NOV-2501_Sample_Results_rvsd_AL_9-5-25.pdf; P9160326.JPG;

My inspection report contains the following draft language regarding NOV-2501. See attached photo.

-
MISCELLANEOUS

The NOV-2501 area was inspected. Contaminated topsoil has been removed from portions of the NOV area and replaced in accordance with the remediation plan. The NOV area was disked after the soil had been replaced. However, gray colored soil was observed on the surface of an area approximately 35 feet wide and 100 yards long as depicted in photograph P9150326. It was suggested that WBM remove this contaminated soil and replace it with non-contaminated topsoil.
