan         |
| 8              |    | and Deferred Compensation and Restricted Stock Units totaling \$937,7118 under    |
| 9              |    | the A&G expense category. (See response to Set 8-19, 20, 21, 22 (turnover rates). |
| 10             |    | According to Mr. Halama treatment of the removal of the Incentive Compensation    |
| 11             |    | Pay LTI has not changed from the Commission's Order in the Company's previous     |
| 12             |    | completed electric rate cases. (BCH-1 page 45). The Company stated that it is     |
| 13             |    | not seeking rate recovery for the Performance Share Plan or the Restricted Stock  |
| 14             |    | Units (WP-A4).  |
| 15             | Q. | WHAT IS YOUR RECOMMENDATION?  |
| 16             | Α. | Given that the Commission has directed the Company to reduce this balance in a    |
| 17             |    | prior Order, I am accepting this adjustment.                                      |
| 18<br>19<br>20 |    | e. <u>Pension Non-Qualified SERP –(\$2,000)(WP-A8)</u>                            |
| 21<br>22       | Q. | WHAT HAS THE COMPANY PROPOSED WITH RESPECT TO PENSION NON-QUALIFIED SERP?         |
| 23             | A. | The Company has proposed a reduction of \$2,000 which excludes all non-qualified  |
| 24             |    | pension expenses related to the Company's Supplemental Executive Retirement       |
| 25             |    | Plan (SERP). The Company stated that this treatment is consistent with the        |
| 26             |    | Company's last rate case in PU-20-441.  |
| 27             | Q. | WHAT ADJUSTMENTS DO YOU HAVE?   |

<sup>&</sup>lt;sup>8</sup> Differences between the \$938,000 and the \$937,711 balances are due to rounding issues.

1 Α. I am accepting the Company's adjustment in the reduction of \$2,000 as shown on 2 Company Exhibit BCH-1 Schedule 4 and Schedule 6. 3 WHAT ARE THE OTHER SPECIFIC ADJUSTMENTS HAS THE COMPANY Q. 4 PROPOSED IN THIS PROCEEDING? 5 Α. The Company has proposed the following Ratemaking Adjustments: 6 **Ratemaking Adjustments** 7 Aviation (\$120,000)WP-A10 a. 8 b. Dues – Chamber of Commerce \$ 33,000 **WP-A12** \$ 299.000 9 Foundational -Other **WP-A13** C. \$ 211,000 WP-A16 10 d. LTI-Environmental LTI-Time Base Incentive \$ 589,000 **WP-A17** 11 e. (\$151,000)12 Incentive Compensation **WP-A15** f. 13 Q. WHAT ADJUSTMENTS DO YOU HAVE REGARDING THE COMPANY'S RATEMAKING ADJUSTMENTS ABOVE? 14 15 My adjustments to each of the Company's Ratemaking Adjustments are as follows: Α. 16 17 Aviation – (\$120,000) (WP-A10) a. 18 19 WHAT HAS THE COMPANY PROPOSED REGARDING ITS AVIATION Q. 20 **EXPENSES?** 21 22 Α. The Company proposed to include 50% of the aviation – related costs allocated to the North Dakota jurisdiction. These costs were incurred in lieu of commercial 23 24 aviation transportation and help facilitate the efficiency use of executive time. (WP 25 A10). The Company has removed \$121,000 of Aviation related expenses. Mr. 26 Halama stated that the aviation – related costs are related to the operation of two 27 Xcel Energy corporate aircraft for use by Company personnel. (BCH-1 page 46). 28 WHAT REASONS WERE GIVEN BY THE COMPANY IN THE USE OF ITS 29 Q. **CORPORATE AVIATION COSTS?** 30 31 Α. According to Mr. Krug, aviation costs are incurred as part of its normal operations. 32 The use of corporate airplanes allow for efficient transportation of key employees 33 that require significant travel, including by allowing them to work while traveling to

- a degree that would otherwise be impracticable. (ADK-1 page 23). The Company stated it removed any non-business travel from the trips for which it seeks recovery and is only requesting 50% of the expenses to bring them closer in line with the costs of traveling using commercial airlines. (ADK-1 page 23).
- 5 Q. HAS THE COMPANY PROVIDED A COMPARISON OF COSTS BETWEEN VEHICLE USE AND AIRPLANE USE AND COMMERCIAL AIRPLANE USE?
- A. In response to Data Request Set 4-26, the Company stated that it does not have a comparison of aviation and Xcel Energy vehicle use, as the two are used for different purposes. Vehicles are used by employees who travel more than 1,200 miles per month for business purposes. Xcel Energy's aircraft are typically used for long-distance travel, which is important for Xcel given its geographical spread. Xcel Energy serves customers in eight different states from the desert Southwest to Western Wisconsin and a portion of the Upper Peninsula of Michigan.
- 14 Q. WHAT BENEFITS DID THE COMPANY STATE IN THE USE OF AVIATION –
  15 CORPORATE AIRCRAFT?
- 16 **A.** In response to Data Request 4-26, the Company stated that if commercial aircraft and ground travel were used, key company employees would spend much more time in transit. The use of Company aircraft benefits employees regarding time savings, increased in-flight productivity, scheduling convenience, lower stress and fatigue and personal security.

