**Subject:** RE: Badger Wind - Distribution Power

Hey Jon,

Beings' you guys predict 4MWs we will leave you on the rate from my previous email. If you were to peak at 5MW or more, we would have to re-evaluate the rate class, and you would more than likely fall under the rate below.

Facility charge - \$8,000.00 per month  
All energy charge - \$0.0380 per kWh  
Demand Charge: - \$20.78 per kW  
Capacity Charge: - \$1.50 per kW

Yes, you will have one account with three service locations like you mentioned below.  
Yes, Lee will be sending some paperwork soon for you guys to sign before the AQ request can be submitted.

Thanks,  
Dale

**Subject:** RE: Badger Wind - Distribution Power

Thanks, @Dale. I don't expect us to come close to 5MWs, but do you mind sharing the rates/charges for that class?

**KEM0129**

And just to summarize, we will have three service locations on our account, correct?

- O&M building,
- Collector/project substation, and
- No-Load from Transmission System.

Also, can you give us a heads up when that delivery point is added and confirmed by MISO?

Thanks.

Some people who received this message don't often get email from [dnagel@kemelectric.com](mailto:dnagel@kemelectric.com). [Learn why this is important](#)

Hey Andrew,

We will not need a separate agreement for the project no-load energy use; it will just be another service location on the account.(unless this service falls under a different company) KEM just needs to submit the delivery point request which will be completed next week.

Also, I don't believe this rate was shared with you so please see below rate regarding this. (If load matches or exceeds 5MW it will fall under a different rate class)

Facility charge - \$2200.00 per month

All energy charge - \$0.0680 per kWh

Demand Charge: - \$22.28 per kW

Thanks,  
Dale

**Subject:** RE: Badger Wind - Distribution Power

Hi Kevin,

Assisting Amanda while she is OOO. We understand that we will need a third agreement, specifically for receiving power backfed through the Wishek substation, for project no-load energy use while we are not producing; i.e. we will not be pulling power from the local distribution system but directly through MDU's system. Is that a separate agreement than the ones below?

Best regards,

**Andrew Gallagher**

**Subject:** Re: Badger Wind - Distribution Power

Kevin,

Thanks for confirming the paperwork.

Today I can provide updates on the following two items in blue. We are still looking into the max demand for backfeed from the Wishek substation.

- Max demand for Badger collector substation and O&M building:

**KEM0132**

- Collector substation:
  - The total connected load is 172.3 kVA. A 167 kVA transformer will be installed to serve the collector substation.
  - 800A switches will be installed
- O&M building:
  - The total connected load is 158.507 kVA. A 167 kVA transformer will be installed to serve the O&M building.
  - 800A switchboard will be installed
- Confirmation of single or 3-phase power:
  - It will be single phase.

Finally, it's my understanding that Blattner has been working with you all at KEM onsite regarding the placement. Is my understanding correct?

Thanks and have a great weekend!

**Subject:** Re: Badger Wind - Distribution Power

Hi again Dale and Kevin,

I apologize for the double email. However, I wanted to follow up because in addition to getting the agreement in place for the installation, we are also tracking the station service agreement that we will need to have in place to pay for Orsted's use of power from the transmission system at times when we need power from the grid. Could we start working on this station service agreement in parallel with the installation agreement? Please let me know if you would like to schedule a call to talk through this further.

Thanks and have a great weekend!

Hey Andrew,

I have added Kevin to this email as he has been the one working with Blattner. If Blattner will be spearheading the service size and placement for your O&M building it maybe be easier to just have Kevin work with them to get everything done and when construction is complete, we can do an account transfer into Orsted. If you would rather that service be installed under Orsted right away Kevin can work with you on size and placement as well as the paperwork and AIC to get this service installed.

We can accommodate whatever you prefer, please just let Kevin or myself know which route you would like to take.

Thanks,

**Dale Nagel**
