

ONE-CALL COMPLAINT
PUBLIC SERVICE COMMISSION
SFN 59067 (08/2022)

INSTRUCTIONS: To allege a violation of the One-Call Excavation Notice System (N.D.C.C. Chapter 49-23), complete this form in its entirety.

SECTION I – COMPLAINANT (Individual/entity completing form)

Company/Entity Name (if applicable) N/A			
Contact Person Brady Carpenter	Email Address bradycarpenter413@gmail.com	Telephone Number 701-509-3350	
Mailing Address 7 Park Way	City Minot	State ND	Zip Code 58701
Complainant is willing and able to testify on the complaint if matter proceeds to a formal hearing.		☒ YES	☐ NO

SECTION II – RESPONDENT (Individual/entity who allegedly violated the One-Call law)

Company/Entity Name (if applicable) North Prairie Regional Water District			
Contact Person Joddy Meidinger	Email Address billing@nprwd.com	Telephone Number 701-833-0492	
Mailing Address 3811 Burdick Expressway	City Minot	State ND	Zip Code 58701

SECTION III – ALLEGED VIOLATION

OPERATOR – A person or entity who owns or operates an underground facility (i.e.: natural gas, electric, sewer, etc.).	
☐ Operator failed to mark or clear underground facility within locate period.	☐ Operator failed to mark underground facility within 24 inches horizontally.
EXCAVATOR – A person or entity who conducts excavation (i.e.: homeowner, property owner, company, etc.).	
☐ Excavation started prior to underground facility locate.	☐ Excavator failed to provide locate notice prior to beginning excavation.
☐ Excavator failed to conduct the excavation in a careful and prudent manner.	☐ Excavator failed to renew locate request prior to expiration of the 21-day period.
OTHER – May be issue/concern with One-Call Center or other alleged violation that is not listed under operator or excavator.	
☒ Write Issue/Concern: Failure to notify One Call notification center of >48-hr postponement – § 49-23-04(6)(f)(1)	

SECTION IV – DESCRIPTION/DAMAGE

Date and Time of Event 09/07/2026 – approx 4:41 PM	Location (Address, City, State / Nearest Intersecting Streets / Lat & Long) Near 49th St N & 16th Ave N, North Prairie Twp, McHenry Co	One-Call Ticket Number 26118764
Underground Facility Affected ☐ Electric ☐ Gas ☐ Cable ☐ Communications ☐ Water ☐ Sewer/Storm Water ☐ Petroleum ☒ Other None		
Material & Size of Underground Facility (Poly, Steel, Coated Pipe / Fiberoptic / 2 KW / 1.5 in, 2 in / etc.) N/A		Operator(s) Affected N/A
Estimated Value of Damage \$0.00	Injuries (List Number, If Any) 0 Fatalities 0 Injuries 0 Hospitalizations	Number of Customers Affected 0
Description of the alleged violation/concern. If more space is required, attach additional page(s). See attached continuation page and supporting exhibits.		

SECTION V – SIGNATURE OF COMPLAINANT

Signature /s/ Brady Carpenter	Printed Name Brady Carpenter	Date 09/08/2026
----------------------------------	---------------------------------	--------------------

Please email the completed form to ndpsc@nd.gov, fax to 701-328-2410, or mail to: Public Service Commission

Bismarck, ND 58505-0480

ATTACHMENT TO NORTH DAKOTA PSC ONE-CALL COMPLAINT

ND One Call Ticket No. 26118764

Alleged Violation: N.D.C.C. § 49-23-04(6)(f)(1)

1. Ticket and Relevant Chronology

North Dakota One Call Ticket No. 26118764 was created on September 2, 2026, as a ROUTINE ticket. North Prairie Regional Water District is identified as the caller, the work is identified as “REPAIR WATER MAIN VALVE,” and the ticket states that the work is being done for NPRWD. The stated work-to-begin date and time is Saturday, September 5, 2026, at 12:01 a.m.