21

23

2425

26

27

28

29

30

### 22 Q. WHAT ADJUSTMENTS DO YOU HAVE?

A. I am recommending disallowing all Aviation Costs from rates, an additional adjustment of \$121,000 or a total disallowance of \$242,000. Mr. Krug noted that key employees use Xcel Energy's aircraft and are typically used for long distance travel. Although these travel flights appear to be specifically used for North Dakota operations as reflected on Company WP A10- Aviation page 3 of 3 and given the fact that the Company has not provided or prepared a cost-benefit analysis (commercial airplane usage and corporate airplane usage) there is no way to determine whether a 50% reduction in Company aircraft would be sufficient or

reasonable. While I am not condoning aircraft use per se, I am of the opinion that commercial costs are much less costly than the use of corporate aircraft. The savings that are inured to the use of corporate aircraft as stated by Mr. Krug can also be found in using commercial flights.

2

3

4

### b. <u>Dues-Chamber of Commerce - \$33,000 (WP-A12)</u>

7 8

9

19

Q.

# Q. WHAT HAS THE COMPANY INCLUDED IN ITS DUES - CHAMBERS OF COMMERCE?

- 10 Α. The Company has included Dues – Chambers of Commerce costs in the amount 11 of \$33,000 as a 2025 test year expense (WP-12) and also shown on Company 12 Exhibit BCH-1 Schedule 4 and 6. Company witness Mr. Halama stated that these 13 costs include membership dues paid to various Chambers of Commerce in North 14 Dakota and provide an essential link between the Company and the communities 15 it serves and allows for improved utility service. (BCH-1 page 47). Because 16 membership in these organizations provides benefits to all utility customers, 17 recovery of membership dues paid to Chambers of Commerce is appropriate. 18 (BCH-1 page 47).

WHAT ARE YOUR ADJUSTMENTS?

20 Α. I am recommending no recovery because this type of cost does not benefit North 21 Dakota ratepayers. This cost mainly serves to advance the policy positions before 22 State and Governmental agencies and to communicate its corporate citizenship 23 initiatives. Ratepayers should not be required to pay for such costs which provide 24 no benefit to utility service. It also appears that these costs are geared toward 25 being present in the communities, providing a welcoming atmosphere, small town 26 attention and recognition, tourism, professional interests, hometown promotions 27 and bringing businesses and communities together (WP-A12). None of these 28 costs represent customer-oriented benefits to the ratepayers of North Dakota. 29 Further, the Company has not provided whether these Chambers of Commerce

- 1 costs have actually provided customer benefits to the North Dakota ratepayers. 2 (Set 8-23)
- 3 c. Foundation and Other Donations -\$299,000 (WP-A13)

# 4 Q. WHAT HAS THE COMPANY INCLUDED IN ITS FOUNDATION AND OTHER DONATIONS?

A. The Company has included \$299,000 of costs related to Foundation and Other Donations. (Company Exhibit BCH-1 Schedule 4 and Schedule 6). The Company is proposing to include charitable contributions benefiting the State of North Dakota in the test year. Mr. Halama stated that an analysis was performed on contribution details to ensure that only amounts contributed to charities and institutions that could be associated with the Company's electric service territory in the North Dakota jurisdiction were included in the cost of service. (BCH-1 page 47).

#### 13 Q. WHAT IS YOUR RECOMMENDATION?

14

15

16

17

18

19 20

21

22

23

24

2526

27 28 Α.

I am recommending that zero dollars related to Foundation and Other Donations be included in the cost of service. The Company has not provided a breakdown of these costs, but rather allocations of costs between and among NSPM and its subsidiaries. Charitable Contributions in general, should be removed from the Company's cost of service because ratepayers do not have determine what type of contributions they are paying for. These types of payments do not benefit ratepayers, and as I stated above in the Chambers of Commerce section, only benefits the Company as being good corporate citizens. These costs should be funded below the line by the shareholders of the Company and receive a tax benefit through the corporate entity. The Company stated that these costs *benefit* the State of North Dakota, and not specifically the *ratepayers* of the Company or the service territories the Company provides electric service to. The Company should not be allowed to make customers pay for charitable contributions, especially those costs that do not provide specific benefits to its ratepayers. (Set 8-23)

