

TEN YEAR PLAN: 2026-2036
Flickertail Wind, LLC

June 2026

In accordance with N.D.C.C. § 49-22-04 and N.D.A.C. Ch. 69-06-02, Flickertail Wind, LLC (Flickertail Wind), submits the following Ten Year Plan for years 2026 through 2036.

- (1) *A description of the general location, size, and type of all facilities to be owned or operated by the utility during the ensuing ten years, as well as those facilities to be removed from service during the ten-year period.*

Flickertail Wind is a Minnesota limited liability company authorized to do business in the state of North Dakota. Flickertail Wind is developing the Flickertail Wind Project (Project), a proposed wind energy conversion facility and associated 345 kilovolt (kV) transmission line in Eddy County, North Dakota. The anticipated nameplate capacity of the Project is up to 407 megawatts (MW), with up to 370 MW delivered to the grid.

An approximately 11 mile long 345-kV transmission line will be constructed in order to interconnect the Project to the existing transmission grid.

Flickertail Wind does not have any plans to construct, own or operate any generation or transmission facilities other than the Project and any required transmission line. Flickertail Wind does not currently own or operate any facilities and, therefore, does not own or operate any facilities that will be removed from service during the next ten years.

- (2) *An identification of the location of the tentative preferred site for all energy conversion facilities and the tentative location of all transmission facilities on which construction is intended to be commenced within the ensuing five years and such other information as may be required by the commission. The site and corridor identification shall be made in compliance with the criteria published by the commission pursuant to section 49-22-05.1*

The Project will be located in Eddy County. A map of the proposed site for the wind project and the proposed route of the associated transmission line is provided in **Exhibit A**, attached hereto.

Flickertail Wind has retained qualified environmental and land use experts to assist Flickertail in identifying avoidance and exclusion areas within and in proximity to the proposed Project, in accordance with N.D.C.C. Ch. 49-22 and N.D.A.C. Ch. 69-06-08. The Project will be

designed to comply with the exclusion and avoidance areas referenced in N.D.C.C. § 49-22-05.1 and identified in N.D.A.C. Ch. 69-06-08.

- (3) *A description of the efforts by the utility to coordinate the plan with other utilities to provide a coordinated regional plan for meeting the utility needs of the region.*

Flickertail Wind has signed a long-term power purchase agreement (PPA) for the Project's output with Minnkota Power Cooperative Inc. (Minnkota), a not-for-profit generation and transmission cooperative that provides wholesale power to member cooperatives serving communities across North Dakota and Minnesota. The PPA establishes a committed offtake for the Project's energy, providing a stable foundation for Project development while contributing to a diversified and reliable regional energy portfolio that serves local cooperative members.

