**RE: 41 Wind, LLC's Ten-Year Plan for 2026-2036 Case No.
PU-26-_____**

Dear Mr. Johnson:

Attached for filing are copies of the following documents:

1. 41 Wind, LLC's Ten Year Plan: 2026-2036;
2. Notice of Filing Ten Year Plan: 2026-2036; and
3. **Certificates of Service.**

Electronic copies of the above-mentioned documents and this letter were filed electronically with the Commission today via e-mail.

If you have any questions, please let me know.

Sincerely,

Angeli Modjeski
Administrative Assistant

2026 Ten Year Plan

41 Wind, LLC
Angeli Modjeski, Admin. Asst.

TEN YEAR PLAN: 2026-2036

41 Wind, LLC

In accordance with N.D.C.C. § 49-22-04 and N.D.A.C. Ch. 69-06-02, 41 Wind, LLC ("41 Wind"), submits the following Ten-Year Plan for years 2026 through 2036.

- (1) *A description of the general location, size, and type of all facilities to be owned or operated by the utility during the ensuing ten years, as well as those facilities to be removed from service during the ten-year period.*

41 Wind is a Minnesota limited liability company authorized to do business in the state of North Dakota. 41 Wind is developing the 41 Wind Project ("Project"), a proposed wind energy conversion facility and associated 345 kilovolt (kV) transmission line in Burleigh County, North Dakota. As proposed, the Project will have a nameplate capacity of up to 400 megawatts ("MW"). Additional facilities associated with the Project include access roads, permanent meteorological evaluation towers ("MET"), an Aircraft Detection Lighting System ("ADLS"), a Supervisory Control and Data Acquisitions ("SCADA") system, transformers, an operations and maintenance ("O&M") building, a proposed project substation, a construction laydown area, and a batch plant.

An approximately 10-mile long 345-kV transmission line will be constructed to connect the Project to the existing transmission grid.

41 Wind does not own or operate any transmission or generation facilities in North Dakota, and the Project will have an estimated life of greater than 10 years. As such, 41 Wind does not have any plans to remove from service any transmission or generation facilities within the timeframe of this plan.

- (2) *An identification of the location of the tentative preferred site for all energy conversion facilities and the tentative location of all transmission facilities on which construction is intended to be commenced within the ensuing five years and such other information as may be required by the commission. The site and corridor identification shall be made in compliance with the criteria published by the commission pursuant to section 49-22-05.1.*

The Project will be located in Burleigh County, North Dakota. A map of the proposed site for the Project and the proposed options of the associated transmission line is provided in Exhibit A, attached hereto.

41 Wind has retained qualified environmental and land use experts to ensure 41 Wind identifies avoidance and exclusion areas within and in proximity to the proposed Project, in accordance with N.D.C.C. Ch. 49-22 and N.D.A.C. Ch. 69-06-08. The Project will be designed to comply with the exclusion and avoidance areas referenced in N.D.C.C. §49-22-05.1 and identified in N.D.A.C. Ch. 69-06-08.

- (3) *A description of the efforts by the utility to coordinate the plan with other utilities so as to provide a coordinated regional plan for meeting the utility needs of the region.*

41 Wind is in talks with a utility that serves load in North Dakota for the Project's output.

Energy produced by the Project will help utilities to serve increased demand and may help them meet applicable renewable energy standards.

41 Wind has submitted an interconnection application to deliver power to the grid via the [Minnkota Power Cooperative system](#), which is under evaluation. Once the interconnection studies are finalized, 41 Wind will coordinate with the appropriate regional transmission organizations/independent system operator to enter into a generator interconnection agreement for the Wind Project.

- (4) *A description of the efforts to involve environmental protection and land-use planning agencies in the planning process, as well as other efforts to identify and minimize environmental problems at the earliest possible stage in the planning process.*

As noted above, 41 Wind has engaged the services of qualified environmental and land use experts to conduct studies and analyses to ensure compliance with avoidance and exclusion areas within the proposed Project site in accordance with N.D.C.C. Ch. 49-22 and N.D.A.C. Ch. 69-06-08. In addition, these experts are to identify any areas of concern that would need special attention during siting and/or facility construction. 41 Wind will continue to avoid, minimize, and/or mitigate any impacts to the environment or siting concerns that would preclude development within the study areas. [One year of field studies was completed in 2025 and year 2 of several environmental studies is underway in 2026.](#)

41 Wind has consulted with the United States Fish and Wildlife Service ("USFWS"), North Dakota Game and Fish ("NDGF"), and officials in Burleigh County regarding the proposed Project. 41 Wind will continue to consult with the USFWS, NDGF, Burleigh County and other federal, state and local agencies and governmental units, to discuss and seek input to avoid, minimize, and/or mitigate any potential environmental impacts from the construction and operation of the Project. 41 Wind has also been and will continue to coordinate with Burleigh County and the associated townships to ensure compliance with local land use regulations.

