**Re: Cost of Gas Adjustment (COG) Rate 88 and Rate 99
Case No. PU-25-007**

In accordance with North Dakota Century Code Section 49-05-05, Montana-Dakota Utilities Co. (Montana-Dakota) electronically submits a Cost of Gas (COG) – Natural Gas change pursuant to the terms of Rate 88. Montana-Dakota will not seek a COG – Propane adjustment for the month of February 2026 for Rate 99.

The COG Adjustment tariff (Rate 99), Section 2(b) provides that “Montana-Dakota shall file to reflect changes in its average cost of gas supply only when the amount of such COG is at least 25 (twenty-five) cents per dk.” For Rate 99 – Propane, the COG adjustment for the month of February 2026 results in a change of less than 25 cents per dk, and therefore, in accordance with the authorized tariff, Montana-Dakota will not seek a COG adjustment change for the month of February 2026.

The Rate Summary Sheet (40th Revised Sheet No. 3 and 8th Revised Sheet No. 3.1) showing the proposed natural gas rates reflecting the COG effective February 1, 2026, along with currently effective distribution rates, is provided in Exhibit 1. The net effect of this filing, calculated pursuant to the terms of Rate 88, is a decrease of \$0.337 per dk for residential customers and firm general customers, a decrease of \$0.340 per dk for small and large interruptible customers, and a decrease of \$0.338 per dk for Air Force interruptible customers.

Montana-Dakota purchases gas supplies under a number of contracts and secures transportation service over a number of pipelines for delivery of the natural gas purchased to Montana-Dakota’s distribution system to meet the demands of its customers. The commodity component of the purchased gas adjustment has decreased \$0.336 per dk since the January 1, 2026 rates due to a decrease in the overall commodity price of gas purchased and withdrawn from storage. In addition, there was an update to the allocation of Demand and there were changes in pipeline and other costs resulting in an overall decrease of \$0.001 per dk.

The following Exhibits are provided in support of the COG rates to be effective February 1, 2026:

- Exhibit 2 summarizes the cost of gas adjustment, the surcharge adjustment, and the grain drying margin sharing adjustment calculated pursuant to the terms of Rate 88 that will apply during the month of February 2026.
- Exhibit 3 shows the calculation of the current gas cost adjustment that will be applicable to Montana-Dakota's customers for the month of February 2026 along with an explanation of the reasons for the decrease in the market price of gas. The average cost of gas for firm customers, adjusted for losses, is \$5.335 per dk.
- Exhibit 3a is marked as “Confidential” and contains confidential information regarding gas commodity pricing and is designated as Trade Secret in accordance with the Commission’s March 30, 2022 Order in Case No. PU-22-008. Montana-Dakota filed for similar treatment in prior years and most recently on October 30, 2025 in Case No. PU-26-007. Exhibit 3a -Public Copy is included in this filing.
- Exhibit 4 provides a summary of the change in pipeline rates occurring since the last COG filing and a copy of applicable effective pipeline rates along with supporting workpapers.
- Exhibit 5 shows the calculation of the return on storage inventory balances and prepaid demand and commodity balances using the calculation procedure set forth in Rate 88. The overall rate of return of 7.262% applied to the balances was authorized by the Commission in Case No. PU-23-341.
- Exhibit 6 shows the computation of the (over)/under recovered gas cost account balances.

The COG changes, calculated in accordance with Rate 88, will amount to a decrease of approximately \$1,069,900 for natural gas customers during the month of February 2026. All Montana-Dakota's retail gas customers in North Dakota may be affected by this proposal. There were 117,362 natural gas customers in North Dakota as of December 31, 2025.

CIG Rocky Mountain Index and NNG-Ventura Index are based on a price discovery survey by several natural gas periodicals, including "Inside FERC Gas Market" and "Gas Daily" by McGraw-Hill Companies. These prices reflect the cost of gas that is willingly paid by sellers and buyers of gas in the region which Montana-Dakota Utilities operates. The pricing trends, displayed below, show the past thirty six months of forecasted pricing and are indicative of the prices Montana-Dakota Utilites pays for gas supplies.

The Department of Energy's (DOE) Energy Information Administration (EIA) provides various publications on energy issues including a national natural gas storage report.
