**SUBJECT: DISA Letter of Intent to AT&T to obtain Service at Bismarck for 3000 DIDs
Referencing TSR# WW07MAR255191 / NPA Rate Center BISMARCK for 3000 Total DIDs**

Robin Jenkins
3033 Chain Bridge RD.
Oakton, VA 22124

Dear Robin, North Dakota National Guard (NDARNG), has modernized its communications capabilities at 432 Fraine Barracks Road, Bismarck, ND 58501. Based upon US Department of Defense Unified Capabilities guidelines which include migration to VoIP access for commercial voice services. AT&T has been selected as the local services provider for VoIP Trunking services and an order has been placed for the equivalent of 100 PRI(s) in concurrent call capacity along with a request for a block of 3,000 new contiguous telephone numbers.

The requested block of 3,000 contiguous public telephone numbers is required for compatibility with the existing Department of Defense dial plan and to support migration to the new platform without impacting operations. Furthermore, NDARNG directly supports the Department of Defense (DoD) and the public interest as its primary customers.

NDARNG is requesting that a block of 3,000 contiguous DID's be allocated to AT&T with BISMARCK Rate center to accommodate the growing requirements of NDARNG. The support of AT&T Business in issuing the requested 3,000 block is critical to achieving this goal. The requested DID's will be direct extension dial. In addition, there will be tremendous use of DIDs for such application as voice conferencing, audio/visual, call centers for external advisories, etc.

A non-contiguous DID range or a block of fewer numbers will seriously impact NDARNG operational capabilities at NDARNG and the services provided to civilian staff. If the Commission is not able to assign a new contiguous 3,000 DID block, we will not be able to align our dial plan to Department of Defense standards which will have a tremendously adverse impact on government defense operations, training, and support.

NDARNG is hoping to activate these numbers on or before 30 June 2025, based on the contractually required customer requested due date. This is a New request; therefore, the customer will not be returning any numbers to AT&T.

Should there be any question or concerning the aforementioned, please do not hesitate to contact me promptly.