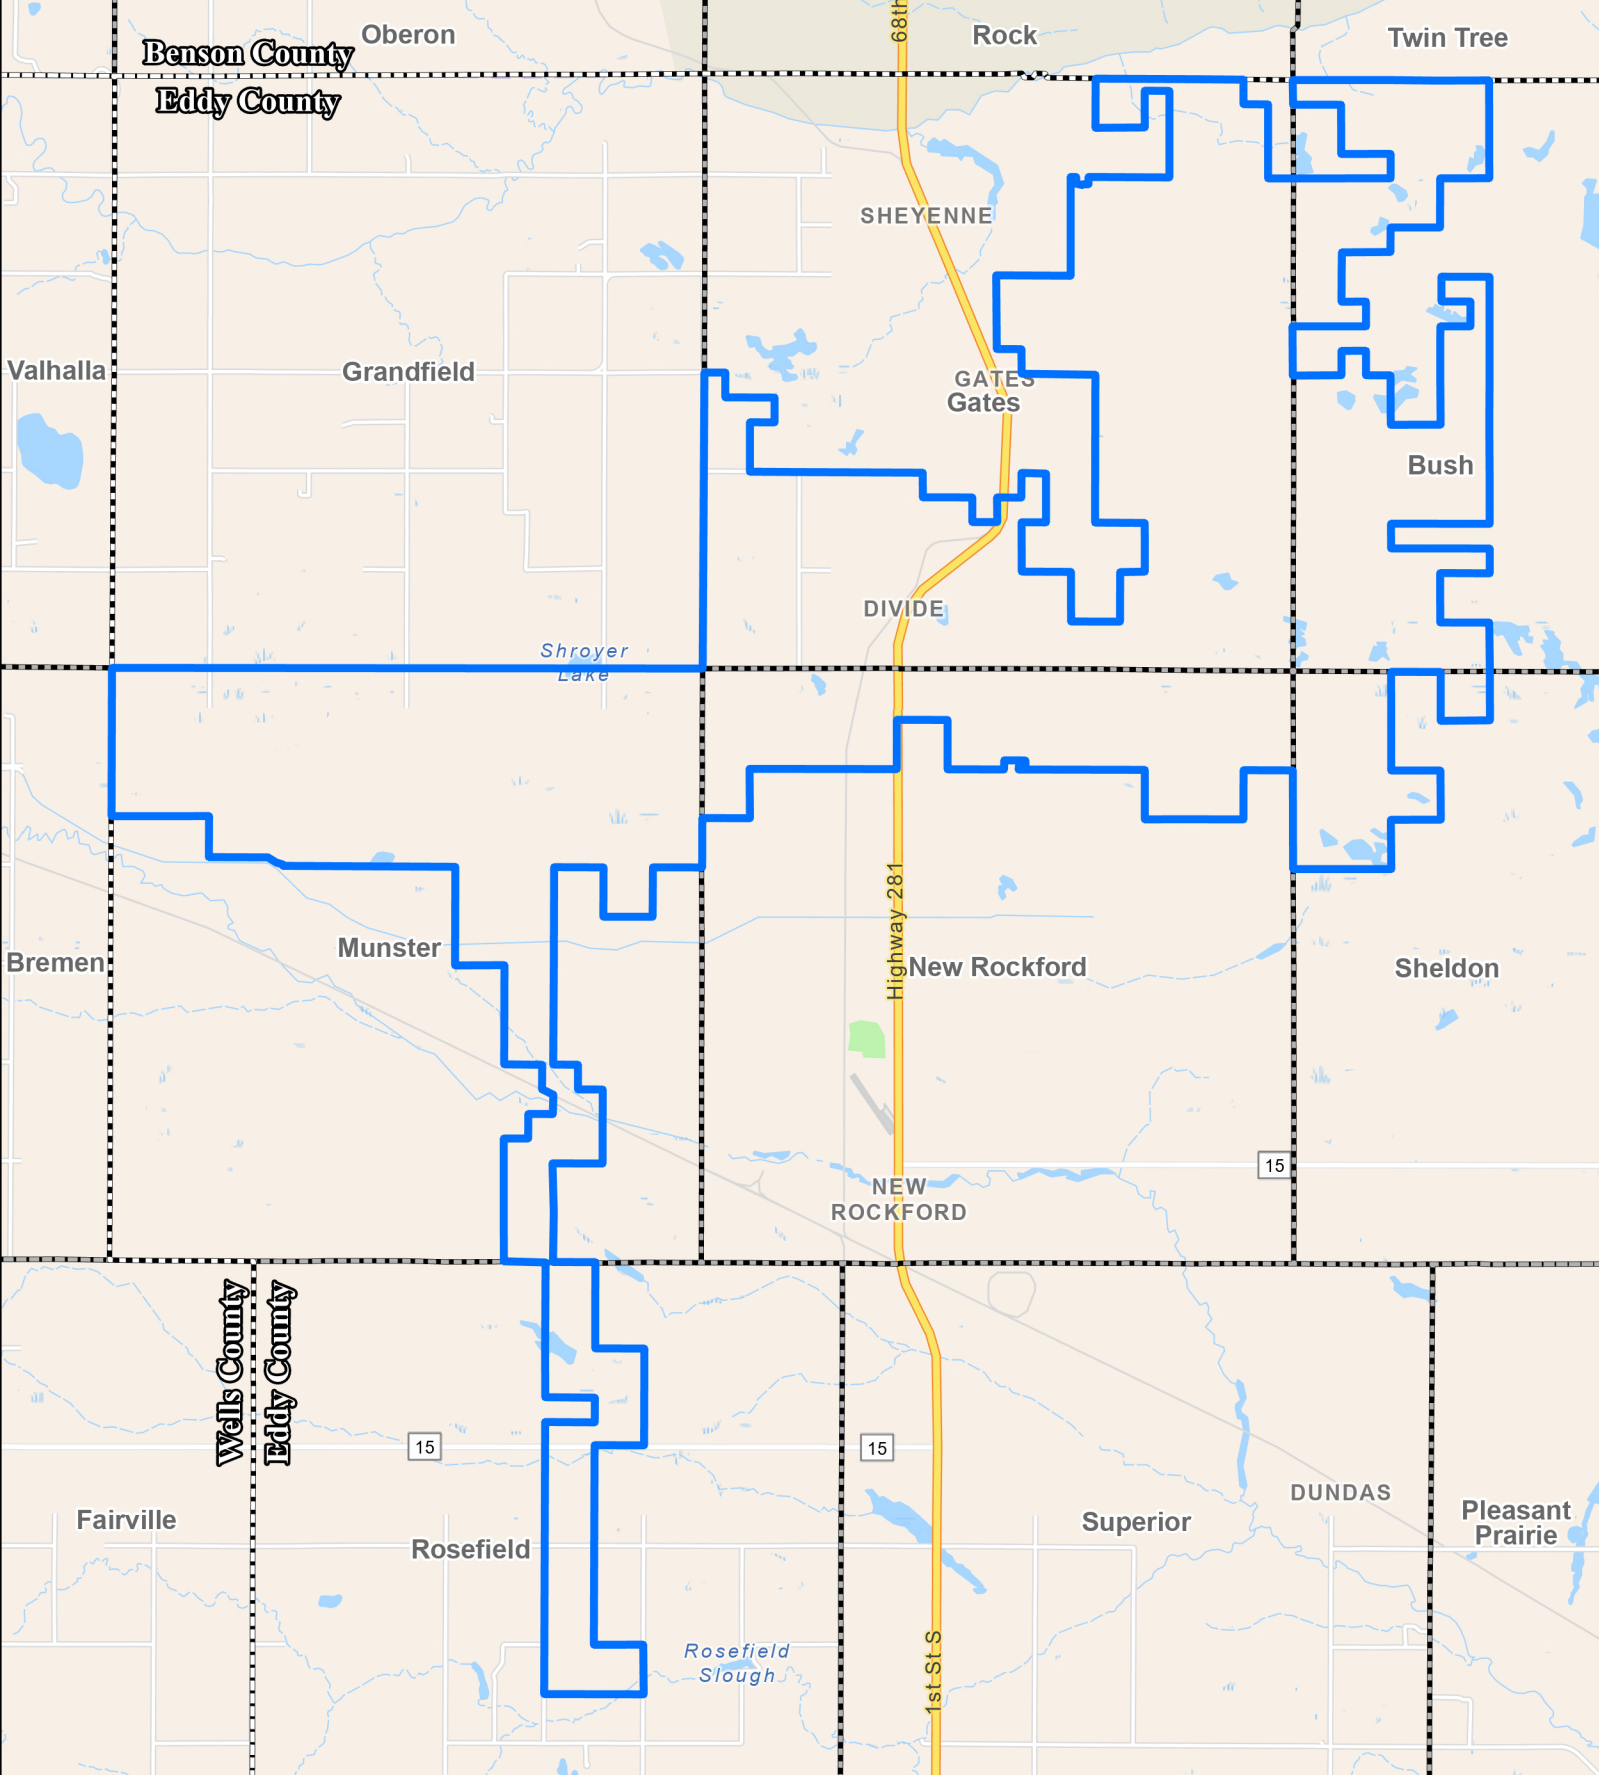

Flickertail Wind executed a Generation Interconnection Agreement (GIA) with Minnkota (MPC-03800/03900) for interconnection of the Project to the transmission system. The GIA was executed on June 26, 2025.

- (4) *A description of the efforts to involve environmental protection and land-use planning agencies in the planning process, as well as other efforts to identify and minimize environmental problems at the earliest possible stage in the planning process.*

As noted above, Flickertail Wind has utilized, and will continue to utilize, internal and external environmental and land use consultants to conduct studies and analyses of the Project to ensure it will comply with the siting criteria set forth in N.D.C.C. § 49-22-05.1 and identified in N.D.A.C. Ch. 69-06-08. Additionally, Flickertail Wind has consulted and will continue to consult with applicable state and federal agencies to avoid, minimize, and/or mitigate any potential environmental impacts from the construction and operation of the Project. Flickertail Wind has also been and will continue to coordinate with Eddy County and the associated townships to ensure conformance with local land use regulations.

- (5) *A statement of the projected demand for the service rendered by the utility for the ensuing ten years and the underlying assumptions for the projection, with that information being as geographically specific as possible, and a description of the manner and extent to which the utility will meet the projected demands.*

As noted above, Flickertail Wind has a long-term PPA with Minnkota for the entire output of the Project. The energy produced by the Project is anticipated to be used by Minnkota to meet the load requirements of Minnkota's members.
