Description of the alleged violation/concern. If more space is required, attach additional page(s). Garden Creek states they marked line. went to survey line and walked entire area and no pin flags were set. called and locator called me back and state that it was marked and they shared the oneok trench. i told him there were no flags to which he said there should be. No cattle were in pasture and old prelim staked wood stakes were adjacent to their row. so land was not disturbed for flags to have been removed operator failed to locate line. Although this is a survey ticket. operators need to either provide an electronic file or field locate their lines so that we can avoid conflicts with our designs. by failing to mark and saying they did causes extra work and potential delays costing our clients thousands in rig delays and construction delays.
