Hello,

I've made the requested changes and attached the revised documents for your review before I submit the full packet. Please see the summary of updates below:

1. **SPGM Removal Column Added to Table O-1** – This was included to clarify the sequence and timeline of SPGM removal activities.
2. **Clarification for Pit G-2** – The updated Table O-1 now includes SPGM Removal by quarter/year, which should address any confusion regarding the timing of activities in pit G-2.
3. **D-3 Removed from Page R-7** – As noted by PSC, subsoil will be backfilled into D-3 during the worst-case reclamation bond period, so D-3 has been removed accordingly.
4. **Reclamation Cost Updates** – Revegetation costs now include 15 acres of mining disturbance. The entire spreadsheet has also been updated to reflect the most recent variable costs.
*****Table E-1 Updated** – The mining years for pit H-2 have been revised to align with the updated Table O-1.

Please let me know if you have any questions or need any additional information.

Thank you,

Miroslav Zvyagelskiy

Hello Jonathan,

Thank you for your response. I'll be submitting this later this week. As we've done in the past, we'll mail out the new notarized application and submit the full application with supporting documents via email.

Please let me know if you'd prefer we proceed differently.

Good morning,

Regarding the PSC technical review dated August 8, 2025 — should we submit only the revised documents mentioned in the review letter along with a new notarized application, or do you prefer we resubmit the full June 6, 2025, application package with the updates included?

Thank you,

Miroslav Zvyagelskiy

Hello,
I have a question regarding the technical review comment related to adding bookmarks to the permit PDF (see below):

General

Please separate the permit PDF into bookmarked sections to simplify navigation of the permit. Currently, the only bookmarked section of the permit is the Legal Description of the Permit Area. (JAR)

Could you please clarify how you'd prefer this to be done? Since the sections are saved separately and compiled into a complete PDF before submission, I want to make sure I format it correctly.

Would you like bookmarks for each individual page (e.g., L-2, L-3, L-4...), or would you prefer broader bookmarks by section (e.g., Legal Requirements, Technical Requirements, Environmental Resources, etc.)?

Thank you,

Miroslav Zvyagelskiy