# 1 Q. PLEASE EXPLAIN THE COMPANY'S LONG-TERM INCENTIVE (LTI) 2 PROGRAM?

According to Mr. Krug, the LTI is an incentive-based program that is available to the Company's most senior and executive level employees. Less than five percent or exempt and non-bargaining employees are eligible for the LTI. (ADK-1 page 20). The LTI is intended to incentivize senior employees to effectively manage the Company towards its overall corporate goals and in the best interest of customers and shareholders. The LTI provides a long-term incentive to Company leaders through the grant of Xcel Energy Inc. equity. (ADK-1 page 20). The employees who receive an LTI tend to be those who have a higher level of influence in the Company's direction and strategy and are also employees who are in positions that can be expensive and time consuming to fill. The LTI program helps retain these key employees and is necessary for Xcel Energy to remain competitive in the labor market. (ADK-1 page 20). The Company has three different LTIs: (1) Environmental Performance; (2) Shareholder Return and; (3) Time Based. These will be discussed below. The Company is not seeking recovery of its Shareholder Return.

 Α.

### d. LTI Environmental Incentive - \$211,000

## 21 Q. WHAT HAS THE COMPANY PROPOSED WITH RESPECT TO ITS LTI 22 RELATED TO ENVIRONMENTAL?

Α. The Company is proposing to recover \$211,000 related to its Environmental Incentive Program as shown on Company Exhibit BCH-1 Schedule 4 and 6 and WP - A16. In response to Data Request 8-19, the Company is proposing to include a 20% base salary cap in 2024 and 2025 which would be an increase in the recovery from the 15% of the base salary cap in 2023. Company witness Mr. Krug stated that the Company should be allowed to recover the environmental portion of its LTI expenses which is the portion of the program tied into the achievement of the Company's environmental goals. Xcel Energy stated that the technologies it would implement would result in efficiencies, allow for a lower cost

of capital and remove fuel costs addition to environmental and other benefits. (ADK-1 page 21). Mr. Krug stated that it is reasonable to recover the environmental components of LTI because they are consistent with key customer-focused goals of environmental excellence and efficient management and are necessary for the retention of key senior leaders. (ADK-1 page 21). See WP A-16)

#### 7 Q. WHAT ADJUSTMENTS DO YOU HAVE?

In response to data 8-19, since the goals for the 2025 LTI measures will occur in 2026, it is unknown whether the goals will be achieved until such time as the Company publishes its proxy in April 2026. In response to data Set 8-21, the environmental portion of the LTI depends on the achievement of those goals and thus unknown at this time. Also, in response to Data Set 8-22, the Company had a 20% turnover rate in 2024 related to retirements and employees pursuing other opportunities. It appears that the LTI incentive that was implemented to reduce turnover of key employees fell short of expectations. There I am recommending disallowance of the LTI- Environmental expense of \$211,000. My adjustment is shown on my Schedule DM-19.

Α.

### e. LTI- Time Based Incentive - \$589,000

# Q. WHAT HAS THE COMPANY PROPOSED WITH RESPECT TO ITS LTI-TIME BASED INCENTIVE?

Α.

The Company is proposing to recover \$589,000 of Time-Based Incentive as shown on Company Exhibit BCH-1 Schedule 4 and 6 and WP-A-17. Company witness Mr. Krug stated that Time Based Incentive is the portion of the LTI program tied to the length of key employees' service with the Company. Mr. Krug stated that customers benefit from the Company's ability to retain institutional knowledge and capabilities of key employees. (ADK-1 page 20). In response to Data Request 8-19, the Company is proposing to include a 20% base salary cap in 2024 and 2025 that would increase the recovery of the 15% base salary cap in 2023.

### Q. WHAT ADJUSTMENTS DO YOU HAVE?

Α.

It is my opinion that these types of incentive should not be recovered from ratepayers. These types of incentives do not appear to provide customer-oriented benefits to ratepayers but rather incentivize key employees to stay with the Company. In response to Data Request Set 8-22, implementation of this program did not reduce turnover rates for key employees and in fact 20% of the key employees did not remain with the Company. The Company should be responsible for absorbing these costs and not pass them onto ratepayers. My adjustment is shown on my Schedule DM-19.

### f. AIP Incentive Compensation – (\$151,000)

# Q. WHAT HAS THE COMPANY PROPOSED WITH RESPECT TO ITS AIP INCENTIVE COMPENSATION ADJUSTMENT FOR 2025?

A. The Company stated that it has adjusted the Incentive Compensation to reflect exclusion of the Annual Incentive Plan costs above 20% of base pay by \$151,000. (Company Exhibit BCH-1 Schedule 4 and 6 and WP-A15). Mr. Halama referred to the testimony of Mr. Krug with respect to additional recovery of certain incentive compensation expenses (BCH-1 page 49) and ADK-1 page 20).