The ticket identifies PROJECT STAKING as the site-identification method and directs operators to “MARK A 100 FT RADIUS AROUND THE STAKE - BLUE STAKE, BLUE FLAGS.” The work location is near 49th Street North and 16th Avenue North in North Prairie Township, McHenry County, North Dakota.

All notified operators had completed their positive responses by 11:23:41 a.m. on September 4, before the stated work-to-begin time. North Prairie Regional Water District reported Marked, Souris River Telecommunication reported Marked, and Verendrye Electric Cooperative reported Clear/No conflict.

The forty-eight-hour point following the stated work-to-begin time occurred at 12:01 a.m. Monday, September 7, 2026.

Beginning at approximately 4:41 p.m. September 7, approximately 64 hours and 40 minutes after the stated commencement time, I observed and photographed the marked work area from multiple safe and lawful vantage points.

The photographs document the site from broad, intermediate, and close vantage points. The ticket's blue project stake and blue flags are visible immediately adjacent to a valve identified by North Prairie Regional Water District gate-valve signage.

At the time of my observation, I observed no apparent open excavation, spoil pile, displaced earth, excavation equipment, or other readily visible indication that excavation associated with the identified valve repair had commenced.

The area received substantial rainfall during the preceding weekend and Labor Day holiday period, which is consistent with the standing water visible in the photographs.

The selected photographs display GPS coordinates falling within the map-coordinate bounds published on Ticket No. 26118764. Any street-address or city text displayed by the timestamp application is automatically generated reverse-geocoded information and is not relied upon to identify the site. The location is instead established by the ticket's location and marking instructions, the blue project stake and flags, the photographed GPS coordinates, and the visible North Prairie gate-valve signage.

At approximately 6:40 p.m. September 7, I preserved the North Dakota One Call Search and Status record and Status History. The ticket continued to reflect the September 5, 12:01 a.m. work-to-begin time, and the public Status History reflected ticket creation and operator-response activity but no subsequent public ticket action or modification reflecting postponement notice.

On September 8, 2026, at approximately 9:40 a.m. CDT, immediately before filing this complaint, I again reviewed and preserved the Search and Status record and Status History.

No changes were observed. The public ticket record continued to reflect the September 5, 2026, at 12:01 a.m. work-to-begin time, and I observed no subsequent public ticket action, modification, replacement notice, or other public entry reflecting postponement notification.

I recognize that the public Search and Status record may not necessarily display every retained telephone or electronic communication. I therefore respectfully request that the Commission verify the notification center's complete retained records.

2. Preventive Outreach

This potential issue was raised before the stated work-to-begin time and before any alleged violation occurred.

On September 3, 2026, I emailed North Dakota One Call representative Ryan Schmaltz concerning Ticket No. 26118764. I expressly stated that I was not alleging that a violation had occurred and that my purpose was to prevent a potential compliance issue before one occurred.

I explained the ticket's September 5, 12:01 a.m. commencement time and the more-than-forty-eight-hour postponement requirement and asked whether North Dakota One Call, in its educational and outreach capacity, would contact North Prairie Regional Water District regarding that requirement.

Mr. Schmaltz responded:

“I will reach out to North Prairie Regional Water District and discuss the notification requirements associated with postponing excavation after the work-to-begin date and time.”

He also stated that North Dakota One Call's role was educational and that any determination regarding compliance with Chapter 49-23 rested with the Public Service Commission. Mr. Crockford was copied on the correspondence.

I include this correspondence to document that, before the applicable period elapsed, I attempted to address the potential issue prospectively through North Dakota One Call's educational and outreach function. I do not offer the correspondence as proof that North Dakota One Call actually communicated with North Prairie Regional Water District.

3. Statutory Basis and Legislative History

N.D.C.C. § 49-23-04(6)(f)(1) requires an excavator, after facilities are located by an operator, to notify the notification center if:

“The excavator postpones the excavation commencement time stated in the excavation notice by more than forty-eight hours, or any extension of that period, or cancels the excavation.”

