Montana-Dakota Utilities Co. Annual Update to the Transmission Cost Adjustment

Effective November 1, 2025

On July 15, 2025, Montana-Dakota Utilities Co. (Montana-Dakota) filed an application with the North Dakota Public Service Commission (Commission) to update its Transmission Cost Adjustment (TCA) rates in accordance with the Company's Transmission Cost Adjustment Rate 59 tariff that states the rates will be revised annually to reflect the current level of costs to be recovered.

The proposed TCA rates include North Dakota's allocation of transmission related net expenses assessed by both the Midcontinent Independent System Operator (MISO) and the Southwest Power Pool (SPP) for transmission-related services currently not being recovered through the Company's electric service rates, the inclusion of specified transmission related capital projects, and a projected under-recovery of the deferred TCA balance.

On October 23, 2025, the Commission approved Montana-Dakota rates effective with service rendered on and after November 1, 2025. A typical residential customer using 800 kWh will see an increase of \$3.13 per month or an increase of \$37.56 annually. The TCA is shown as a separate line item on your bill.
