In re: ONEOK Bakken Pipeline, L.L.C.
Tioga Extension Pipeline Project - Williams County
Siting Application
Case No. PU-25-172
Our File No. 072591-000011

Dear Mr. Kahl:

Enclosed for filing on behalf of ONEOK Bakken Pipeline, L.L.C., please find eight copies of the NDPDES Discharge Permit regarding the above-referenced matter.

Please feel free to contact me if you have any questions. Thank you.

Sincerely,

Casey A. Furey

Re: NDPDES Permit No. NDG071055

The North Dakota Department of Environmental Quality (department) has received your “Application for Permit to Discharge – Wastewater Temporary Discharge NOI” and have granted authority to discharge under the General Permit for Temporary Discharge Activities – Permit NDG070000. Your facility has been assigned permit no. **NDG071055**. This permit has been issued by the department with the understanding that all other applicable permits and permissions have been obtained for the start of the following project. The application indicates that the discharge(s) will consist of dewatering discharges that will be filtered through geotextile fabric dewatering bags and/or straw hay bale structures and released to well-vegetated uplands or within the project right-of-way. Discharge points will be protected to prevent erosion. If upland discharge is not possible, straw bale structures with filter bags will be used for added filtration near sensitive areas.

<u>Discharge Point</u>	<u>Volume (g/day)</u>	<u>Description</u>	<u>Lat/Long</u>
001		Wastewater	48.48580,-102.89982: Williams County
002		Wastewater	48.48463,-102.89946: Williams County
003		Wastewater	48.48973,-102.89706: Williams County
004		Wastewater	48.44692715340471,-102.89646546603487: Williams County

In the event of a discharge, all discharge points shall be inspected daily. On a daily basis, record the total volume of discharge and make a visual inspection for Oil and Grease. Analytical parameters for pH and Total Suspended Solids (TSS) shall be tested for this project. The parameter for Oil and/or Grease is waived unless a sheen is observed in the discharge; if observed then collect a sample for Total Petroleum Hydrocarbon (TPH). The department shall be contacted on all findings of Oil and Grease. All discharges made directly to a surface water body or wetland shall be inspected closely in order to minimize any turbidity issues. Best Management Practices (BMPs) must be used to minimize the impact of the discharge.

ADDITIVES: No additives were reviewed for this project.

You or a member of your team is currently signed up to submit DMRs through the department's Combined Environmental Regulatory Information System – North Dakota (CERIS-ND). All DMR reports will be submitted through CERIS-ND. The reports cover three months each

If any other testing is conducted during this project, copies of the results of any such test should be forwarded to the department. **Should you wish to no longer be covered under this permit, you must submit a written request to terminate and cite the reasons for termination.** Coverage shall be maintained until a written notification to release has been issued to the permittee by the department. Should you have any questions about your permit or how to complete the DMRs, please contact me at (701) 328-6032.

Sincerely,

A handwritten signature in blue ink, appearing to read "Ben Westercamp", with a long horizontal flourish extending to the right.