# Q. WHAT INFORMATION HAS THE COMPANY PROVIDED TO SUPPORT ITS EXCLUSION OF 20% OF BASE PAY?

Workpaper WP-A15 reflected the change from the excess of 15% of base salary Α. of \$238,544 in 2025 to the excess of 20% of base salary of \$151,248 in 2025 or an adjustment of \$87,296. It is unclear where the reasoning to adjust the excess of base salary from 15% to 20% is reflected in the filing. In Mr. Krug Schedule 2 attached to his testimony, the 15% of base pay was based upon a settlement agreement in the Company's 2012 Electric Rate Case (PU-12-813). In response to Data Request Set 8-19, the Company reflected the AIP base salary cap increasing from 15% in 2023 and 20% in 2024 and 2025. 

### Q. WHAT RECOMMENDATION DO YOU HAVE?

A. I am recommending that the Company maintain the excess cap of 15% of base salary in the test year period. I find no reasoning or supporting evidence in the filing that supports the need to increase the excess cap to 20%. My recommendation adjusts the AIP from (\$151,000) to (\$238,544) or an adjustment of (\$87,296). This is shown on my Schedule DM-19.

A.

#### K. Depreciation Expenses

## Q. WHAT HAS THE COMPANY PROPOSED WITH RESPECT TO DEPRECIATION EXPENSE?

The Company proposed an Unadjusted Depreciation Expense balance of \$69,395,000 as shown on Exhibit BCH-1 Schedule 6. The Company proposed a Depreciation Expense balance in the TY 2025 of \$75,002,000, after making \$5,607,000 of adjustments related to Precedential Adjustments of \$1,003,000, and adjustments to its proposed Depreciation Study for (1) remaining life all other -\$743,000; (2) remaining life — base load \$6,443,000 and (3) Transmission, Distribution, and General - TD&G (\$89,000). Company witness Mr. Moeller stated that the Company is requesting a revision to the remaining lives related to its coal, nuclear, other and hydro production plants. (MPM-1 page 2). Mr. Moeller stated that the Company is proposing changes to its production, transmission, distribution, electric general and intangible, and common general and intangible assets. (MPM-1 page 2). (MPM-1 page 25 Table 2). The Company made the following adjustments to derive its proposed Depreciation Expense balance (Data Response 8-53):

| 24 | Unadjusted Balance               | \$6       | 9,394,581  |
|----|----------------------------------|-----------|------------|
| 25 | Precedential Adjustments:        |           |            |

| <ul><li>29</li><li>30</li><li>31</li><li>32</li><li>33</li></ul> | Α. | As I made adjustments to the Company's Sherco Barmaking a corresponding adjustment of (BEGIN CONFIDENTIAL) to remove the depreciation experiment. (Confidential response Set 20-1). My total Expense is (\$707,179) shown on my Schedule DM-20  | ense associated with this adjustment to Depreciation   |

- 1 Q. WHAT ADJUSTMENTS DO YOU HAVE WITH RESPECT TO THE COMPANY'S 2 DEPRECIATION STUDY THAT ADJUSTS THE COMPANY'S VARIOUS 3 PRODUCTION LIVES AS INDICATED ABOVE?
- 4 Α. As more fully discussed by Dr. Pavlovic in his testimony, I am including the 5 Company's adjustments to the various production lives for purposes of developing 6 my revenue requirement. Dr. Pavlovic has recommended that the Company 7 calculate the appropriate proforma adjustments to its Depreciation Expense and 8 Depreciation rates for its steam production plant to the Company's current 9 Depreciation Expense and Depreciation rates and expenses. Therefore, I reserve 10 my right to update my revenue requirement proposal once the Company has 11 provided the proper information and data to evaluate the development of its various 12 Depreciation Expenses.

13

14

### **Amortization Expense**

#### 15 WHAT HAS THE COMPANY PROPOSED WITH RESPECT TO ITS Q. 16 **AMORTIZATION EXPENSE?**

17 Α. The Company has proposed a total Amortization Expense of \$12,722,000 (Exhibit 18 BCH-1 Schedule 6). The breakdown is as follows:

| 19       |            | Unadjusted Balance                         | \$ 327,000               |
|----------|------------|--|--------------------------|
| 20       |            | Precedential Adjustment                    | \$10,440,000             |

33

Α.

In response to Data Set 13-1, the Company stated that the \$10.440 million of Precedential adjustments are related to PTC amortizations for the 2025 test year. In response to Data Set 2-7, the Company provided the calculations that reflect

| 1 | the normalized production tax credits consistent with the Company's last electric |
|---|---|
| 2 | rate case in Docket No. PU-20-441, and stems from the Commission and Staff's      |
| 3 | request to evenly distribute production tax credits (PTC) as per the 2020         |
| 4 | Renewable Energy Rider (RER) (Case No. PU-19-329).                                |

#### 5 Q. WHAT IS YOUR RECOMMENDATION?

**A.** After review of Data Set 2-7, I am accepting the Company's calculations related to the PTC credits of \$10,440,000.