Here, North Prairie Regional Water District and Souris River Telecommunication had reported their facilities marked, and all notified operators had completed their positive responses before the stated excavation commencement time.

The initial locate period provisions of Chapter 49-23 expressly account for Saturdays, Sundays, and holidays. The separate postponement-notification provision in § 49-23-04(6)(f)(1) contains no comparable weekend or holiday exclusion.

That distinction is longstanding. When North Dakota's statewide One Call system was enacted in 1995 through Senate Bill 2359, Chapter 455, the Legislature expressly excluded Saturdays, Sundays, and holidays from the initial forty-eight-hour notice and locating requirements. In the same enactment, however, the Legislature separately required notification when an excavator postponed the stated excavation commencement time by more than forty-eight hours without including that weekend or holiday exclusion.

Section 49-23-04 was amended by the Legislature in 2013 and again in 2017, while the more-than-forty-eight-hour postponement requirement continued without the Saturday, Sunday, or holiday exclusion used elsewhere in the chapter.

I offer this legislative history as context for the statutory text and respectfully request that the Commission apply the governing law to the actual ticket records and chronology.

Based on the stated September 5 commencement time, completion of all positive responses before that time, the September 7 physical site condition, and the unchanged public ticket history through September 8, I respectfully request that the Commission determine whether excavation commencement was postponed by more than forty-eight hours and, if so, whether the notification required by § 49-23-04(6)(f)(1) was made.

4. Prior Related North Prairie Matter

On August 25, 2026, I filed a separate complaint concerning North Dakota One Call Ticket No. 26108244 and the same statutory provision, N.D.C.C. § 49-23-04(6)(f)(1).

Ticket No. 26118764 involves a separate ticket, separate excavation location, and separate factual chronology and should be evaluated independently on its own evidence.

The prior matter is relevant here only to explain why I attempted preventive educational outreach through North Dakota One Call before the applicable period associated with Ticket No. 26118764 elapsed.

5. Requested Commission Review

I respectfully request that the Public Service Commission:

1. Verify the notification center's complete retained telephone and electronic records for Ticket No. 26118764, including any postponement notification, modification, replacement notice, extension, update, or other communication concerning the excavation commencement time.
2. Determine the actual date and time excavation commenced, if excavation occurred.
3. Determine, if necessary, the identity of the excavator responsible for compliance with N.D.C.C. § 49-23-04(6)(f)(1).
4. If excavation is asserted to have commenced before the more-than-forty-eight-hour threshold, determine the date, time, location, and nature of the excavation claimed to constitute commencement and review available contemporaneous supporting records, including work orders, employee or crew records, photographs, equipment records, vehicle or GPS records if maintained, or similar ordinary-course documentation.
5. If relevant, determine whether North Dakota One Call's contemplated preventive educational outreach was communicated to North Prairie Regional Water District before the applicable period elapsed.

The photographs are offered as contemporaneous evidence of the observable site condition and document the marked work area and identified valve from multiple vantage points. At the time of observation, no readily visible indication of excavation commencement was present.

If earlier excavation is asserted, I respectfully request that the Commission compare that assertion with the contemporaneous physical evidence and available ordinary-course records.

This complaint does not allege underground-facility damage, service interruption, personal injury, or customer impact. The issue presented is whether the statutory postponement-notification requirement was satisfied.

6. Evidence Preserved / Exhibits

Exhibit A — North Dakota One Call Ticket No. 26118764 Search and Status record, preserved September 7, 2026, at approximately 6:40 p.m. CDT.

Exhibit B — North Dakota One Call Ticket No. 26118764 Status History, preserved September 7, 2026, at approximately 6:40 p.m. CDT.

Exhibit C — September 3, 2026 preventive One Call correspondence concerning Ticket No. 26118764, including Ryan Schmaltz's response.

Exhibit D — Timestamped broad overview photograph of the marked work area, September 7, 2026, at 4:41:20 p.m. CDT.

