**RE: 2024 ANNUAL RENEWABLE ENERGY OBJECTIVE STATUS
REPORT**

Dear Mr. Kahl:

This document is the report of Otter Tail Power Company (Otter Tail or Company), to the North Dakota Public Service Commission on the Company's efforts and status on compliance with the North Dakota Renewable and Recycled Energy Objective contained in N.D.C.C. §49-02-24 through §49-02-26 and §49-02-28 through §49-02-34. This report is required annually commencing on June 30, 2009.

In general, renewable energy credits (RECs) are either retired or sold to demonstrate compliance with the various renewable energy standards and objectives in the states in which the Company operates and to ensure an orderly and accurate accounting of RECs across the industry. Consistent with the letter from Commission staff dated May 6, 2016, where investor-owned utilities, including Otter Tail, were instructed to "establish a systematic program to sell all RECs remaining after 2015 and all RECs generated after 2015", the Company plans to continue to sell all or as many of the North Dakota RECs as possible that are generated each year going forward. The Company will pass all North Dakota allocated REC sale proceeds on to North Dakota customers.

We will continue to look for optimal sale opportunities in the REC market for our inventory of North Dakota RECs for the benefit of our retail customers.

INTRODUCTION

Pursuant to North Dakota Century Code §49-02-34, Otter Tail Power Company (Otter Tail or Company), makes this information filing electronically to the North Dakota Public Service Commission. This filing is the Company's annual report on efforts to meet the state renewable and recycled energy objective that 10% of all electricity sold at retail be obtained from renewable and recycled energy sources by 2020.¹

¹ N.D.C.C. §49-02-28.

NORTH DAKOTA RENEWABLE AND RECYCLED ENERGY

The following data is for the January 1, 2024 – December 31, 2024, time period. The data assumes that energy from renewable energy resources is allocated across the Otter Tail system based on retail sales kWh. The exception to this allocation methodology is that TailWinds energy is based on the amount of wind energy sold under the green pricing program in North Dakota. Pursuant to N.D.C.C. §49-02-34, the hydroelectric energy shown in the table below does not count toward compliance but can be subtracted from retail sales before calculating the percentage of compliance.