8

6

7

### a). Prairie Island EPU Uprate - \$308,000

10

# 11 Q. WHAT HAS THE COMPANY PROPOSED REGARDING THE PRAIRIE ISLAND 12 EPU UPRATE?

13 Α. Mr. Halama stated that this amortization includes the impact of the abandoned Pl 14 EPU project costs over the remaining life of the plant through an amortization expense consistent with the outcome of the Company's last electric rate case. 15 16 (Halama Testimony page 53-54). In response to Data Set 8-43, Company witness 17 Mr. Shaw discussed the prudent decision to invest in the project and the 18 subsequent prudent decision to abandon the project. In the prior rate case and 19 consistent with the settlement the Parties agreed that all Company proposals not 20 explicitly addressed in the settlement are agreed to and shall be implemented as 21 proposed by the Company.

22 23

# Q. WHAT IS YOUR RECOMMENDATION WITH RESPECT TO THE COMPANY'S PRAIRIE ISLAND EPU UPRATE AMORTIZATION OF \$308,000?

242526

27

28

29

30

31

32

Α.

I am continuing to recommend disallowing the \$308,000 of amortization expenses related to the Company's Prairie Island EPU Uprate. My adjustment is reflected on Schedule DM-21. As I recall, this Project was abandoned and terminated based upon a business decision by the Company. Therefore, the risk of this abandonment should stay with the Company and not be passed onto ratepayers. This Project has never been used in the provision of electric utility service. Although the parties in the prior rate proceeding agreed to this issue, I am

Mugrace Direct PU-24-376 - p. 57

| 1<br>2      |    | continuing to recommend the disallowance of these costs in rates. My recommendation is shown on my Schedule DM-21.                                    |
|-------------|----|---|
| 3           |    |   |
| 4<br>5      |    | b). NOL ADIT ARAM - \$183,000   |
| 6<br>7<br>8 | Q. | WHAT HAS THE COMPANY PROPOSED WITH RESPECT TO ITS NET OPERATING LOSS, ACCUMULATED DEFERRED INCOME TAXES, AVERAGE RATE ASSUMPTION METHOD OF \$183,000? |
| 9           | A. | The Company is proposing to amortize the NOL ADIT ARAM over a 23-year   |
| 10          |    | period. The Commission's Order in PU-18-155 approved the Company's proposed   |
| 11          |    | amortization level included in the Tax Cuts and Jobs Act (TCJA) refund calculation.   |
| 12          |    | (Halama Testimony page 53). This adjustment is shown on Company Exhibit   |
| 13          |    | BCH-1 Schedule 6.   |
| 14          | Q. | WHAT ADJUSTMENTS DO YOU HAVE?   |
| 15          | A. | I am accepting the Company's proposal related to the \$183,000 amortization   |
| 16          |    | expense related to the NOL ADIT ARAM. My adjustment is shown on Schedule  |
| 17          |    | DM-21.  |
| 18          |    |   |
| 19          |    | c). AGIS Deferral - \$997,000   |
| 20<br>21    | Q. | WHAT HAS THE COMPANY PROPOSED WITH RESPECT TO ITS AGIS DEFERRAL AMORTIZATION?   |
| 22          | A. | Mr. Halama stated that in the Commission approved Settlement in Case No. PU-  |
| 23          |    | 20-441, the Company agreed to defer all capital and O&M expenses for its AGIS   |
| 24          |    | Initiative until the next rate case. (Halama Testimony page 52). In WP A26 the  |
| 25          |    | Company provided a breakdown of the AGIG Deferral balance of \$997,000. The   |
| 26          |    | Company included \$4,557,131 of Capital costs and \$1,422,388 of O&M Costs for  |
| 27          |    | a total of \$5,979,519. The Company then divided this balance by 6 years to arrive  |
| 28          |    | at an annual recovery of \$996,587.   |
| 29<br>30    | Q. | WHEN WAS THE AGIS INITIATIVE INITIALLY IMPLEMENTED AND PLACED IN SERVICE?   |

Α. In response to Data Request Set 8-64, the AGIS Initiative components had different deployment timeframes and is in a unique stage of development. The Company began implementing components of the AGIS in 2017 (Advanced Distribution Management System or ADMS) which was fully placed in service in 2022 and is currently being used to enhance the operation of the distribution system in North Dakota. The Geospatial Information System (GIS) was completed and in service in 2024. The Advanced Metering Infrastructure (AMI) completed the software and integrations in March 2025 and is planning to complete the deployment of AMI meters in 2025. The Company has installed 83,778 meters with about 14,683 meters remaining to be installed in 2025. The Field Area Network (FAN) was completed in 2025 with less than 10 remaining to be installed and completed in 2025. The Fault Location Isolation and Service Restoration (FLISR) components will continue to be installed through 2025. The Company included costs for plant in service through 2025 in the test year and plans to complete the FLISR deployment in 2027.