Exhibit E — Timestamped broad photograph from an alternate vantage point, September 7, 2026, at 4:46:00 p.m. CDT.

Exhibit F — Timestamped intermediate photograph showing the valve structures, North Prairie signage, project stake/markings, and surrounding site condition, September 7, 2026, at 4:45:20 p.m. CDT.

Exhibit G — Timestamped photograph showing the identified North Prairie gate valve, blue project stake, blue flags, and surrounding site condition, September 7, 2026, at 4:44:44 p.m. CDT.

Exhibit H — Timestamped closer photograph showing the immediate physical condition surrounding the blue-staked valve, September 7, 2026, at 4:42:12 p.m. CDT.

Exhibit I — Timestamped later photograph showing the identified North Prairie gate valve, blue project stake, blue flags, and surrounding site condition, September 7, 2026, at 4:56:43 p.m. CDT.

Exhibit J — North Dakota One Call Ticket No. 26118764 Search and Status record, preserved September 8, 2026, at approximately 9:40 a.m. CDT.

Exhibit K — North Dakota One Call Ticket No. 26118764 Status History, preserved September 8, 2026, at approximately 9:40 a.m. CDT.

Original image files have been preserved. Numerous additional timestamped photographs of the marked work area and identified valve, taken from additional vantage points, have also been preserved and are available to the Commission upon request.

Respectfully submitted,
Brady Carpenter

Preventive One Call Compliance – Ticket No. 26118764

3 messages

Brady Carpenter <bradycarpenter413@gmail.com>

Thu, Sep 3, 2026 at 9:42 AM

To: Ryan Schmaltz <ryans@occinc.com>

Cc: Konrad Crockford <kcrockford@nd.gov>, Brady Carpenter <bradycarpenter413@gmail.com>

Good Morning Mr. Schmaltz,

I wanted to bring North Dakota One Call Ticket No. 26118764 to your attention solely in the interest of preventing a potential One Call compliance issue before one occurs.

North Prairie Regional Water District submitted this routine ticket on Wednesday, September 2, 2026, for “REPAIR WATER MAIN VALVE.” The ticket lists the excavation work-to-begin date and time as Saturday, September 5, 2026, at 12:01 a.m.

I contacted North Prairie today and was advised that the District will be closed Monday, September 7, 2026, for the Labor Day holiday. North Prairie publicly posts its office hours as Monday through Friday, 8:00 a.m. to 4:30 p.m. Accordingly, while field personnel could potentially perform this particular routine valve repair outside those posted office hours, the ticket’s Saturday, September 5, 2026, at 12:01 a.m. commencement time creates a foreseeable concern that the work may instead be postponed through the weekend and Labor Day holiday, with excavation not commencing until Tuesday, September 8.

Based on the stated commencement time, the relevant timeline is:

- Saturday, September 5, 12:01 a.m. — stated excavation commencement time
- Sunday, September 6, 12:01 a.m. — 24 hours elapsed
- Monday, September 7, 12:01 a.m. — 48 hours elapsed

Therefore, if the affected facilities have been located and excavation remains postponed beyond 12:01 a.m. Monday, N.D.C.C. § 49-23-04(6)(f)(1) appears directly applicable.

N.D.C.C. § 49-23-04(6)(f)(1) provides that, after facilities are located by an operator, an excavator shall notify the notification center if:

“The excavator postpones the excavation commencement time stated in the excavation notice by more than forty-eight hours, or any extension of that period, or cancels the excavation.”

The current statutory language confirms that requirement.

I have specifically reviewed whether Saturdays, Sundays, or holidays are excluded from this forty-eight-hour postponement period. Chapter 49-23 expressly provides such an exclusion elsewhere. The statutory definition of the “locate period” excludes “any Saturday, Sunday, or holiday” from the initial forty-eight-hour calculation.

In contrast, § 49-23-04(6)(f)(1) contains no Saturday, Sunday, or holiday exclusion from the separate forty-eight-hour postponement provision.

