

To Whom It May Concern,

I am writing in response to the letter we received on February 13, 2026.

We were first notified of this issue on August 15, 2025 via email from Dillon Langerud with MDU, the company through which we are contracted. In that email, Dillon forwarded a photo and an As-Built diagram he had received from Justin Smith with the City of Watford City showing an MDU line passing through a sewer line. Please see the attached email for reference.

The bore in question began on August 21, 2023 and was completed on August 22, 2023. Attached is the As-Built showing this, with Bore #5 being the relevant bore. The bore profile is also attached and includes the original date. We have also included the two locate tickets associated with this work -Ticket #23093332 and Ticket #23093333- which were current and valid for the work performed.

When we were notified of the problem, we immediately entered into discussions with Dillon Langerud (MDU), Justin Smith (City of Watford City), and Red Morvan (Prairie Heights). During these conversations, all parties acknowledged that the line struck during our bore had not been located. Justin explained to Dillon and me that the city had previously turned this line over to the owner, Prairie Heights, though Red appeared unaware of this transfer. There was a dispute between the City and Prairie Heights regarding who was responsible for locating the line. There was also discussion regarding why the sewer line was installed at such a shallow depth. Justin reiterated to Red that the line was private and therefore the responsibility of Prairie Heights- not the city.

Throughout this project, we exercised due diligence. We had active locate tickets and were in regular communication with Justin from the City regarding existing water and sewer utilities. He provided maps for utilities within our work area- some precise and some approximate- and additionally provided contact information for private utility owners when applicable. Prairie Heights was not identified to us as one of those private owners. We spent additional time hydro-vacating to expose and confirm known utilities in order to avoid any damage. See the attached emails to help further document this process.

Response to North Dakota One-Call Complaint

Extreme Underground HDD LLC

We maintain open and proactive communication with all utilities identified on our locate tickets, and we ensure all lines within our bore path are located before we begin work. However, for any utility not identified and not located, we have no way to know it exists- particularly in directional drilling, where underground visibility is not possible.

Based on the information provided to us at the time of the work, the communication we had with the City and MDU, and the valid locate tickets covering the work area, we believe we met all required obligations and performed our duties responsibly and in accordance with the standard industry practice.

Please let us know if any further information or documentation is needed.

Sincerely,

Joelene Haller
CFO/Corporate Secretary

Attachments: IMG_0450.jpeg

Hey Danny,

The City sent me this attached picture of an 8" sewer line, this is at the Prairie Heights Apartments just south of the MDU shop. This looks like it is the 500 circuit from the Underbuild project we had done in 23'. Call me when you get a chance today and we can discuss next steps.

Hello Danny,

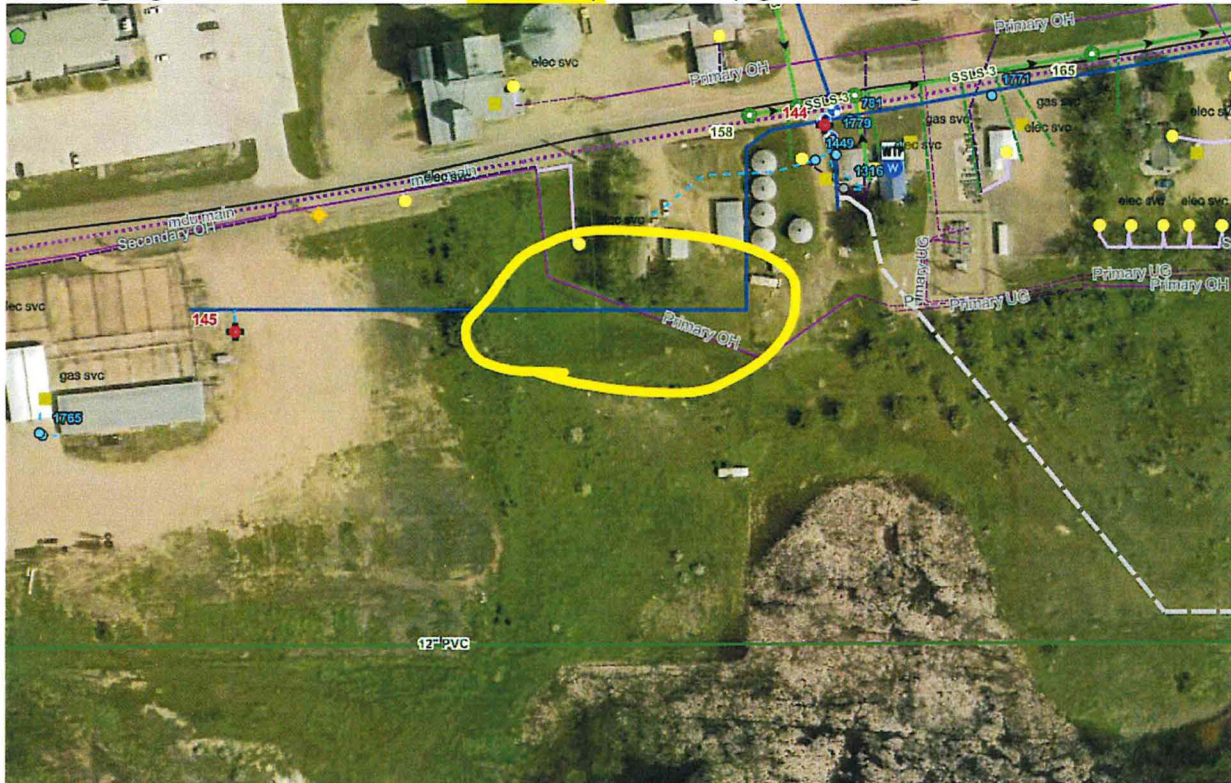

Just in case the message wasn't conveyed the first time...

- 1) Private 6" water and 2" sewer crossing in this vicinity. Won't be marked. Owned by vet clinic. Contact Bruce – 208-255-8983.

Please daylight. Not sure of depth... Let Jason know if you want the water turned off while crossing.

2) 6" WM going to Livestock Association. Not 8' deep. Please daylight if crossing...

Justin,
Thanks for the information. Once in the area we will contact the owner and then verify the water and sewer.