#### 16 Q. WHAT IS THE STATUS OF THE AGIS IN NORTH DAKOTA?

17 Α. Company witness Mr. Nickell stated that the Company has nearly completed the rollout of the AGIS Initiative in North Dakota and the ADMS and FAN devices are 18 installed, the AMI software and integrations are completed, and the Company will 19 complete the AMI meter installation in North Dakota by the end of 2025. (Nickell 20 21 Testimony page 18). In the Settlement Agreement in Case No. PU-20-441 the 22 Company agreed to defer the AGIS costs until such time as all foundations 23 elements of AGIS were in service. The deferral was designed to treat the 24 Company's capital and O&M expenses as if they were capital expenditures 25 included in CWIP.

#### 26 Q. WHAT ADJUSTMENTS DO YOU HAVE?

1 2

3

4

5

6

7

8

9

10

11

12

13

14 15

A. I am accepting the Company's inclusion of AGIS. However, I am recommending that the amortization period be extended to a period of 10 years based upon other amortization periods shown on Data Response 12-15. The Company has not

1 specifically stated how the 6-year amortization period was developed. Mγ 2 adjustment reflects an annual recovery of \$597,952 or a reduction of \$399,048 3 based upon a 10-year amortization period. This is shown on my Schedule DM-21. 4 5 Rate Case Expenses \$468,000 6 WHAT HAS THE COMPANY PROPOSED WITH RESPECT TO ITS RATE CASE Q. 7 **EXPENSES?** The Company has proposed to recover about \$1.403 million (\$1.403 million / 3 8 Α. 9 three years or \$468,000) of projected direct costs associated with this rate case 10 docket and a three-year amortization period. This three-year amortization period 11 is consistent with the Company's requested amortization period in prior cases. 12 (Halama Testimony page 54). 13 WHAT IS YOUR RECOMMENDATION? Q. 14 Α. I am accepting the Company's proposed rate case expense balance of \$1.403 The Company should provide updated actual costs to date, when 15 16 available. This is shown on my Schedule DM-21. 17 18 M. **Taxes Other Than Income Taxes** WHAT HAS THE COMPANY PROPOSED WITH RESPECT TO TAXES OTHER 19 Q. **THAN INCOME TAXES?** 20 21 As shown on Company Exhibit Schedule 3 page 2 of 4, and in Exhibit BCH-1 Α. 22 Revised Schedule 6, the Company proposed total Taxes other Than Income Taxes 23 of \$1,882,000.9 The breakdown representing the balance is as follows: 24 \$11,279,000 25 a) Property Taxes – Net 26 Deferred Income Taxes and ITC (\$11,319,000) b) 27 Payroll / Other \$ 1,922,000 c) \$ 1,882,000 28 **Total** 

<sup>&</sup>lt;sup>9</sup> Any differences due to rounding.

| 1 |  |
|---|--|
|   |  |

- 2 Q. HAVE YOU REVIEWED THE COMPANY'S METHODOLOGY WITH RESPECT
  3 TO THE DEVELOPMENT AND CALCULATIONS OF THE COMPANY'S
  4 PROPOSED BALANCE RELATED TO ITS TAXES OTHER THAN INCOME
  5 TAXES?
- A. Yes. As I stated previously according to the Company, the Company utilizes
  Utilities International Regulatory Information System to develop the cost of service
  models and produce testimony schedules, therefore, some LIVE excel model
  versions of schedules are not available. (Data Response 8-38 and 12-1). The
  information is system generated and are not workpapers with underlying formulae.
  Given this information my adjustments reflect my best estimations and
  approximations with the information provided by the Company.
- 13 Q. PLEASE EXPLAIN YOUR ADJUSTMENTS TO THE COMPANY'S TAXES OTHER THAN INCOME TAXES.
- 15 **A.** I am making the following adjustments to the Company's Taxes other than Income Taxes:
- 17 <u>a) Property Taxes</u>
- 18 Q. WHAT HAS THE COMPANY PROPOSED REGARDING PROPERTY TAXES?
- 19 **A.** The Company has proposed a balance to its Property Taxes of \$11,470,000 as reflected on Company Exhibit BCH-1 Schedule 6.
- 21 Q. WHAT ADJUSTMENTS DO YOU HAVE?
- Since I disallow certain EPIS projects related to the Larimore Station and the AGIS 22 Α. LTI Private Network, I am making an adjustment to disallow property taxes 23 association with the Company's proposed electric plant in service balance. I 24 25 utilized the Company's proposed plant in service balance of \$1,778,568,000 and divided that balance by the Company's recommended Property Taxes of 26 27 \$11,470,000 to arrive at a Property Tax percentage of 0.64490%. I then multiplied 28 my adjustment of \$15,712,601 by the Property Tax percentage of 0.644905% to arrive at an adjustment of \$101,331. This is shown on my Schedule DM-22. 29

