Dear Konrad Crockford,

Re: ND Century Code 49-23

Response to Magellan Midstream Complaint

I Tyler Binstock take responsibility for what occurred 7/9/2025 on 5600 13th ave N, Fargo. I did have a one-call ticket when we started the project the previous year 7/16/2024 Ticket #24083518. At that time, I had talked extensively with the Magellan representative Paul Klabunde about where his pipeline was and how deep. I knew to stay 25 feet off of the pipeline area and had emphasized it to everyone on site as well. We were not performing any excavation of the area, only adding soil to the lot that shared easement with the Magellan pipeline. Siteworks Unlimited nor myself were responsible for any of the underground or subsurface work performed on 5600 13th ave N.

I may have been misinformed but I was under the impression that you did not need a one-call ticket to add soil onto the lot, and we had all other permits in place to build up the grade of the lot. We did not add any material on top of the pipeline, just onto the edge of the easement that was marked and measures off of the plans that were given to us by the general contractor for grading notes.

Looking back, I should have renewed my locates from 2024, and at the time it totally gapped my mind as I was thrown into a new role at our company, I do take full responsibility and hope This mistake does not reflect on my growing company in a negative light. Since this mistake, I have completed another project with an easement with Magellan and coordinated with ND One Call as well as mike from Magellan to make sure we are doing everything correctly.

Thank you for your time,

Tyler Binstock
