Subject: PU-25-304 Proposed Longspur Wind Project Morton County, ND

Mr. Kahl,

The Department has a number of concerns about the project, including concerns about pre-construction and post-construction surveys, impacts to native grasslands, and the mitigation of those impacts. We are currently trying to work through these concerns with the developer and the Department of Agriculture. A meeting has been arranged for April 30th and when these conversations are concluded, we will provide a more thorough letter addressing any lingering concerns.

Sincerely,

A handwritten signature in black ink, appearing to read "Bruce Kreft".

Bruce Kreft