30

| 1  |    | b) PI-EPU Amortization   |
|----|----|--|
| 2  | Q. | WHAT ADJUSTMENT DO YOU HAVE WITH RESPECT TO THE COMPANY'S                          |
| 3  |    | PI-EPU AMORTIZATION?   |
| 4  | A. | Since I made adjustments to disallow the PI EPU Uprate Recovery in the             |
| 5  |    | Company's EPIS Balance, and other various adjustments to that, I am adjusting      |
| 6  |    | the related Deferred Income Tax associated with it. I am removing \$112,000 (WP    |
| 7  |    | A19) to arrive at a zero balance. (Schedule DM-22).                                |
| 8  |    | c) Payroll – (Adj.) \$ 1,922,000   |
| 9  | Q. | WHAT ADJUSTMENT DO YOU HAVE WITH RESPECT TO THE COMPANY'S                          |
| 10 |    | PAYROLL BALANCE?   |
| 11 | Α. | I did not adjust the Company's Labor balance. I adjusted the Company's Incentive   |
| 12 |    | Compensation. I am making the associated adjustment to the Company's Payroll       |
| 13 |    | Taxes and Others. I utilized the Company's O&M Labor assigned to the North         |
| 14 |    | Dakota jurisdiction and the Company's proposed Payroll of \$1,923,000 to arrive at |
| 15 |    | a 10.436% ratio. I then took the adjusted Incentive Compensation and multiplied    |
| 16 |    | the balance by 10.436% to calculate a Payroll adjustment of \$92,624. I reduced    |
| 17 |    | the Company's proposed Payroll Expense by that amount to arrive at my Payroll      |
| 18 |    | Expense balance of \$1,830,376. For the Aviation related Payroll, since I removed  |
| 19 |    | all Aviation related expenses, I am removing an additional \$1,000 of Payroll      |
| 20 |    | Expense.   |
| 21 | Q. | WHAT IS YOUR LAST ADJUSTMENT TO THE COMPANY'S TAXES OTHER                          |
| 22 |    | THAN INCOME?   |
| 23 | A. | As I removed the Sherco Battery Investment from the revenue requirement            |
| 24 |    | calculation, I am removing the associated Taxes other than Income Taxes of         |
| 25 |    | (BEGIN CONFIDENTIAL) (END CONFIDENTIAL) as shown in response                       |
| 26 |    | to Confidential Set 20-1.  |
| 27 | Q. | WHAT IS YOUR TOTAL ADJUSTMENT RELATED TO THE COMPANY'S                             |
| 28 |    | TAXES OTHER THAN INCOME TAXES?   |

| 1        | A. | My adjustment is a decrease of \$111,116 or a balance of \$1,770,884. This is                      |
|----------|----|--|
| 2        |    | shown on Schedule DM-22.   |
| 3        |    |  |
| 4        |    | N. State Income Taxes  |
| 5<br>6   | Q. | WHAT HAS THE COMPANY PROPOSED WITH RESPECT TO ITS STATE INCOME TAXES?                              |
| 7        | A. | The Company proposed a State Income Tax Expense of \$832,000 as shown on                           |
| 8        |    | Company Exhibit BCH-1 Schedule 3. The Company utilized a 4.31% State Income                        |
| 9        |    | Tax to arrive at the balance of \$882,000. This balance incorporates the State Tax                 |
| 10       |    | Credit of (\$158,000).   |
| 11       | Q. | HOW DID THE COMPANY COMPUTE ITS STATE INCOME TAX?  |
| 12       | Α. | The Company computed its State Income Taxes by using the Statutory State Tax                       |
| 13       |    | Rate of 4.31% (Exhibit BCH-1 Schedule 3), and computed total book income, tax                      |
| 14       |    | additions and deductions to determine the taxable income that is used to calculate                 |
| 15       |    | federal and state income taxes (Exhibit BCH-1 page 36). The utilization or                         |
| 16       |    | generation of net operating losses or tax credits impact both deferred federal                     |
| 17       |    | income taxes and federal and state income taxes.   |
| 18<br>19 | Q. | HOW DID YOU COMPUTE YOUR STATE INCOME TAXES FOR PURPOSES OF THIS PROCEEDING?                       |
|          | _  |  |
| 20       | Α. | I utilized the Company's methodology, and the flowthroughs of my adjustments to                    |
| 21       |    | Operating Revenues, Operating Expenses, Depreciation and Amortization                              |
| 22<br>23 |    | Expense, and Rate Base related adjustments, to compute my recommended State Income Tax adjustment. |
| _0       |    | meente rax adjustment.   |
| 24       | Q. | WHAT IS YOUR STATE INCOME TAX EXPENSE?   |
| 25       | A. | My State Income Tax Expense is (\$557,757), an increase of \$274,240 from the                      |
| 26       |    | Company's proposed State Income Tax Expense of (\$832,000). This is shown on                       |
| 27       |    | Schedule DM-23.  |