I also reviewed the legislative history because I wanted to ensure I was not overlooking an intended weekend or holiday exception. When North Dakota’s statewide One Call system was originally enacted in 1995 through Senate Bill 2359, Chapter 455, the Legislature expressly excluded Saturdays, Sundays, and holidays from the initial forty-eight-hour notice and locating requirements. In the same enactment, however, the Legislature separately required notification when an excavator postponed the stated excavation commencement time by more than forty-eight hours without including that weekend or holiday exclusion.

Chapter 49-23 was subsequently amended in later legislative sessions, including significant revisions in 2013 and 2017, while the more-than-forty-eight-hour postponement requirement continued without the Saturday, Sunday, or holiday exclusion used elsewhere in the chapter.

I recognize that legislative history is not itself an enforcement determination. However, the longstanding drafting distinction appears significant because the Legislature has demonstrated that it knows how to expressly exclude

Saturdays, Sundays, and holidays when it intends to do so, while the postponement provision continues to state simply "more than forty-eight hours."

North Dakota One Call's own current guidance also addresses the work-to-begin date and time. The 2025 North Dakota One Call Handbook explains that the system defaults the work-to-begin date and time to the two full working days required by law, excluding weekends and holidays, but specifically informs excavators that they may enter a different work-to-begin date and time if it is later than the default date and time.

The Handbook further explains that if information on an excavation notice needs to be changed after submission, the excavator may contact the NDOC Center or use ITICnxt to file a MODIFY notice, which alerts affected facility operators that changes were made to the original notice.

That guidance also appears consistent with N.D.C.C. § 49-23-04(1)(c), which requires an excavation notice to contain "the date and time when excavation is scheduled to begin."

A separate North Prairie ticket involving the same § 49-23-04(6)(f)(1) postponement issue is presently before the Public Service Commission. Because North Prairie may not yet have received the Commission's correspondence concerning that pending matter, I would much rather bring this new ticket to your attention prospectively and give the District an opportunity to ensure compliance than have a similar issue potentially arise again.

For your convenience, I have attached the current North Dakota One Call Search and Status record for Ticket No. 26118764. North Prairie's caller and contact information is included directly on the ticket should you be willing to reach out to the District regarding this requirement.

Would you be willing, in North Dakota One Call's education and outreach capacity, to contact North Prairie and make sure they are aware that, after the facilities have been located, postponing the stated excavation commencement time by more than forty-eight hours requires notification to the notification center, and that the postponement provision itself does not contain the weekend or holiday exclusion found elsewhere in Chapter 49-23?

I am not asking North Dakota One Call to determine whether a violation has occurred, interpret the merits of the pending PSC matter, or perform an enforcement function. I am not alleging that a violation has occurred concerning Ticket No. 26118764 at this point. My purpose in contacting you now is specifically to prevent another potential compliance issue before one occurs.

I have copied Mr. Crockford for transparency because the Commission is presently reviewing the prior North Prairie matter involving the same statutory provision.

Thank you for your time and assistance.

Respectfully,

Brady Carpenter

Mr. Carpenter,

Thank you for bringing this to my attention.

I will reach out to North Prairie Regional Water District and discuss the notification requirements associated with postponing excavation after the work-to-begin date and time.

As you are aware, North Dakota One Call's role in this matter is educational. Any determination regarding compliance with Chapter 49-23 or whether a violation has occurred falls under the jurisdiction of the North Dakota Public Service Commission.

Thank you,

-Ryan

Mr. Schmaltz,

Thank you for the quick response and for being willing to reach out to North Prairie Regional Water District regarding the postponement-notification requirements.

I completely understand and respect that North Dakota One Call's role is educational and that any determination regarding compliance with Chapter 49-23 rests with the Public Service Commission. My intent in bringing Ticket No. 26118764 to your attention was simply to provide North Prairie an opportunity to understand and comply with the applicable requirement before a potential issue develops.

I appreciate your assistance and willingness to provide that outreach.

Thank you again,

Respectfully,

Brady Carpenter