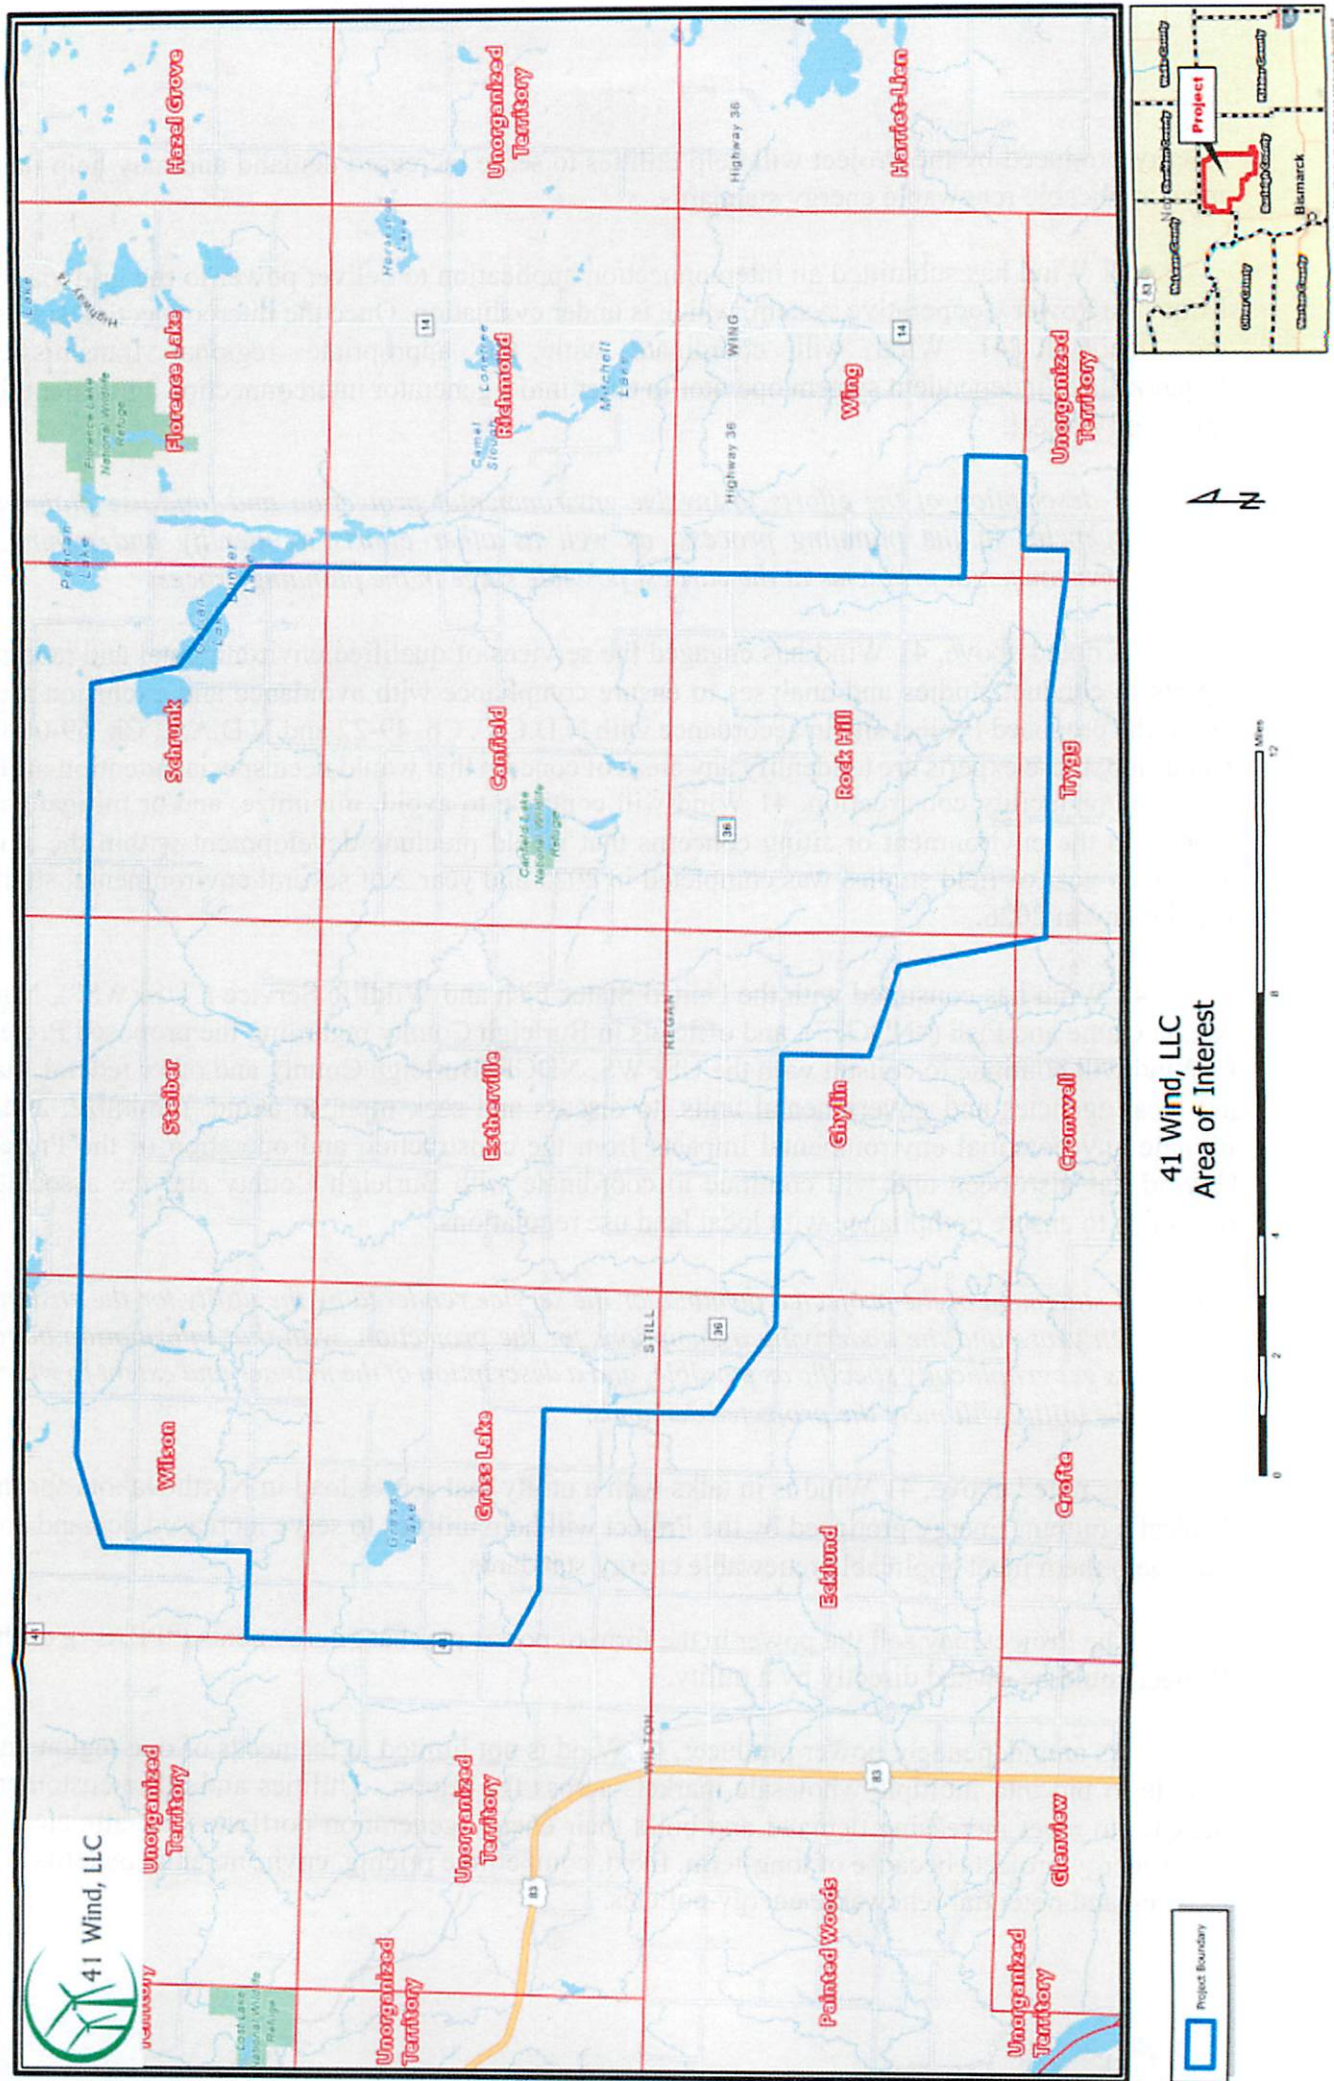

- (5) *A statement of the projected demand for the service rendered by the utility for the ensuing ten years and the underlying assumptions for the projection, with that information being as geographically specific as possible, and a description of the manner and extent to which the utility will meet the projected demands.*

As noted above, 41 Wind is in talks with a utility that serves load in North Dakota for the Project's output. Energy produced by the Project will help utilities to serve increased demand and may help them meet applicable renewable energy standards.

The Project may sell the power in the form of power purchase agreements ("PPAs"), or the Project could be owned directly by a utility.

As an independent power producer, 41 Wind is not limited to the needs of one region and is able to bid into multiple wholesale markets across the region. Utilities and other customers seeking to meet increasing demand and build their energy generation portfolios are attracted to wind energy projects because of long-term, fixed, competitive pricing, environmental benefits and existing and potential renewable energy policies.