O. Federal Income Taxes

1

| 2                     | Q. | WHAT HAS THE COMPANY PROPOSED WITH RESPECT TO ITS FEDERAL INCOME TAXES?  |
|-----------------------|----|--|
| 4<br>5                | A. | The Company has proposed a Federal Income Tax Expense of (\$5,951,000) as shown on Company Exhibit BCH-1 Schedule 3.   |
| 6                     | Q. | HOW DID THE COMPANY COMPUTE ITS FEDERAL INCOME TAX EXPENSE?  |
| 7<br>8<br>9<br>0<br>1 | Α. | The Company computed its Federal Income Taxes by using the Statutory Federal Tax Rate of 21.00% and computed total book income, tax additions and deductions, which determine deferred income taxes and the resulting taxable income that is used to calculate federal and state income taxes (Halama Testimony page 32). The utilization or generation of net operating losses or tax credits impact both deferred federal income taxes and federal and state income taxes. |
| 3                     | Q. | HOW DID YOU COMPUTE YOUR FEDERAL INCOME TAXES FOR PURPOSES OF THIS PROCEEDING?   |
| 5<br>6<br>7<br>8      | A. | As I calculated the Company's State Income Taxes, I have used the same methodology to calculate the Company's Federal Income Taxes, using the same methodology and the flowthroughs of my adjustments to Operating Revenues, Operating Expenses, Depreciation and Amortization Expenses, and Rate Base related adjustments.  |
| 20                    | Q. | WHAT IS YOUR FEDERAL INCOME TAX EXPENSE?   |
| 21<br>22<br>23        | A. | My Federal Income Tax Expense at Present Rate Revenue is (\$4,671,645), an increase of \$1,278,613 from the Company's proposed Federal Income Tax Expense of (\$5,951,000). This is shown on Schedule DM-24.   |
| 24                    | Q. | DOES THIS CONCLUDE YOUR TESTIMONY?   |
| 25<br>26              | A. | Yes, it does. I reserve the right to amend my direct testimony and schedules as discussed above and based on any additional information received.  |

#### **DANTE MUGRACE**

| Bureau Chief/Administrative Analyst/Accountant – New Jersey Board of |                |  |
| Public Utilities   | 1983 - 2011    |  |

### Professional Experience

Mr. Mugrace has 35 years' experience in all aspects of regulatory accounting and policy including processing, analyzing and evaluating utility rate case petitions before Public Service Commissions. Mr. Mugrace examines and evaluates rate filings, contracts, agreements and rate matters regarding utility operations and provides recommendations as to best course of action. Additionally, Mr. Mugrace analyzes and reviews utility regulatory matters and sets forth recommendations for resolution of issues, calculates total revenue requirement needed to cover operating expenses and rate of return; researches and evaluates regulatory utility matters to assess impact on various classes of customers, regarding rates, service, compliance and cost of service provisions, as well as annual true-up and tracking mechanisms.

Prior to undertaking consulting assignments, Mr. Mugrace was the Bureau Chief Utility Rate Manager for the New Jersey Board of Public Utilities, in which role he managed and assigned tasks to a staff of 12 professionals and supervisory personal in the daily administrative, financial and managerial functions of the Division. Mr. Mugrace's primary duties were to determine whether the utility had sufficient revenues to cover its operating expenses and earn a return on its plant investment and to ensure that the utility provided safe, reliable and continuing utility service to its customers. Mr. Mugrace set rates and charges for utility companies, which had revenues of up to \$500 million, and ensured that the revenue requirement provided for recovery of all operating expenses, return on investment and depreciation. Mr. Mugrace was also responsible for reviewing and verifying that the companies' property, plant and equipment (up to \$2.5 billion) were used and useful in providing service to its customers. Mr. Mugrace coordinated and met with the New Jersey State Department of Environmental Protection to

determine whether water and wastewater utilities were complying with state regulations and were adhering to any regulatory agency directives or orders. Mr. Mugrace developed ways to minimize the rising costs of water utility services by investigating alternative rate structures, analyzing engineering mechanisms and techniques, looking into the feasibility of mergers and acquisitions within the water industry and reviewing financing, and rate alternatives to minimize the impact on ratepayers. Mr. Mugrace was responsible for ensuring that the rate-case process adhered the statutory timeframe for preparing, reviewing and recommending findings to the Board Commissioners on financial operations, costs, revenues and operating expenses, prior to the litigation proceedings. Mr. Mugrace also examined alternative rate recovery mechanisms and clauses, phase-ins of revenue requirements, deferral mechanisms and pass-through of rate charges. Mr. Mugrace assumed the role of Director during transition periods and Administrative changes. Finally, Mr. Mugrace conducted the recruitment and hiring of employees for placement within the Division and the Board.
